

TRUCKING

Various trucking companies (subcontractor, service provider or owner operator) working on the project may or may not be required to submit certified payrolls in LCPTracker. Determine if prevailing wage applies or not for each truck driver, depending on what work is being performed, and if they are just making a delivery or whether they are working at the site of work.

Per subsection 110.01 of the Standard Specifications:

The minimum wage rates apply to workmen working upon the "site of work". The term "site of work" is defined as follows:

The "site of work" is defined as the physical place or places where work called for in the contract is performed by either the Contractor or the Contractor's agents. Material sources controlled by the Department and staging areas set up to construct portions of the work are considered to be the "site of work". Not included in the "site of work" are permanent home offices, batch plant establishments, fabrication plants, and tool yards of an employer whose locations and continuance in operation are determined without regard to the work. In addition, fabrication plants, batch plants, borrow pits, job headquarters, tool yards, or other like locations of a commercial supplier or materialman which are established by a supplier of materials for the project before opening of bids are not included in the "site of work".

In addition, temporary plants or contractor's staging yard established for a project would be considered "site of work" only when the site is 1) Adjacent (common boundary between the project and plant site) or 2) Virtually adjacent (plant site is separated from the project site by a narrow strip of land such as a local road between a project and a plant site).

Examples of when prevailing wage is required

1. Truck drivers hauling within the site of work (from one location to another).
2. Truck drivers hauling materials or supplies between a facility that is deemed part of the site of work and the actual construction site.
3. Truck drivers hauling between a designated pit (for this project only) (hotplant, concrete batch plant, materials source, etc.) and the site of work.
4. Truck drivers hauling materials from the site of work to a designated site (unsuitable material, etc.).
5. Truck drivers hauling material between the site of work and a designated pit adjacent to or virtually adjacent to site of work.

Examples of when prevailing wage is not required

1. Truck drivers working away from the site of work.
2. Truck drivers making deliveries away from the site of work.
3. Truck drivers loading and/or unloading materials and supplies (guardrail, pipe, signs, barrier rail, equipment, steel, etc.) at the site of work.
4. Truck drivers hauling materials between a commercial site (hotplant, concrete batch plant, materials source, etc.) and the site of work.
5. Truck drivers hauling from a portable plant set up in a commercial source for a specific project.
6. Truck drivers transporting material supplies, tools, etc. from a dedicated facility away from the site of work to the site of work.

A hauling agreement is required for all DBE trucking firms including DBE trucking owner operators. The hauling agreement is a binding agreement between contractors, subcontractors, service providers and / or owner operators and must contain all the required information including the items shown below. All hauling agreements received by the Resident Engineer shall be forwarded to Contract Compliance for review and approval.

Contract Compliance shall verify all necessary information is correct and complete:

- A. truck owner's name
- B. truck driver's name
- C. current vehicle license number
- D. vehicle identification number (VIN)
- E. copy of vehicle registration
- F. method of payment (hour, ton, load)

PREVAILING WAGES

Prevailing wages are listed differently depending on county. Prevailing wages and how they are shown (one truck driver classification, group classifications or individual classifications) may also vary from year to year for the same county. The following examples are three different ways the prevailing wages are currently listed by the Labor Commissioner's Office.

- Example No. 1: Douglas County shows one classification for "Truck Driver" which includes all truck drivers.
- Example No. 2: Clark County shows truck drivers separated by group classifications.
- Example No. 3: Elko County shows truck drivers broken down with individual classifications.

All three examples of the prevailing wages state: **"TRUCK DRIVER" - includes but is not limited to:** *Driving a tractor trailer combination or a truck to transport goods or materials at the site of a public work or between sites of a public work. (Also, see descriptions listed with Truck Driver rates, if any.)*

Even though "Truck Driver" is defined differently by county, it is interpreted to mean any truck driver class / description that is not specifically listed could still require prevailing wages as defined by the statement **"includes but is not limited to":**

In summary, the term "Truck Driver" includes but is not limited to: Dump trucks all sizes, trucks and trailers in any combination, drivers of trucks (legal payload all capacities), dumpcretes, bulk cement spreaders, transit mix trucks with or without boom, water and jetting trucks, bus and manhaul drivers, winch truck and "A" frame drivers, boot trucks, flat rack trucks, truck and equipment greaser, water and fuel truck drivers, pickup driver, pilot car driver, service station attendant, teamster equipment (highest rate paid for dual craft operation), warehousemen, drivers of busses, gas and oil pipeline working truck drivers, dumpster trucks, forklifts, ross carriers, stockroom clerk, tireman, all off-road equipment, truck repairman, transport drivers, road oil spreaders, euclid-type equipment Letourneau pulls, terra cobras and similar types of equipment, PB and similar type trucks when performing work within the teamster jurisdiction, regardless of types of attachment, including power units pulling off-highway belly dumps in tandem.

NOTE: If you do not see a specific truck driver classification listed in the prevailing wages for your project, contact Contract Compliance for clarification and guidance.

Nevada's workers are critical to the economy and quality of life in our State.

The Labor Commissioner strives to ensure that all workers are treated fairly under the law.

The Labor Commissioner investigates complaints of non-payment of wages, State minimum wage, overtime, and prevailing wage disputes.

The office also monitors youth employment standards including work hours and safe, non-hazardous working conditions.

Assembly Bill (AB) 172 became effective June 9, 2015. The amended provisions of AB 172 do not apply to public works projects awarded prior to June 9, 2015. AB 172 does the following:

- Changes the Public Work Project (PWP) amount from \$100,000 to \$250,000;
- Requires that the prevailing wage for each craft in a county shall be at least 50% of the total hours worked in the county for each craft as reported through the survey process;
- If there is no 50% majority, the prevailing wage will be the average of the total hours worked in the county for each craft as reported through the survey process;
- Requires the prevailing wage rate on school projects including the Nevada System of Higher Education (NSHE), to be at least 90% of the prevailing wage rate for each craft in the county where the school construction is taking place;
- Exempts Charter Schools from prevailing wage requirements; and
- Repeals Senate Bill 119.

*The prevailing wage rates for 2015-2016 will be published on October 1, 2015, pursuant to Nevada Administrative Code (NAC) Section 338.040. For school projects that are awarded between June 9, 2015, and October 1, 2015, the current 2014-2015 prevailing wage rates should be used, and reduced by 10% for each craft in the county where the school construction is taking place, to come up with the 90% amount for school projects.
