

Sahara Avenue Safety Enhancement Project

Project Overview

The Nevada Department of Transportation (NDOT), in cooperation with the Federal Highway Administration (FHWA), local agency partners, and other key stakeholders including the community, is planning to implement improvements along Sahara Avenue from Rainbow Boulevard (SR 595) to Rancho Drive. The **Sahara Avenue Safety Enhancement Project** (the Project) is an effort to enhance safety in the Project area in accordance with the Nevada Strategic Highway Safety Plan and Zero Fatalities (<https://zerofatalitiesnv.com>) on Nevada's roads. The elements of this project will align with the Americans with Disabilities Act (ADA). A total of 1,665 corridor crashes occurred along the Project area throughout a five-year period (2012-2017). The analysis of these crashes led to the safety improvement designs now being implemented.

Project Benefits

The project includes multiple design elements that will be modified to enhance safety and compliance with ADA.

Enhancements include:

- Traffic signal improvements
- Median island installations and modifications
- Flashing beacons at crosswalks
- Pedestrian safety barriers to encourage crossing at crosswalks and more

Project Area

The Project is located within the City of Las Vegas and Clark County and extends from Rainbow Boulevard (SR 595) to Rancho Drive, approximately 4 miles.

**All information is subject to change*

Anticipated Project Timeline

This project has a compressed schedule. The design is set to be complete by July 2022 and construction is scheduled to begin shortly thereafter in Winter 2022 pending material procurement.
