LAS VEGAS, NV 89130
PHONE: (702)515-5230 FAX: (702)515-5231

Consultation Code: 08ENVS00-2016-SLI-0073

August 09, 2016

Event Code: 08ENVS00-2016-E-00029

Project Name: I-515 Charleston Interchange EA

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having

similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>; <http://www.towerkill.com>; and <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Official Species List

Provided by:

Southern Nevada Fish and Wildlife Office
4701 N. TORREY PINES DRIVE
LAS VEGAS, NV 89130
(702) 515-5230

Consultation Code: 08ENVS00-2016-SLI-0073

Event Code: 08ENVS00-2016-E-00029

Project Type: TRANSPORTATION

Project Name: I-515 Charleston Interchange EA

Project Description: NDOT is currently preparing and Environmental Assessment for proposed facility improvements to I-515 at the location of the Charleston Blvd Interchange in Las Vegas, NV.

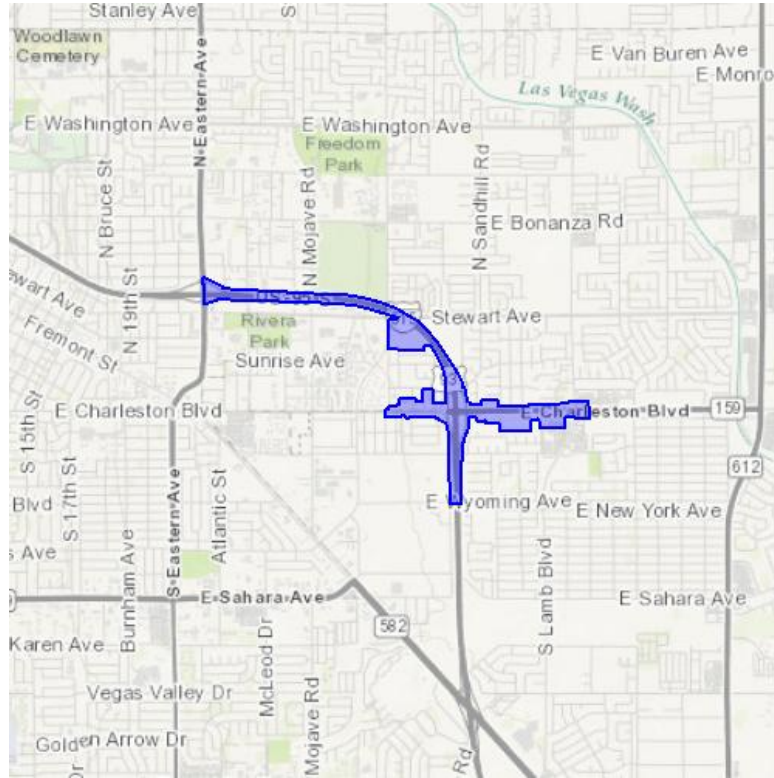

Please Note: The FWS office may have modified the Project Name and/or Project Description, so it may be different from what was submitted in your previous request. If the Consultation Code matches, the FWS considers this to be the same project. Contact the office in the 'Provided by' section of your previous Official Species list if you have any questions or concerns.

Endangered Species Act Species List

There are a total of 4 threatened or endangered species on your species list. Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Critical habitats listed under the **Has Critical Habitat** column may or may not lie within your project area. See the **Critical habitats within your project area** section further below for critical habitat that lies within your project. Please contact the designated FWS office if you have questions.

Birds	Status	Has Critical Habitat	Condition(s)
Southwestern Willow flycatcher (<i>Empidonax traillii extimus</i>) Population: Entire	Endangered	Final designated	
Yellow-Billed Cuckoo (<i>Coccyzus americanus</i>) Population: Western U.S. DPS	Threatened	Proposed	
Fishes			
Pahrump poolfish (<i>Empetrichthys latos</i>) Population: Entire	Endangered		
Reptiles			
Desert tortoise (<i>Gopherus agassizii</i>) Population: Entire, except in Sonoran Desert	Threatened	Final designated	

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Critical habitats that lie within your project area

There are no critical habitats within your project area.

Project name: I-515 Charleston Interchange EA

Appendix A: FWS National Wildlife Refuges and Fish Hatcheries

There are no refuges or fish hatcheries within your project area.

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Appendix B: FWS Migratory Birds

The protection of birds is regulated by the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA). Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). The MBTA has no otherwise lawful activities. For more information regarding these Acts see: <http://www.fws.gov/birds/policies-and-regulations/laws-legislations/migratory-bird-treaty-act.php>
<http://www.fws.gov/birds/policies-and-regulations/laws-legislations/bald-and-golden-eagle-protection-act.php>

All project proponents are responsible for complying with the appropriate regulations protecting birds when planning and developing a project. To meet these conservation obligations, proponents should identify potential or existing project-related impacts to migratory birds and their habitat and develop and implement conservation measures that avoid, minimize, or compensate for these impacts. The Service's Birds of Conservation Concern (2008) report identifies species, subspecies, and populations of all migratory nongame birds that, without additional conservation actions, are likely to become listed under the Endangered Species Act as amended (16 U.S.C 1531 et seq.).

For information about Birds of Conservation Concern, go to:

<http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>

For information about conservation measures that help avoid or minimize impacts to birds, please visit:

<http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>

To search and view summaries of year-round bird occurrence data within your project area, go to the Avian Knowledge Network Histogram Tools at:

<http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/akn-histogram-tools.php>

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Migratory birds that may be affected by your project:

There are 22 birds on your migratory bird list. The list may include birds occurring outside this FWS office jurisdiction.

Species Name	Bird of Conservation Concern (BCC)	Seasonal Occurrence in Project Area
Bald eagle (<i>Haliaeetus leucocephalus</i>)	Yes	Wintering
Bell's Vireo (<i>Vireo bellii</i>)	Yes	Breeding
Bendire's Thrasher (<i>Toxostoma bendirei</i>)	Yes	Breeding
Black-chinned Sparrow (<i>Spizella atrogularis</i>)	Yes	Breeding
Brewer's Sparrow (<i>Spizella breweri</i>)	Yes	Year-round
Burrowing Owl (<i>Athene cunicularia</i>)	Yes	Year-round
Cactus Wren (<i>Campylorhynchus brunneicapillus</i>)	Yes	Year-round
Costa's Hummingbird (<i>Calypte costae</i>)	Yes	Breeding
Flammulated owl (<i>Otus flammeolus</i>)	Yes	Breeding
Gray vireo (<i>Vireo vicinior</i>)	Yes	Breeding
Green-tailed Towhee (<i>Pipilo chlorurus</i>)	Yes	Wintering
Le Conte's thrasher (<i>toxostoma lecontei</i>)	Yes	Year-round
Loggerhead Shrike (<i>Lanius ludovicianus</i>)	Yes	Year-round
Long-Billed curlew (<i>Numenius americanus</i>)	Yes	Breeding
Lucy's warbler (<i>Vermivora luciae</i>)	Yes	Breeding

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Peregrine Falcon (<i>Falco peregrinus</i>)	Yes	Year-round
Prairie Falcon (<i>Falco mexicanus</i>)	Yes	Year-round
Sage Thrasher (<i>Oreoscoptes montanus</i>)	Yes	Wintering
Short-eared Owl (<i>Asio flammeus</i>)	Yes	Wintering
Sonoran Yellow Warbler (<i>Dendroica petechia ssp. sonorana</i>)	Yes	Migrating
Swainson's hawk (<i>Buteo swainsoni</i>)	Yes	Breeding
Western grebe (<i>aechmophorus occidentalis</i>)	Yes	Breeding

Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

Appendix C: NWI Wetlands

The U.S. Fish and Wildlife Service is the principal Federal agency that provides information on the extent and status of wetlands in the U.S., via the National Wetlands Inventory Program (NWI). In addition to impacts to wetlands within your immediate project area, wetlands outside of your project area may need to be considered in any evaluation of project impacts, due to the hydrologic nature of wetlands (for example, project activities may affect local hydrology within, and outside of, your immediate project area). It may be helpful to refer to the USFWS National Wetland Inventory website. The designated FWS office can also assist you. Impacts to wetlands and other aquatic habitats from your project may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal Statutes. Project Proponents should discuss the relationship of these requirements to their project with the Regulatory Program of the appropriate U.S. Army Corps of Engineers District.

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery and/or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Exclusions - Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Precautions - Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of

United States Department of Interior
Fish and Wildlife Service

Project name: I-515 Charleston Interchange EA

this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

The following NWI Wetland types intersect your project area in one or more locations. To understand the NWI Classification Code, see <https://ecos.fws.gov/ipac/wetlands/decoder>. To view the National Wetlands Inventory on a map go to <http://www.fws.gov/wetlands/Data/Mapper.html>.

Intent-to-Study
I-515 and Charleston Boulevard Interchange Improvements
Clark County, NV

To Whom It May Concern:

The Nevada Department of Transportation (NDOT), in cooperation with the Federal Highway Administration (FHWA), is proposing to improve traffic operations at the Interstate 515 (I-515) interchange with Charleston Boulevard and along I-515 between Eastern Avenue and Charleston Boulevard. The proposed project will add auxiliary lanes on I-515 between the Eastern Avenue and Charleston Boulevard interchanges, reconstruct the Charleston Boulevard interchange, and widen Charleston Boulevard east of the I-515 interchange. The proposed project will increase safety and improve traffic operations for both current and future traffic needs.

In compliance with the National Environmental Policy Act of 1969 (NEPA), NDOT is initiating the preparation of an Environmental Assessment (EA) to evaluate and document the proposed project's potential impacts. This letter is to inform you of the current study and to solicit your input to assist the project team in further identifying the purpose and need for the project, addressing your concerns about potential impacts, and to inform the project team about potential mitigation measures to consider. Resources addressed include, but are not limited to:

- Access
- Air Quality
- Archeology
- Environmental Justice
- Geology
- Hazardous Materials
- Historic Properties
- Land Use
- Traffic Noise
- Public Parks and Recreation Areas
- Safety
- Socioeconomic Considerations
- Visual Resources
- Water Quality and Hydrology
- Wildlife

A public information meeting will be held on Thursday September 22, 2016, from 4 p.m. to 7 p.m. at the East Las Vegas Community Center, 250 N Eastern Avenue, Las Vegas, NV 89101, to provide information about the project and receive comments from public agencies and groups who have a responsibility for resources in the study area. Also invited are individuals who may be affected by the proposed project or who have an interest in the project. Please see the Transportation Notice (other side) for additional information about the meeting location and format.

Comments or questions regarding the proposed project may be submitted to Richard Splawinski, PE, Project Manager, Nevada Department of Transportation, 1263 South Stewart Street, Carson City, NV 89712, RSplawinski@dot.state.nv.us. Comments or questions may also be e-mailed to info@dot.state.nv.us; please include the project name in the subject line. We appreciate receiving any comments you may have about this project by October 7, 2016.

Sincerely,

Richard Splawinski, PE, NDOT Project Manager

**TRANSPORTATION NOTICE
PUBLIC INFORMATION MEETING
FOR
I-515/CHARLESTON BOULEVARD
INTERCHANGE IMPROVEMENTS**

PURPOSE OF MEETING: The Nevada Department of Transportation (NDOT), in cooperation with the Federal Highway Administration (FHWA), invites you to attend a public information meeting to solicit input for the I-515/Charleston Boulevard Interchange project in Las Vegas. Proposed improvements include auxiliary lanes on I-515 between the Eastern Avenue and Charleston Boulevard interchanges, reconstructing the Charleston Boulevard interchange, and widening Charleston Boulevard east of the I-515 interchange.

In compliance with the National Environmental Policy Act of 1969 (NEPA), NDOT is initiating the preparation of an Environmental Assessment (EA) to evaluate and document the proposed project's potential environmental impacts.

PROJECT BENEFITS: The purpose of the proposed improvements is to increase safety and improve traffic operations for both current and future traffic needs.

WHEN AND WHERE: Thursday, September 22, 2016, 4 – 7 p.m., **PRESENTATION AT 5:30 p.m.** East Las Vegas Community Center, Ballroom, Las Vegas, NV. 250 N Eastern Avenue, Las Vegas.

WHERE YOU COME IN: Members of the public are encouraged to attend at their convenience any time during the meeting hours of 4 to 7 p.m. Project representatives will be on hand to discuss and answer your questions. There will be a brief project presentation at 5:30 p.m., followed by a short question and answer period from the audience. Before and after the presentation, the meeting will be conducted as an open-house format to provide an opportunity to view displays and individually discuss the interchange with project representatives. At the meeting, your comments may be submitted for public record in writing or verbally to a court reporter, who will be available throughout the meeting. In addition to any comments received at the meeting, written or email comments will be accepted through Friday, October 7, 2016. Please email your comments to: info@dot.state.nv.us with a reference to this project in the subject line. You may also mail your comments using the contact information below.

IF RIGHT-OF-WAY IS NEEDED: The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 will govern the acquisition of right-of-way that may be necessary for this project. More detailed information regarding right-of-way can be obtained from the NDOT's Right of Way Division, 1263 S. Stewart St., Carson City, NV 89712, or by calling (775) 888-7480.

CONTACT: Website: www.nevadadot.com
Mail: [Rick Splawinski, PE, Project Manager, 1263 South Stewart Street, Carson City, NV 89712,](mailto:RSplawinski@dot.state.nv.us)
email: RSplawinski@dot.state.nv.us.

SPECIAL ACCOMMODATION REQUESTS: Reasonable efforts will be made to assist and accommodate persons with disabilities desiring to attend the meeting. Requests for auxiliary aids or services to assist individuals with disabilities or limited English proficiency should be made with as much advance notice as possible to Julie Maxey, NDOT Public Hearings Officer at 775-888-7171 or email at jmaxey@dot.state.nv.us.

1 de septiembre del 2016

Estudio Preliminar de Mejoras a la Intersección
I-515 y Charleston Blvd.
Clark County, NV

A Quién Corresponda:

El Departamento de Transporte de Nevada (NDOT) en cooperación con la Administración Federal de Carreteras (FHWA), está proponiendo mejorar las operaciones de tráfico en la intersección entre la Carretera Interestatal 515 y Charleston Blvd. y a lo largo de la I-515 entre Eastern Ave. y Charleston Blvd. Este proyecto propone implementar carriles auxiliares en la I-515 entre la intersección de Eastern Ave. y Charleston Blvd., reconstruir la intersección con Charleston Blvd. Así mismo, ampliar la intersección de Charleston Blvd. al Este de la I-515. Este proyecto también brinda la posibilidad de aumentar la seguridad vial y mejorar las operaciones del tráfico actual y futuro.

De acuerdo con el acto National Environmental Policy Act of 1969 (NEPA), NDOT está iniciando la preparación de un Estudio del Medio Ambiente (EA) para evaluar y documentar los posibles impactos del proyecto que se propone. Esta carta es para informarles del actual estudio y para solicitar su opinión, presentar sus preocupaciones de los posibles impactos y para ayudarle al equipo encargado del proyecto a elaborar a una mejor decisión. Algunos de los puntos importantes que serán discutidos son:

- Acceso
- Calidad del Aire
- Arqueología
- Justicia del Medio Ambiente
- Geología
- Materiales Peligrosos
- Propiedades Históricas
- Uso de la Tierra
- Ruido Ocasionado por Trafico
- Parques Públicos y Áreas de Recreación
- Seguridad
- Consideraciones Socioeconómicas
- Recursos Visuales
- Calidad del Agua e Hidrología
- Fauna Silvestre

El jueves 22 de septiembre de 2016 se llevará a cabo una junta de información pública de 4:00 p.m. a 7:00 p.m. en East Las Vegas Community Center, donde se explicará más afondo el proyecto y se escucharán todas las partes implicadas. También asistirán individuos que pudieran ser afectados por el proyecto o que tienen interés en el mismo. Por favor refiérase al Aviso de Transporte (lado opuesto de esta página) para más información acerca del lugar y formato de la junta.

Favor de enviar sus comentarios o preguntas a Richard Splawinski, PE, Gerente de Proyecto, Departamento de Transporte de Nevada, 1263 South Stewart Street, Carson City NV 89712, RSplawinski@dot.state.nv.us

También puede dirigir sus comentarios y preguntas a info@dot.state.nv.us; incluya el nombre del proyecto en la línea de asunto. De antemano le agradecemos su cooperación enviando sus comentarios relacionados con este proyecto antes del 7 de octubre de 2016.

Atentamente,

Rick Splawinski, PE, NDOT

**AVISO DE TRANSPORTE
JUNTA DE INFORMACIÓN PÚBLICA
DE LAS MEJORAS PARA LA INTERSECCION DE
I-515 / BOULEVARD CHARLESTON**

OBJECTIVO: El Departamento de Transporte de Nevada (NDOT), en cooperación con la Administración Federal de Carreteras (FHWA), le invita a asistir a una reunión de información para solicitar su opinión en el proyecto de la intersección 515/Charleston Boulevard en Las Vegas. La propuesta incluye carriles auxiliares en I-515 entre la intersección de la avenida Eastern y Charleston Boulevard, reconstrucción de la intersección del Boulevard Charleston y la ampliación de Charleston Boulevard al este de la I-515.

De acuerdo con la Política Nacional del Medio Ambiente de 1969 (NEPA), NDOT inicia la preparación de una evaluación ambiental (EA) para evaluar y documentar el posible impacto ambiental del proyecto que se propone.

LOS BENEFICIOS: El propósito de las propuestas es aumentar la seguridad vial y mejorar las operaciones de tráfico tanto en el presente como para el futuro.

LUGAR Y HORA: Martes, 22 de septiembre del 2016, 4pm – 7pm., La presentación inicia a las 5:30pm en East Las Vegas Community Center ubicado en la 250 N Eastern Ave, Las Vegas 89101.

HAZ TU PARTE: Miembros del público son invitados a asistir en cualquier momento durante las horas de 4 p.m. a 7 p.m. Representantes del proyecto estarán presentes para discutir y responder sus preguntas. Habrá una presentación breve del proyecto a las 5:30 p.m., seguida por un corto período de preguntas y respuestas de la audiencia. Antes y después de la presentación, habrá expertos disponibles para responder preguntas individualmente. En la reunión, sus comentarios pueden presentarse por escrito o verbalmente, y serán registrados por un miembro de la corte que estará disponible a lo largo de la reunión. Además de los comentarios recibidos en la reunión, se aceptarán comentarios por escrito o por correo electrónico hasta el viernes 7 de octubre del 2016, a info@dot.state.nv.us, por favor haga referencia a este proyecto en la línea de asunto. También pueden ser mandados por correo a:

1263 S Stewart Street, Carson City, NV 89712

RIGHT-OF-WAY: The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, un acto de asistencia para reubicación y adquisición de bienes raíces regirán la adquisición de tierras para este proyecto. Más información puede obtenerse de la división de Right-of-Way de NDOT, 1263 S. Stewart St., Carson City, NV 89712, o llamando al (775) 888-7480.

CONTACTO: Página Web: www.nevadadot.com
Correo: Rick Splawinski, PE, Project Manager, 1263 S Stewart Street, Carson City, NV 89712
Correo Electrónico: RSplawinski@dot.state.nv.us

PETICIONES ESPECIALES: Se hará un esfuerzo para acomodar a personas con discapacidades o necesidades especiales. Servicios y accesorios para asistir a individuos con dominio limitado del inglés deben de ser solicitados con suficiente tiempo de anticipación. Favor de contactar a Julie Maxey, NDOT funcionario de audiencias públicas en 775-888-7171 o por correo electrónico a jmaxey@dot.state.nv

San Francisco, CA 94105

October 6, 2016

Abdelmoez A. Abdalla
Environmental Program Manager
Federal Highway Administration
705 N. Plaza, Suite 220
Carson City, NV 89701

Subject: Scoping Comments for the I-515/Charleston Boulevard Interchange project in Las Vegas, Clark County, Nevada

Dear Mr. Abdalla:

The United States Environmental Protection Agency (EPA) has reviewed the Scoping Notice for the Draft Environmental Assessment (EA) for the I-515/Charleston Boulevard Interchange project in Las Vegas, Clark County, Nevada.

EPA understands that this project is one portion of the previous I-515 project that EPA provided scoping comments for in 2005. Our attached scoping comments are provided pursuant to the National Environmental Policy Act (NEPA), Council on Environmental Quality (CEQ) regulations (40 CFR Parts 1500-1508) and Section 309 of the Clean Air Act.

EPA appreciates the opportunity to provide scoping comments on this Draft EA. When the Draft EA is available, please send one copy to our office at the address above (Mail Code ENF-4-2). If you have any questions, please contact me at lowe.debbie@epa.gov or (415) 947-4155.

Sincerely,

A handwritten signature in black ink, appearing to read "Debbie Lowe Liang".

Debbie Lowe Liang
Environmental Review Section

Enclosures: EPA's Scoping Comments

cc: Rick Splawinski, NDOT

Purpose and Need

The Purpose and Need statement is an important explanation of the “underlying purpose and need to which the Lead Agency is responding in proposing the alternatives, including the proposed action.” (40 CFR 1502.13). The Draft Environmental Assessment (EA) for the proposed project is an opportunity to clearly explain the circumstances that are leading the Federal Highway Administration (FHWA) and the Nevada Department of Transportation (NDOT) to consider the project, and the Purpose and Need statement is the basis for considering the Alternatives proposed.

Recommendations:

- The purpose and need statement should focus on the desired outcomes of the project (to relieve congestion or improve traffic operations, for example) rather than methods to address the desired outcomes (increase capacity, for example).
- Models used to estimate regional traffic congestion, population growth, travel-demand and land-use forecasting should be clearly presented in the Draft EA.
- The Draft EA should also incorporate estimates of the magnitude of induced travel into the travel demand modeling and impact analysis.

Mobile Source Air Toxics

Mobile source air toxics (MSATs) have been and continue to be a topic of discussion between EPA and FHWA, at both the regional and national level. EPA has a particular interest in MSAT impacts in the Las Vegas area due to the proximity of highway expansion projects to sensitive receptors, and the fact that MSAT concerns have been raised in the past for other projects.

MSAT impacts were the primary concern of the Sierra Club in its legal challenge to a US 95 widening project in Las Vegas (*Sierra Club v. Mineta*, D. Nev., No. CV-S-02-0578-PMP-RJJ, settlement announced 6/27/05). The settlement agreement in this case required FHWA and NDOT to install air pollution monitoring and filtration systems at three schools adjacent to US 95, relocate portable school buildings and playgrounds, help redesign a nearby high school to minimize exposures, and retrofit diesel school buses to reduce emissions. In addition, Sonoma Technology, Inc. (STI) prepared a case study of the US 95 project to assist FHWA in better understanding the contributions of on-road mobile sources to air toxics problems at the regional and local, or "hotspot," scale.

Given the highly developed nature of the project area and the existence of both residential and commercial property adjacent to the corridor, it is likely that there are sensitive receptors close enough to the roadway to experience MSAT impacts. Many studies have measured elevated concentrations of pollutants emitted directly by motor vehicles near large roadways. These elevated concentrations generally occur within approximately 200 meters of the road, although the distance may vary depending on traffic and environmental conditions. A large number of recent studies have examined the association between living near major roads and various adverse health endpoints. Several well-conducted epidemiologic studies have shown associations with cardiovascular effects, premature adult mortality, and adverse birth outcomes,

including low birth weight and size. Traffic-related pollutants have been repeatedly associated with increased prevalence of asthma-related respiratory symptoms in children.

For most transportation projects, EPA recommends that the following levels of MSAT analysis be considered (in order of increasing complexity):

1. Qualitative discussion,
2. Quantify emissions,
3. Toxicity-weight emissions,
4. Dispersion modeling, and
5. Risk assessment.

While this project as proposed is of a smaller scale than other recent projects in the Las Vegas area for which EPA recommended MSAT analyses, EPA remains concerned about potential MSAT impacts. The project is in close proximity to residences and other sensitive receptors; and there is an increasing public awareness of air quality impacts associated with transportation projects. We recommend that NDOT and FHWA perform a MSAT analysis to determine potential localized impacts to sensitive receptors, given the strong scientific evidence that mobile-source related pollutant concentrations are significantly higher in close proximity to roadways.

Recommendations:

- The Draft EA should contain the following:
 - A summary of the key findings of the US 95 case study¹ and other relevant studies and a discussion of how the findings relate to this project;
 - A map indicating the location of residences and sensitive receptors in close proximity to the project (for example, within 1,000 feet);
 - Analysis of MSAT emissions to determine potential exposure for the identified residences and sensitive receptors; and
 - Specific mitigation measures for any impacts to each sensitive receptor location identified.

Construction Impacts

In order to mitigate impacts to nearby communities and the environment during construction activities, EPA recommends consideration of the below measures in the Draft EA.

Recommendations:

- Consider including the following mitigation measures to reduce adverse effects during construction of the project:
 - Reduce use, trips, and unnecessary idling from heavy equipment;
 - Maintain and tune engines per manufacturers' specifications to perform at EPA certification levels and to perform at verified standards applicable to retrofit technologies. Employ periodic, unscheduled inspections to limit unnecessary

¹http://www.fhwa.dot.gov/Environment/air_quality/air_toxics/research_and_analysis/us_95_nevada_case_study/us95nv00.cfm#es

- idling and to ensure that construction equipment is properly maintained, tuned, and modified consistent with established specifications;
- Prohibit any tampering with engines and require continuing adherence to manufacturers' recommendations;
- Solicit construction bids that include use of energy and fuel-efficient fleets;
- Solicit construction bids that use BACT, particularly those seeking to deploy zero-emission technologies;
- Employ the use of alternative fueled vehicles;
- Use lighting systems that are energy efficient, such as LED technology;
- Use the minimum amount of greenhouse gas (GHG)-emitting construction materials that is feasible;
- Use cement blended with the maximum feasible amount of alternative materials (industrial materials designated for re-use, for example) that reduce GHG emissions from cement production;
- Use lighter-colored pavement where feasible;
- Recycle construction debris to maximum extent feasible;
- Plant shade trees in or near construction projects where feasible;
- Use grid-based electricity for construction activities and/or onsite renewable electricity generation rather than diesel and/or gasoline powered generators; and
- Identify sensitive receptors in the project area, such as children, elderly, and infirm, and specify the means by which you will minimize impacts to these populations. For example, locate construction equipment and staging zones away from sensitive receptors and fresh air intakes to buildings and air conditioners.

Children's Environmental Health

Executive Order 13045 on Children's Health and Safety directs each Federal agency, to the extent permitted by law, to make it a high priority to identify and assess environmental health and safety risks that may disproportionately affect children, and to ensure that its policies, programs, activities, and standards address these risks. Analysis and disclosure of these potential effects under NEPA is necessary because some physiological and behavioral traits of children render them more susceptible and vulnerable than adults to environmental health and safety risks. The Draft EA should describe the potential direct, indirect, and cumulative impacts of the project on children's health. Because children spend an average of 35% of their time at schools, EPA recommends consideration of school-related mitigation measures, in addition to other mitigation measures that may reduce impacts to children.

Recommendations:

- Include in the Draft EA a discussion of the potential direct, indirect, and cumulative project impacts on children's health. Please consider the following for this discussion:
 - Information on childhood asthma rates and other relevant health data if available;
 - Potential respiratory impacts, including asthma, from construction activities and increased traffic flow;
 - Potential noise impacts to health and learning, especially near schools, homes, and childcare centers; and
 - Sensitive receptors should include public schools, private schools, charter schools, preschools, community centers and childcare centers.

- EPA recommends that FHWA and NDOT consider as a mitigation measure engaging schools most impacted by the proposed project in outreach around EPA’s *Best Practices for Reducing Near-Roadway Exposure at Schools* guidance document² and the *Tools for Schools* Indoor Air Quality program³. The recommendations for schools seeking to reduce students’ exposure could be tiered to fit budgets of varying sizes.
 - As part of this mitigation measure, EPA recommends FHWA and NDOT prioritize outreach on reducing exposure to schools most affected by the project. Factors to consider in prioritization include whether a school is within 500 feet of the roadway expansion, whether sound walls or vegetative barriers are present, ability of the school’s HVAC system to filter out pollutants and the number of students on free or reduced lunch. The installation of high performance air filtration systems in classrooms has been shown to reduce concentrations of black carbon and PM_{2.5} by up to 96%⁴. This mitigation measure should be shared with schools concerned about near-roadway pollution impacts.
 - Consider the potential for trees to reduce near-roadway air pollution when selecting trees for mitigation or replacement. EPA’s *Best Practices for Reducing Near-Road Pollution Exposure at Schools* provides some initial guidance on choosing vegetation to maximize reduction of near-roadway air pollution, and EPA would be happy to engage in discussions with FHWA and NDOT staff to provide additional guidance on this topic.

Environmental Justice

Executive Order 12898 addresses Environmental Justice (EJ) in minority and low income populations. The recently released *Promising Practices for Environmental Justice Methodologies in NEPA Reviews* (March 2016) is a compilation of methodologies from current agency practices identified by the NEPA Committee of the Federal Interagency Working Group on Environmental Justice. The document focuses on the interface of environmental justice considerations through NEPA processes and provides recommendations on applying EJ methodologies that have been established in federal NEPA practice.

Recommendation:

- FHWA and NDOT should consider *Promising Practices for EJ Methodologies in NEPA Reviews* when developing the EJ section of the Draft EA.
- The Draft EA should include a description of the area of potential impact used for the environmental justice impact analysis and provide the source of the demographic information utilized.
- The Draft EA should identify whether the proposed project may disproportionately and adversely affect low income or minority populations in the surrounding area and should provide appropriate mitigation measures for any adverse impacts.

Climate Change

Several federal climate change information resources have been published that can inform the Draft EA's description of the affected environment and related decisions. The National Climate Assessment (NCA)⁵ is a federal information resource on emerging climate science to inform government decision making. The NCA details observed and projected climate change for our nation, and our Southwest region. The NCA indicates that climate change could result in Nevada experiencing poor air quality; more severe heat; increased wildfires; shifting vegetation; declining forest productivity; decreased Spring snowpack; water shortages and prolonged drought; potential reduction in hydropower; and loss in winter recreation.

On August 2, 2016, the Council on Environmental Quality (CEQ) released final guidance for Federal agencies on how to consider the impacts of their actions on climate change in their NEPA reviews. This guidance explains that agencies should consider both the potential effects of a proposed action on climate change, as indicated by its estimated greenhouse gas (GHG) emissions, and the implications of climate change for the environmental effects of a proposed action.

CEQ recognizes that many agency NEPA analyses to date have concluded that GHG emissions from an individual agency action will have small, if any, potential climate change effects. Government action occurs incrementally, program-by-program and step-by-step, and climate impacts are not attributable to any single action, but are exacerbated by a series of smaller decisions, including decisions made by the government. Therefore, the statement that emissions from a government action or approval represents only a small fraction of global emissions is more a statement about the nature of the climate change challenge, and is not an appropriate basis for deciding whether to consider climate impacts under NEPA. Moreover, these comparisons are not an appropriate method for characterizing the potential impacts associated with a proposed action and its alternatives and mitigations.⁶

CEQ also suggests that if an agency determines that evaluating the effects of GHG emissions would not be useful in the decision making process and to the public to distinguish between the proposed action, alternatives and mitigations, the agency should document the rationale for that determination.

Recommendations:

- EPA recommends that FHWA and NDOT review and incorporate the findings and forecasts from the National Climate Assessment and other available information resources in a climate analysis in the Draft EA for the proposed project.
- The Draft EA should include a climate analysis that is consistent with the CEQ guidance. The climate analysis should consider how climate change could affect the project area, specifically within sensitive areas, and assess how the projected impacts of the project could be exacerbated by climate change.

Stormwater

Polluted stormwater runoff is commonly transported through municipal separate storm sewer system (MS4s) and ultimately discharged untreated into local rivers, lakes, and streams. Roads and highways discharge metals, phosphorous, nitrogen, sediment, suspended particles, grease, and salt. Urban roadways also discharge trash and significant amounts of bacteria. Illicit discharges can enter the MS4 through direct connections (e.g., wastewater piping either mistakenly or deliberately connected to the MS4) or indirect connections (e.g., infiltration into the MS4, spills collected by storm drains, or paint or used oil dumped directly into a storm drain). The result is untreated discharges that contribute high levels of pollutants, including heavy metals, toxics, oil and grease, solvents, nutrients, viruses, and bacteria to receiving waters.

When discharged into nearby waterways through MS4s, these pollutants can degrade water quality, thereby discouraging recreational uses, contaminating drinking water supplies, and adversely impacting fish and other wildlife. In addition, an increase in the amount of impervious surfaces (e.g., new or widened roads) resulting from new development can impact waterbodies by increasing the quantity and velocity of water delivered to the waterbodies during storms. This can result in streambank scouring and erosion and downstream flooding which can harm aquatic life and damage property.

The stormwater National Pollutant Discharge Elimination System (NPDES) permit program requires certain municipalities to develop and implement a program to protect local waterways by reducing the amount of pollutants that stormwater runoff and melting snow pick up and carry into storm sewer systems. The City of Las Vegas and NDOT are each authorized under a NPDES permit to discharge stormwater to waters of the United States through its MS4 provided it complies with all provisions of the permit. The NPDES permits require Las Vegas and NDOT to implement controls to minimize the discharge of pollutants during construction. In addition, Las Vegas and NDOT must implement controls to minimize discharge from areas of new development or redevelopment through various practices, including the use of infiltration or other low-impact design practices.

On July 28, 2016, The U.S. Department of Justice (DOJ), EPA, and the Nevada Department of Environmental Protection (NDEP) reached an agreement with NDOT to resolve alleged violations of NDOT's stormwater permit. All stormwater management activities related to this project should be consistent with the terms of that agreement.

Recommendations:

- The Draft EA should address techniques proposed for minimizing the discharge of pollutants to surface water from construction activities and as well as from the increase in impervious surfaces, consistent with the NPDES permits. Where the proposed project will widen existing roads, realign existing roads, and build new interchanges, FHWA and NDOT should implement new structures or redesign existing structures to ensure that they are effective in reducing the discharge of pollutants.
- The Draft EA should briefly discuss the July 28, 2016 settlement between DOJ, EPA, NDEP and NDOT and how the stormwater management activities related to this project will comply with that settlement.

Cumulative Impact Analysis

Cumulative impacts are defined in CEQ's NEPA regulations as the impact on the environment that results from the incremental impact of the action when added to the other past, present, and reasonably foreseeable future actions, regardless of what agency (Federal or non-Federal) or person undertakes such actions (40 CFR 1508.7). These actions include both transportation and non-transportation activities. The cumulative impact analysis should consider non-transportation projects such as large-scale developments and approved urban planning projects that are reasonably foreseeable and are identified within city and county planning documents.

The cumulative impact analysis should describe the "identifiable present effects" to various resources attributed to past actions. The purpose of considering past actions is to determine the current health of resources. This information forms the baseline for assessing potential cumulative impacts and can be used to develop cooperative strategies for resources protection (CEQ's Forty Most Frequently Asked Questions #19).

Recommendation:

- The Draft EA should include a cumulative impact assessment which should provide a complete list of reasonably foreseeable actions, including non-transportation projects.

City of Las Vegas Meeting Summary – November 16, 2016

Attendees: Rick Splawinski, Jack Sjostrom, Mike Janssen, Joanna Wadsworth

Discussion record: CA Group and NDOT met with the City of Las Vegas to review and discuss the current status of the I-515/Charleston Environmental Assessment (EA) alternatives development. CA Group had previously requested the meeting, asking that the following things be considered during and after the discussion.

1. What comments do you have on the alternatives, if any?
2. Do you have a preference for any of the alternatives?
3. What issues do you perceive with any of the alternatives?
4. What additional alternatives do you think should be considered?
5. What other comments/questions do you have?

Jack briefly presented the public meeting materials, and the alternatives that are under consideration. The final selection of the preferred alternative has not been made, and NDOT desires input from the City on the alternatives developed and possible other alternatives. It was noted that there is another separate NDOT study, the I-515 Alternatives Development Study, which is considering additional improvements to I-515 between the Spaghetti Bowl and Charleston Boulevard. If advanced to construction, some of the improvements under consideration would physically overlap and require integration with the Charleston interchange project. However, the Charleston Boulevard interchange improvements and any subsequent projects are planned to be environmentally cleared as separate projects.

The alternatives discussed and points made for each alternative are as follows.

Charleston Alternatives:

The City mentioned that its Lamb intersection and bus turn outs project will be complete soon, noting that there will be a small gap between their project and the Charleston interchange, between Lamb and Sacramento.

- Diverging Diamond Interchange (DDI): The City was familiar with the Charleston alternatives based on their previous interchange feasibility study. Minor revisions were discussed, including widening to 12-foot lanes. The City standard for through lanes is 11-foot, and the City asked that the project consider using narrower lane widths to reduce impacts and maintain continuity with adjacent legs of Charleston. Mike noted that the City has used 10-foot lanes in some locations to provide more room for bicycle lanes. Charleston does not currently have and is not planned to add bike lanes, however, reducing lane widths could save 6 to 8 feet of required R/W. This applies to both Charleston interchange alternatives.
- Tight Diamond Interchange (TDI): The City reiterated its preference for the TDI compared to the DDI for reasons of pedestrian familiarity and safety. The concern is related to requiring pedestrians to cross unsignalized ramp entrance lanes, as well as unfamiliar pedestrian routes if the pedestrians were to be routed into the median through the DDI.

I-515 Alternatives:

- Symmetric Widening: The City had minimal comments to the symmetric widening. It was noted that the symmetric widening would have impacts to the southern I-515 R/W.
- North Shift: The City had minimal comments to the north shift, noting that it had a minimal R/W impact compared to the symmetric widening.
- South Shift: The south shift was presented noting that the alternative had the most severe impact to adjacent R/W on the south side. The City stated that even though there were greater initial impacts, it seemed like the south shift would best accommodate a future interchange at Pecos, as it reserves the additional room on the north side of the existing R/W for development of a future interchange. The City may prefer the south shift for this reason.
- Reduced shoulders: The City had minimal comments to the reduced shoulder widening, noting that it might be a good option for a temporary situation.

Mike reiterated the City's position regarding the future Pecos interchange, stating that providing a new access point to I-515 between Eastern and Charleston was one of the City's top priorities, and obtaining the necessary R/W for the future project now might be an efficient overall approach. Lastly, Mike asked why the I-515 auxiliary lanes and future Pecos Interchange weren't being evaluated together, along with the other alternatives being considered by the I-515 Alternatives Development Study. Rick explained that the Charleston interchange project with the related I-515 auxiliary lanes would be designed considering the potential future improvements, but each project would be environmentally cleared separately. This approach avoids the need for NDOT to financially program all of the projects at one time. Jack explained that the alternatives for this project are being coordinated directly with the I-515 Alternatives Development Study's concepts, such that this project will not preclude or cause those future concepts to become unfeasible.

Rick requested that the City write a letter providing feedback on any or all of the five questions/discussion points from the meeting request, and any additional input based on the discussions from this meeting.

RTC Meeting Summary – November 16, 2016

Attendees: Rick Splawinski, Jack Sjostrom, John Penuelas (JP), Dante Bongolan, Nathan Goldberg

Discussion record: CA Group and NDOT met with the Regional Transportation Commission (RTC) to review and discuss the current status of the I-515/Charleston Environmental Assessment (EA) alternatives development. CA Group had previously requested the meeting, asking that the following things be considered during and after the discussion.

1. What comments do you have on the alternatives, if any?
2. Do you have a preference for any of the alternatives?
3. What issues do you perceive with any of the alternatives?
4. What additional alternatives do you think should be considered?
5. What other comments/questions do you have?

Jack briefly presented the public meeting materials, and the alternatives that are under consideration. The final selection of the preferred alternative has not been made, and NDOT desires input from the RTC on the alternatives developed and possible other alternatives. It was noted that there is another separate NDOT study, the I-515 Alternatives Development Study, which is considering additional improvements to I-515 between the Spaghetti Bowl and Charleston Boulevard. If advanced to construction, some of the I-515 improvements under consideration would physically overlap and require integration with the Charleston interchange project. However, Charleston Boulevard itself would not be impacted by the other projects under consideration.

The alternatives discussed and points made for each alternative were as follows.

Charleston Alternatives:

The RTC was chiefly interested in the Charleston improvements, as there are four bus stops within the proposed alternative improvement limits, and Route 206 makes stops every 15 minutes along the corridor. It may be desirable for the RTC to approach the property owners at the Woodbury Medical Center and the AM/PM gas station to request additional easement or R/W behind the back of sidewalk for set-back benches or bus stop shelters. This will be coordinated further during alternatives development.

- **Diverging Diamond Interchange (DDI):** The RTC did not have many comments related to the DDI configuration, noting that the operation of the DDI would not impact its bus routes or schedules. However, the position of the bus stop at the AM/PM gas station west of the interchange would place a stopped bus in the same lane as a dedicated free right turn lane from the southbound I-515 exit ramp. RTC requested that impacts to the bus stop locations be reviewed, even if there are no immediate solutions. This will be coordinated further with RTC during alternatives development.
- **Tight Diamond Interchange (TDI):** Similar to the DDI, there were not many RTC comments related specifically to the TDI, with the exception of impacts to the bus stop locations. The RTC requested that consideration be given to the stop locations, including combining the westbound stop at the Woodbury Medical Center with the Center's entrance driveway. RTC would provide details for the stop configuration during alternatives development.

I-515 Alternatives:

- Symmetric Widening: The RTC had minimal comments regarding the symmetric widening. It was noted that the symmetric widening would have impacts to the southern I-515 R/W.
- North Shift: The RTC had minimal comments regarding the north shift, noting that it had minimal R/W impacts compared to the symmetric widening.
- South Shift: The RTC also had minimal comments regarding the south shift, noting that this alternative had the most severe impacts to adjacent R/W on the south side.
- Reduced Shoulders: The RTC had minimal comments regarding the reduced shoulder widening.

JP asked how the I-515 auxiliary lanes and the other I-515 Alternatives Development Study alternatives were related and how they were being evaluated. Rick explained that the Charleston interchange and the I-515 auxiliary lanes were being advanced under a separate Environmental Assessment, but that the Charleston interchange project would be designed considering the potential future improvements. Jack explained that the alternatives for this project are being coordinated directly with the I-515 Alternatives Development Study's concepts, such that this project will not preclude or cause those future concepts to become unfeasible.

Rick requested that the RTC write a letter providing feedback on any or all of the five questions/discussion points from the meeting request, and any additional input based on the discussions from this meeting.

STATE OF NEVADA

Administrator

21 November 2016

Ryan Pitts
Horrocks Engineers
2162 W. Grove Parkway, Ste. 400
Pleasant Grove, UT 84062

RE: Data request received 16 November 2016

Dear Mr. Pitts:

We are pleased to provide the information you requested on endangered, threatened, candidate, and/or At Risk plant and animal taxa recorded within or near the I-515; Charleston Blvd. EA Project area in Clark County. We searched our database and maps for the following, a 2 kilometer radius around:

Township 20S Range 61E Sections 36
Township 20S Range 62E Sections 31 and 32
Township 21S Range 62E Sections 05 and 06

There are no at risk taxa recorded within the given area. However, habitat may be available for: the hoary bat, *Lasiurus cinereus*, a Nevada Bureau of Land Management (BLM) Sensitive Species; the Mojave desert tortoise, *Gopherus agassizii*, a Federally Threatened Taxon; and the spotted bat, *Euderma maculatum*, a Nevada BLM Sensitive Species. The Nevada Department of Wildlife (NDOW) manages, protects, and restores Nevada's wildlife resources and associated habitat. Please contact Bonnie Weller, NDOW GIS biologist (775) 688-1439 to obtain further information regarding wildlife resources within and near your area of interest. Removal or destruction of state protected flora species requires a special permit from Nevada Division of Forestry (NRS 527.270).

Please note that our data are dependent on the research and observations of many individuals and organizations and in most cases are not the result of comprehensive or site-specific field surveys. Natural Heritage reports should never be regarded as final statements on the taxa or areas being considered, nor should they be substituted for on-site surveys required for environmental assessments.

Thank you for checking with our program. Please contact us for additional information or further assistance.

Sincerely,

Eric S. Miskow
Biologist/Data Manager

**NDOT Public Information Meeting
I-515/Charleston Boulevard
November 28, 2016**

Attendees:

Amparo Gamazo	SNRHA
Dwayne Alexander	SNRHA
Olga Olmeda	Cornerstone Residential
Lisa Lynn	Cornerstone Residential
Melanie Brand	SNRHA
Ed Medina	SNRHA
Karen Gratopp	SNRHA
Deena Williams	SNRHA
Jack Sjostrom	CA Group

Discussion Record:

CA Group met with the Southern Nevada Regional Housing Authority (SNRHA) to review and discuss the current status of the I-515/Charleston Environmental Assessment (EA) alternatives development. CA Group had previously requested the meeting, offering to inform the SNRHA about the project. He noted that Rick was unable to attend but would be the main point of contact going forward if there were any questions or concerns.

Jack briefly presented the public meeting materials, and the alternatives that are under consideration. The final selection of the preferred alternative has not been made, and NDOT desires input from the SNRHA on the alternatives developed and possible other alternatives. It was noted that there is another separate NDOT study, the I-515 Alternatives Development Study, which is considering additional improvements to I-515 between the Spaghetti Bowl and Charleston Boulevard. If advanced to construction, some of the I-515 improvements under consideration would physically overlap and require integration with the Charleston interchange project. However, Charleston Boulevard itself would not be impacted by the other projects under consideration.

The alternatives discussed and points made for each were as follows.

Charleston Alternatives:

The SNRHA was chiefly interested in the Charleston improvements to the west of the interchange, specifically adjoining the parcel to the northwest corner. This parcel has a potential developer looking at it for improvement. It was discussed that there would be minimal to no impact to this parcel. It was also discussed that both Charleston alternatives could impact properties to the northeast quadrant of the interchange. This will be coordinated further during alternatives development.

- **Diverging Diamond Interchange (DDI):** The SNRHA was interested in the DDI configuration, specifically related to its operation and safety, and the progress of pedestrians through the free-turning movements. Jack explained that the alternatives selection process would consider these factors, and asked that any comments to the alternatives be documented and returned to Jack and Rick. He also used Google Earth and the SNRHA's smart screen to show examples of other DDIs that are currently in operation.

- **Tight Diamond Interchange (TDI):** The group reviewed the TDI, noting its widened right-of-way (R/W) and number of lanes for each direction of travel. Jack explained the differences between the existing interchange, the TDI interchange, and the DDI interchange configuration. It was discussed that this alternative would provide better pathways for pedestrians compared to the DDI. It was also discussed that there were a lot of panhandlers and handicapped pedestrians that loiter in and around the interchange.

I-515 Alternatives:

Jack presented each of the I-515 alternatives, noting the differences and possible impacts each would have to NDOT's R/W.

- **Symmetric Widening:** It was noted that there may be a minor potential impact to the SNRHA property at the southbound exit ramp gore if symmetrically widened.
- **North Shift:** It was noted that the north shift had no potential impacts to SNRHA properties, but reduced the space within NDOT R/W to the north.
- **South Shift:** It was noted that a southerly shift would potentially impact the SNHRA property on Manisa Circle.
- **Reduced Shoulders:** It was noted that reduction of the shoulders could result in the increase of accidents on I515. It was also discussed that this alternative would offer a good use of funds today, if it's planned to widen I-515 more in the future.

At the close of the meeting, Jack asked that the attendees prepare responses to the following questions in order to record their thoughts on the alternatives, as well as to document any comments or ideas that they had.

1. What comments do you have on the alternatives, if any?
2. Do you have a preference for any of the alternatives?
3. What issues do you perceive with any of the alternatives?
4. What additional alternatives do you think should be considered?
5. What other comments/questions do you have?

After the meeting, Melanie sent an email with the questions and provided a deadline for return of comments/ideas of December 5 to the group (attached). Jack provided a reply with a link to the project's website on nevadadot.com.

Subject: NDOT/CA GROUP CHARLESTON/I95 INTERCHANGE
Date: Monday, November 28, 2016 2:45:41 PM
Attachments: [image002.png](#)

Jack Sjostrom, with CA Group, an NDOT consultant, presented several alternatives of NDOT's intention to increase lanes on the I95 between Eastern and Charleston Boulevards. This improvement could potentially affect our property on Honolulu and Charleston known as Otto Merida Desert Villas. After our meeting this morning with Jack, we were asked if we could provide any suggestions regarding the proposed interchange improvements. Below are some questions posed by CA Group:

- 1) What comments do you have on the alternatives, if any?
- 2) Do you have a preference for any of the alternatives?
- 3) What issues do you perceive with any of the alternatives?
- 4) What additional alternatives do you think should be considered?
- 5) What other comments/questions do you have?

Please provide your response to this request **by Monday, December 5th**. If you have any questions, you can contact Jack directly at 702.685.5945 or via email.

Thank you,

Re: Section 106 consultation with the Nevada Department of Transportation for I-515 to Charleston Boulevard project, CM-0159(013)/NDOT CL16-020, Las Vegas, Clark County, Nevada (UT 2017-4799)

Dear Ms. Thomas,

The Nevada State Historic Preservation Office (SHPO) has reviewed the subject documents received February 28, 2017 in accordance with the *2014 Federal-aid Transportation Programmatic Agreement (PA) and accompanying NDOT Cultural Resources Handbook (Handbook)*. The Nevada Department of Transportation (NDOT) is coordinating this review on behalf of the Federal Highway Administration.

Project Description

The proposed undertaking will widen Charleston Boulevard between I-515 and Lamb Boulevard, add auxiliary lanes to I-515 between Charleston Boulevard and Eastern Avenue, add extra lanes to the ramps at the Charleston Boulevard/I-515 interchange, add lanes for right turns, and add triple left-turn lanes. Four or five takes are anticipated at the northeast corner of I-515 and Charleston Boulevard. Existing noise walls will remain in place, with the possible exception of the wall near the Pecos Park trailer park, which may need to be moved. The project does not involve new lights, ITS poles, or other vertical elements.

Area of Potential Effect (APE)

The Direct APE was developed in consultation with SHPO in August 2016 and includes:

- the right-of-way (ROW) of I-515 between Eastern Avenue and Wyoming Avenue, including 30 additional feet beyond the ROW at the Pecos Park trailer park;
- the Charleston Boulevard corridor between Pecos Street and Lamb Boulevard, extending various distances beyond the ROW depending on the work planned in each location.

The Direct APE is approximately 113 acres in size and accounts for all ground disturbance, construction, and staging activities.

The Indirect APE was also developed in consultation with SHPO in August 2016. It is an irregular area extending beyond the Direct APE in several locations. Visual effects are expected to be minimal as the line of sight is generally blocked by existing interstate noise walls.

The entire APE is 182 acres in size. The SHPO concurs with the adequacy of the APE for this undertaking.

Identification and Evaluation of Historic Properties

NDOT conducted background investigations and determined that no previously-identified cultural or historic resources are located in the APE.

Archaeology

The direct APE, approximately 113 acres, was intensively surveyed for cultural resources. This cultural inventory did not result in the identification of archaeological resources within the established direct APE.

Architecture

Thirty-three resources in the APE were determined to have been constructed in or before 1975; that date was used with the assumption that the undertaking may not be complete until 2025. All 33 resources were surveyed. Resources along Charleston Boulevard and adjacent streets were recorded via a pedestrian survey. A windshield survey was conducted along areas of I-515 where the APE does not extend beyond the ROW.

NDOT has submitted a report entitled *A Class II Architectural Survey for the I-515 to Charleston Boulevard Project* (dated February 13, 2017) and Architectural Resource Forms for all 33 resources. The 33 resources were evaluated for integrity and National Register of Historic Places (NRHP) eligibility as individuals and as possible members of a historic district. NDOT has determined that none of the 33 resources are NRHP eligible under any criteria. Due to the lack of architectural distinction or historic significance and the poor integrity of many of the resources, the SHPO concurs that the 33 surveyed resources are not NRHP-eligible.

Native American Consultation

The SHPO acknowledges receipt of documentation that consultation with the affected Native American tribes has been concluded per Stipulation III of the PA. This consultation did not result in the identification of properties of religious and/or cultural significance that could be affected by the undertaking.

Local Government Consultation

The SHPO acknowledges receipt of documentation that consultation with the City of Las Vegas has occurred. If this consultation should result in the identification of properties of historic or cultural significance that could be affected by this undertaking, please resume coordination with our office.

Determination of Effect

NDOT has determined that there will be **No Historic Properties Affected** by the undertaking. The SHPO concurs.

Unanticipated Discovery

If any buried and/or previously unidentified resources are located during the project activities, the SHPO recommends that all work in the vicinity of the find cease and this office be contacted for additional consultation per Stipulations VII and VIII of the PA.

Robin K. Reed
Deputy State Historic Preservation Officer

22429 &
22430

Meeting with Southern Nevada Regional Housing Authority (SNRHA)
September 22, 2017 11:30 AM (PST)
SNRHA Office: 340 N 11th St, Las Vegas, NV 89101
Call-in Number: 1 (646) 749-3122 / Access Code: 294-747-005

I) Introductions/Attendance

Melanie Brand (MB), SNRHA
Frank Stafford (FS), SNRHA
Rick Splawinski (RS), NDOT
Kevin Swinehart (KS), NDOT
Tom Perez (TP), NDOT
Sriram Bala (SB), CA Group
Dev Sharma (DS), CA Group
Ben Goldsworthy (BG), CH2M
Kyle Kubovchik (KK), Horrocks

RS (NDOT) briefly explained the scope of the project. He also informed the group about the original project schedule delay by approximately one year due to regional air quality modeling updates. NEPA clearance is anticipated in late 2018 and right-of-way acquisition will begin in late 2019.

II) Meeting Goals/Objectives

Schedule Update

Construction for Charleston Blvd is scheduled to begin in 2021.

Project Configuration (Preferred Alternative) update

RS (NDOT) provided a brief overview and update of the project scope:

- Tight diamond interchange at I-515 and Charleston
- Auxiliary lanes between Charleston and Eastern Avenue
- Dual-lane exit ramps at Charleston and northbound at Eastern
- Bridge widenings at Mojave, Pecos, and Stewart

Discuss proposed improvements. Share questions/concerns.

RS (NDOT) provided information about how the SNRHA property will be affected (exhibit attached - sidewalk reconstruction along Charleston Boulevard with no driveway access).

- **Driveway**

On the south side of the property, there will be sidewalk reconstruction without access. However, NDOT recognizes the need to provide a replacement for the existing driveway. Discussion ensued regarding where to reconstruct access. Two possible locations for the new driveway were discussed (west and north sides of the parcel), with the west location onto Honolulu Street identified as the most desirable location.

- **Fencing**

The fence gate on the south side must be removed, and new fencing is required to close the gap. On the west side, a new gate in the fence will be required at the new driveway location.

The offer for acquisition will include an amount to restore the affected portions of fencing. If a section of fence is replaced by the NDOT contractor, however, the NDOT offer will not include compensation for this portion of new fence. See attachment AI (b).

- **Temporary Construction Easement (TCE)**

TCE will be required on the south side of the property, for which NDOT will provide compensation to SNRHA. This TCE will be for performing tasks such as removal of existing fence/gate and removal of the existing driveway, and possibly installing new fence to close the gap.

- **Permit to Construct (PTC) Agreement**

As explained by KS (NDOT), construction of the new drive access on Honolulu Street would be performed under a Permit to Construct (PTC) agreement, rather than a TCE. No compensation would be provided for the PTC; if the owner does not sign the agreement, the project would continue but without the work covered by the PTC.

III) Other Discussion

- There will be no impacts on the east side of the parcel.
- There will be no improvements along North Honolulu Street as part of this project.

IV) Action Items

- a. CA Group to add a driveway in the plans providing access to Honolulu St. SNRHA to provide feedback on the location of the new driveway.
- b. NDOT R/W and CA Group to research the provisions for fencing and inform SNRHA whether NDOT will build the new fence/gate or compensate SNRHA for the construction cost.

STEVE SISOLAK
Governor

STATE OF NEVADA

Carolyn Mulvihill
Environmental Review Section
United States Environmental Protection Agency – Region IX
75 Hawthorne Street
San Francisco, CA 94105

RE: I-515/Charleston Boulevard Interchange Project in Las Vegas, Clark County, Nevada – EPA Scoping Comments

Dear Ms. Mulvihill:

The Nevada Department of Transportation (NDOT), in cooperation with the Federal Highway Administration (FHWA), is advancing a project to improve traffic operations at the Interstate 515 interchange with Charleston Boulevard and along I-515 between Eastern Avenue and Charleston Boulevard. The proposed project will add auxiliary lanes on I-515 between Eastern Avenue and Charleston Boulevard, reconstruct the Charleston Boulevard interchange ramps, and widen Charleston Boulevard east of the I-515 interchange. The project is expected to improve safety and traffic operations under both current and future traffic conditions.

In September 2016, NDOT sent an "Intent-to-Study" letter to your agency and received a response providing scoping comments from Ms. Debbie Lowe Liang. Since that time, the study moved forward but has been delayed for several months. As development of the study is now progressing again, NDOT has incorporated many of the EPA's scoping comment recommendations in the Environmental Assessment (EA). This includes a clear, concise, easy to understand Purpose and Need statement, an in-depth environmental justice analysis, identification of best practices to reduce discharge of pollutants into surface waters, and a detailed cumulative impacts analysis.

Regarding the project's environmental justice analysis, the updated EA follows the Federal Interagency Working Group on Environmental Justice *Promising Practices for EJ Methodologies in NEPA Reviews* guidance. NDOT obtained the most recent census data for the study area and compared it to reference communities of the City of Las Vegas, Sunrise Manor, and Clark County to determine how the demographics of the study area compare to the community as a whole. The study area is predominately Hispanic; consequently, NDOT provided targeted outreach to the local Hispanic population by providing media and public meeting materials in Spanish, advertised the public meeting in the local Spanish-language newspaper, and provided

real-time Spanish translation of the public meeting presentation and question and answer session.

NDOT anticipates the completion of the I-515/Charleston Boulevard Interchange EA in early May 2019, with a public hearing scheduled for later that month. In the meantime, comments or questions about the study may be forwarded to me at the Nevada Department of Transportation, 1263 South Stewart Street, Carson City, NV 89712, (775) 888-7317, or emailed to rsplawinski@dot.nv.gov. NDOT appreciates your comments and coordination efforts on this important study.

Sincerely,

Richard G. Splawinski, P.E.
Senior Project Manager
