

# I-15/Tropicana Interchange Feasibility Study

# I-15/Tropicana Interchange Feasibility Study

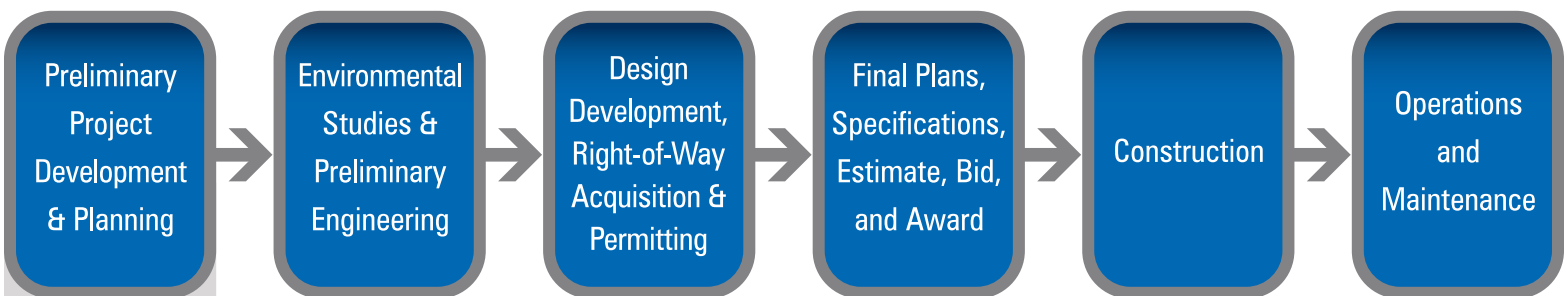

## FACT SHEET

### FACT SHEET

#### The Project Delivery Process:

We are currently in the Preliminary Project Development & Planning phase of the process.

We are here

As you can see, we're just getting started – there is a lot of work to do.

#### What are the next steps?

- We will establish communication and collaboration with the local area agencies and stakeholders
- We will establish final project goals and objectives
- We will develop conceptual solutions to meet the project goals and objectives
- We will prepare a study document to summarize the work performed and present one or more preferred alternatives to be carried to the next phase in the delivery process.

#### What is the purpose of the study?

- Improve the safety of the interchange and on I-15 in the vicinity of the interchange
- Improve operations on I-15 and on Tropicana while enhancing the performance of the interchange ramps and intersections. This means travelers will be able to get to their destination faster.
- Determine impacts to local businesses and resort destinations and provide early and upfront information to those affected.
- Identify possible improvements that meet the goals and objectives above and prepare them to be carried forward to the environmental process.

#### What are the potential improvements?

- We don't know yet!
- There are many possibilities that will be reviewed through this study.
- Input will be garnered during public and stakeholder interaction.
- The study will evaluate a myriad of possible solutions to meet the goals above and document which of those should be considered effective enough to be carried to the next phase of project development.
