

I-515/Charleston Boulevard Interchange CMAR Project

Reconstruct existing tight diamond interchange at I-515/Charleston Boulevard. The proposed work will include:

- Widening Charleston Blvd. from Honolulu Street to Sacramento Drive
- Widening selected ramps at Eastern Avenue and Charleston interchanges
- Constructing one auxiliary lane in each direction on I-515 between Eastern and Charleston

Project Status

Environmental Assessment 2016-2019

The project is currently in the NEPA phase. Due to delays and external challenges related to regional air quality modeling, the schedule for NEPA completion is uncertain. The current project milestones are:

- AQ Model Approval Dec-18
- FONSI Sep-19
- R/W Clear Sep-21
- GMP Approval Oct-21

If met, this schedule would allow construction to begin in early 2022.

Final Design 2019-2020

Right-of-Way/Utilities 2020-2021

Construction 2022-2023

All information presented is preliminary and subject to revision
