BENCHMARK PERIOD

The Nevada Asphalt Price Index is established by NDOT Maintenance and Operations Division from the selling price of asphalt concrete furnished by Inert & Partners, Inc. to the State of Nevada. The North reference cost is based on the selling price for the Reno area. The South reference cost is based on the selling price for the Las Vegas area. The Nevada Asphalt Price will be the average of the selling price for each Friday during the selected period.

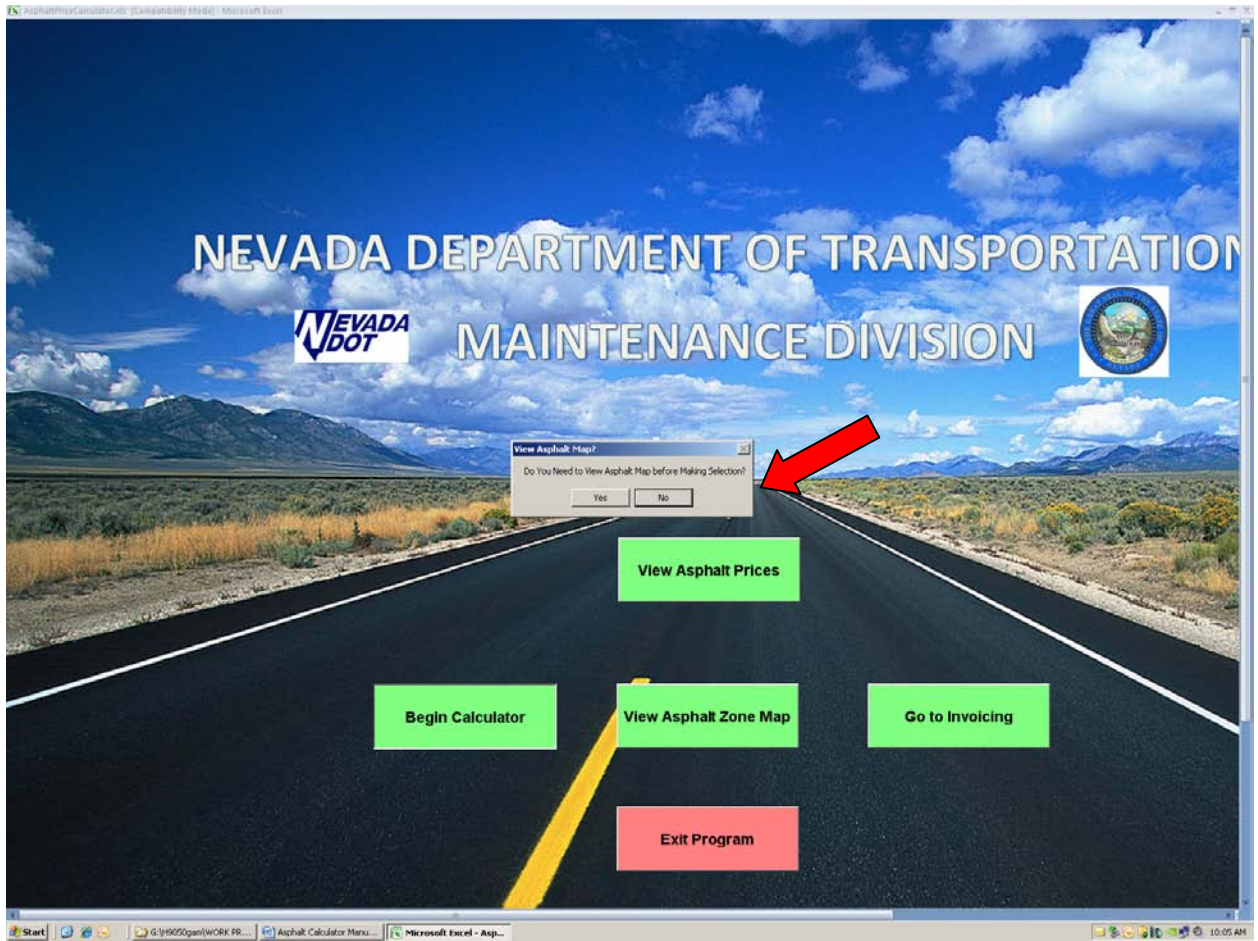

Today's Date: 12/16/12
 Program Revision Date: 12/16/12
 Price Revision Date: 12/16/12

2.) Asphalt Zone Map Screen.

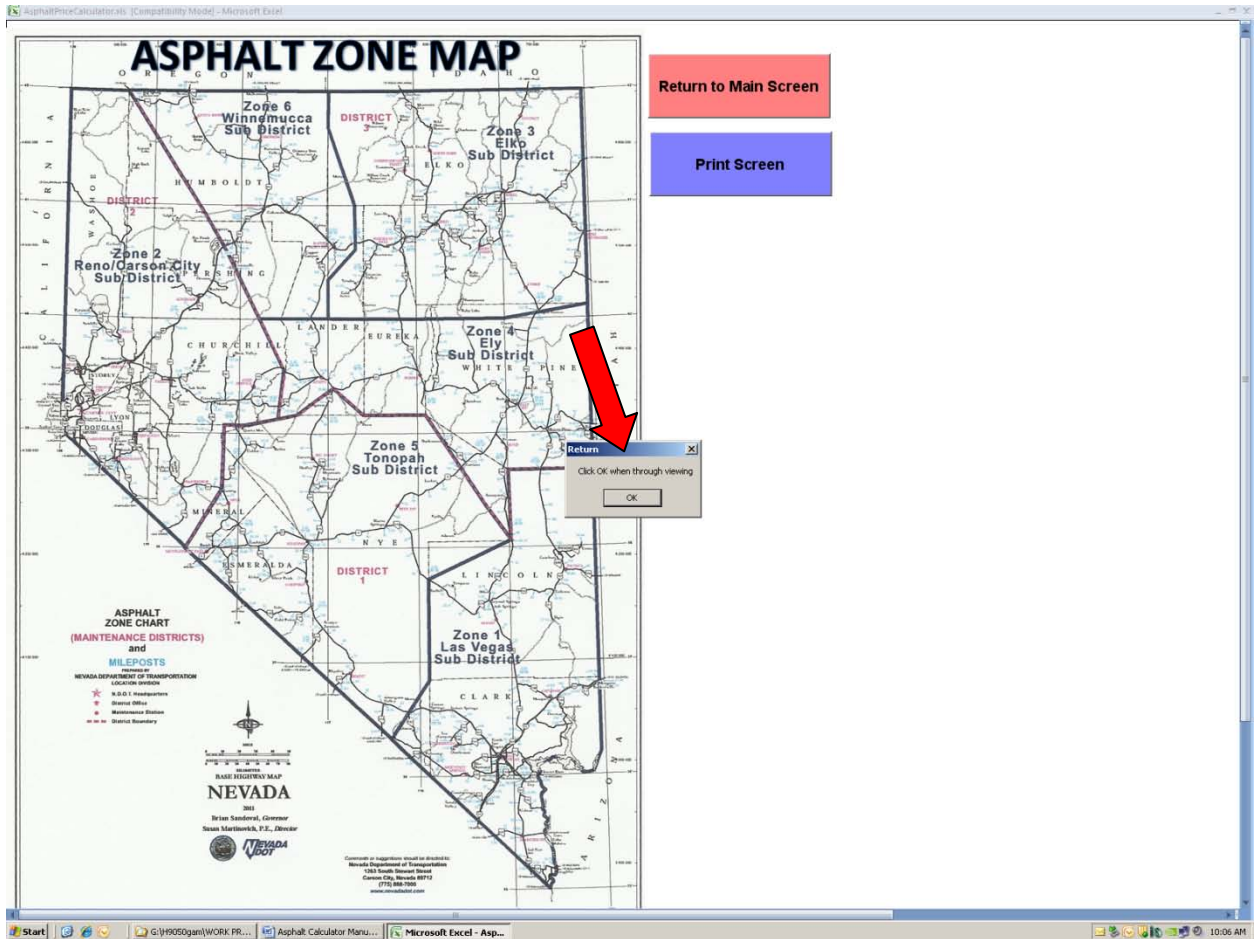

Pressing Begin Calculator button (# 3) will begin with data gathering pertaining to your project. The first question box will ask whether you need to view the Asphalt Zone Map, screen below, in order to determine which Asphalt Zone the project is in.

The default is "No", so pressing the enter key will allow you to continue. If you press "Yes" you will be taken to the Asphalt Zone Map, as shown below.

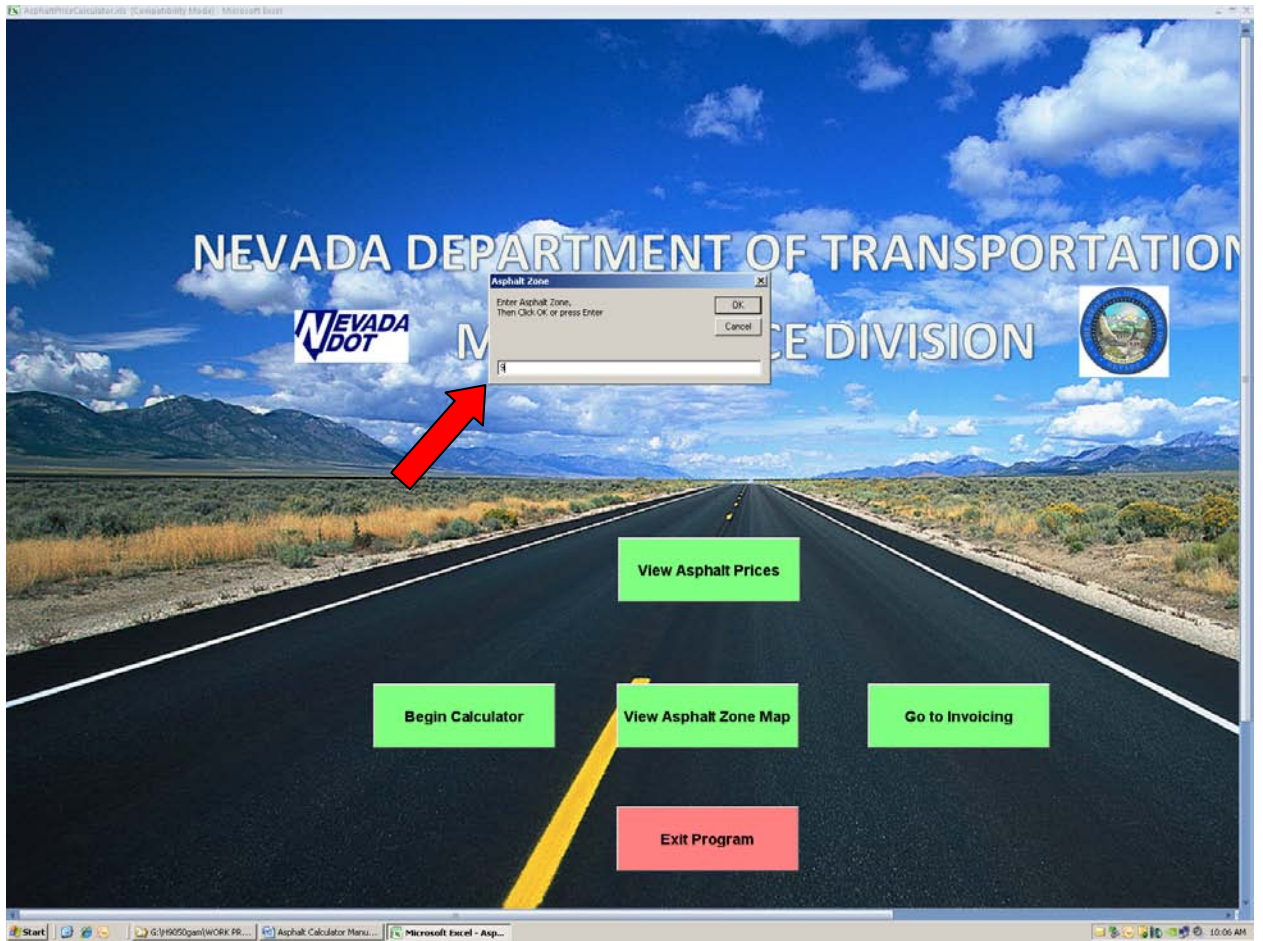

After determining the proper Asphalt Zone, either select the "OK" button or press the enter key on your keyboard and you will return to the Main Screen and the program will continue, as seen below.

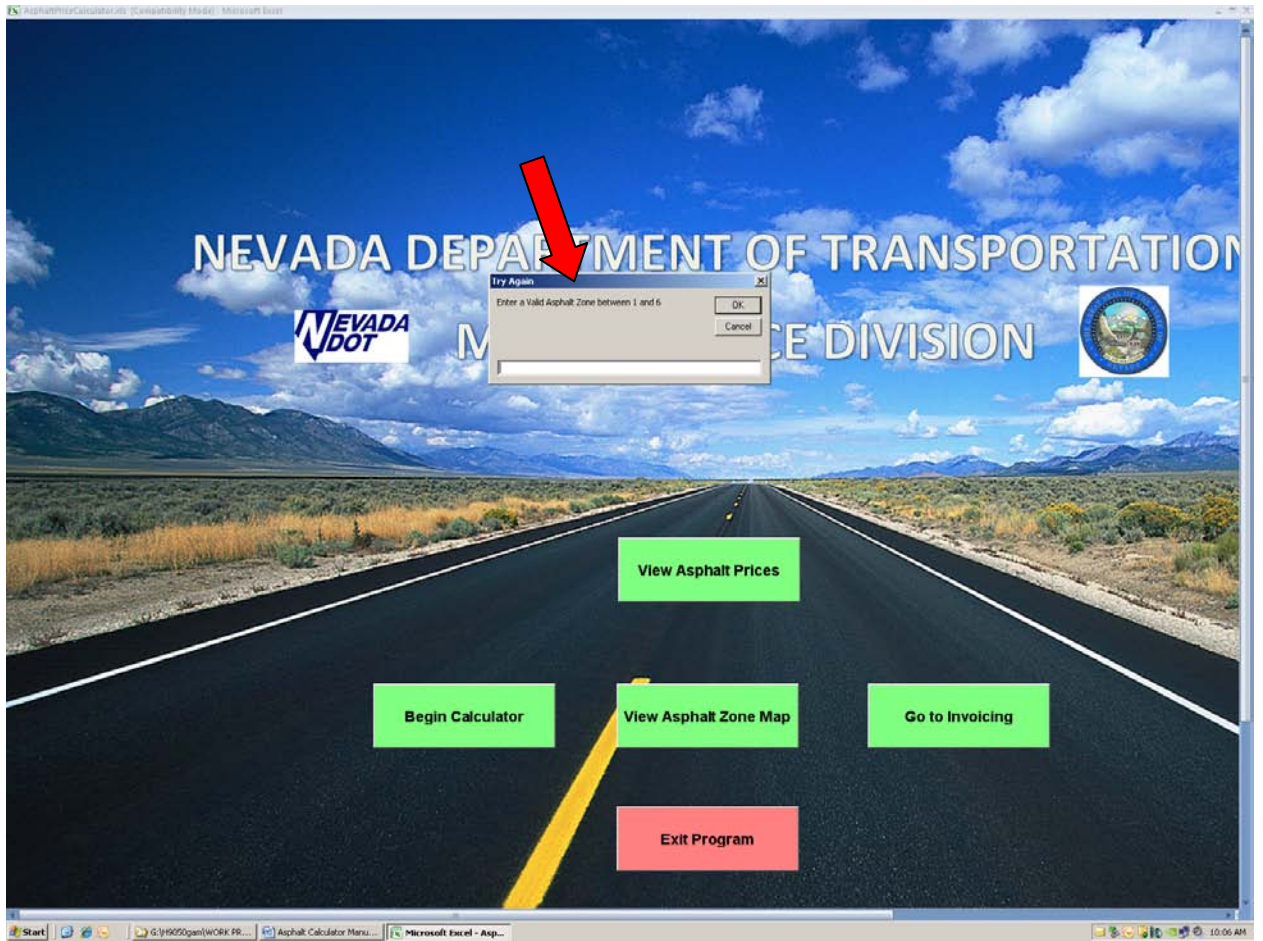

This box is where you will enter the Asphalt Zone. After entering a number, either click on "OK" or press the enter key on your keyboard.

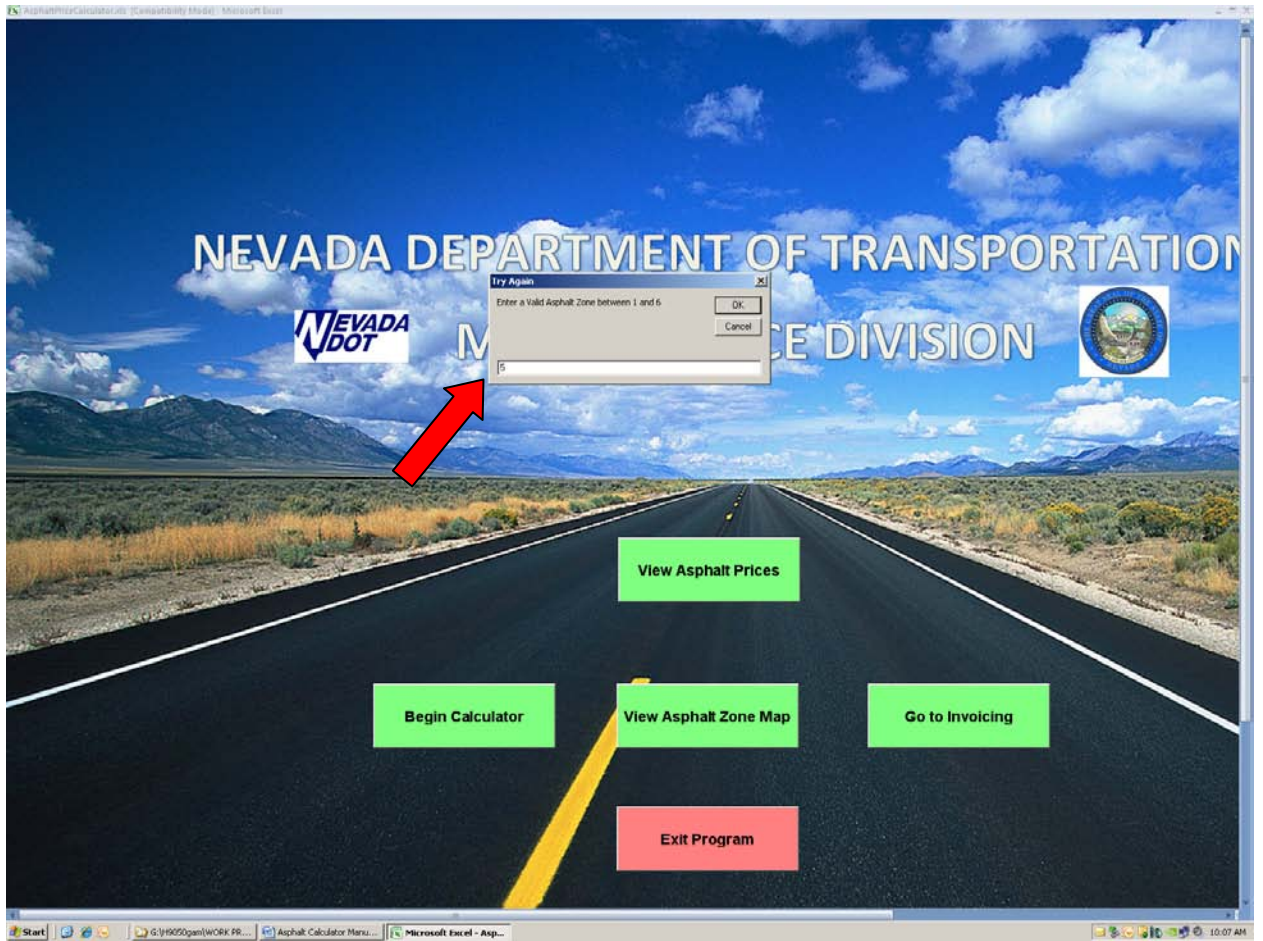

If you enter a number which is not an Asphalt zone, the program will clear the box and ask for a correct zone number, as shown below.

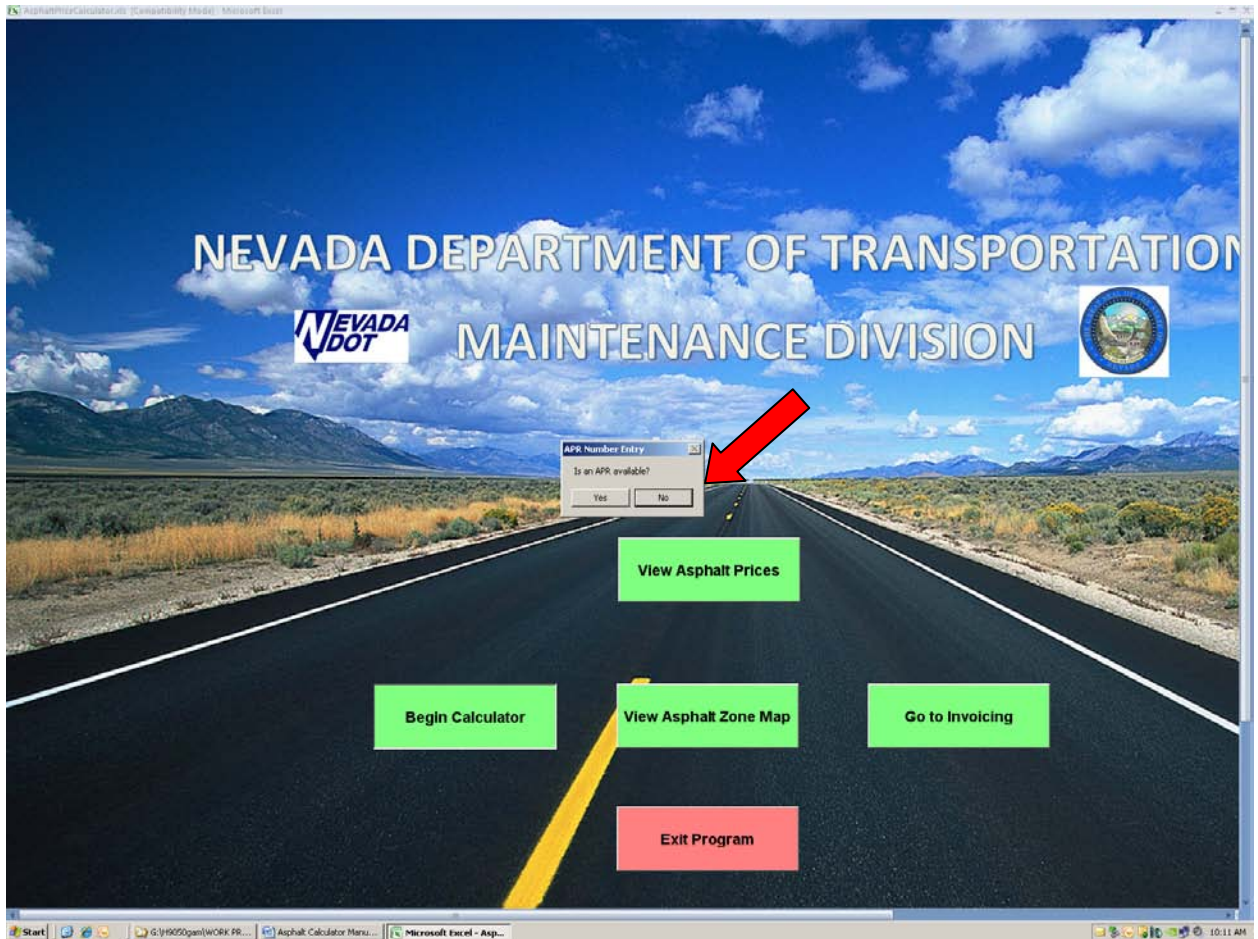

As shown above, Zone 9 has been entered which is not a valid Zone number.

The box has cleared and asks again for a valid Zone number.

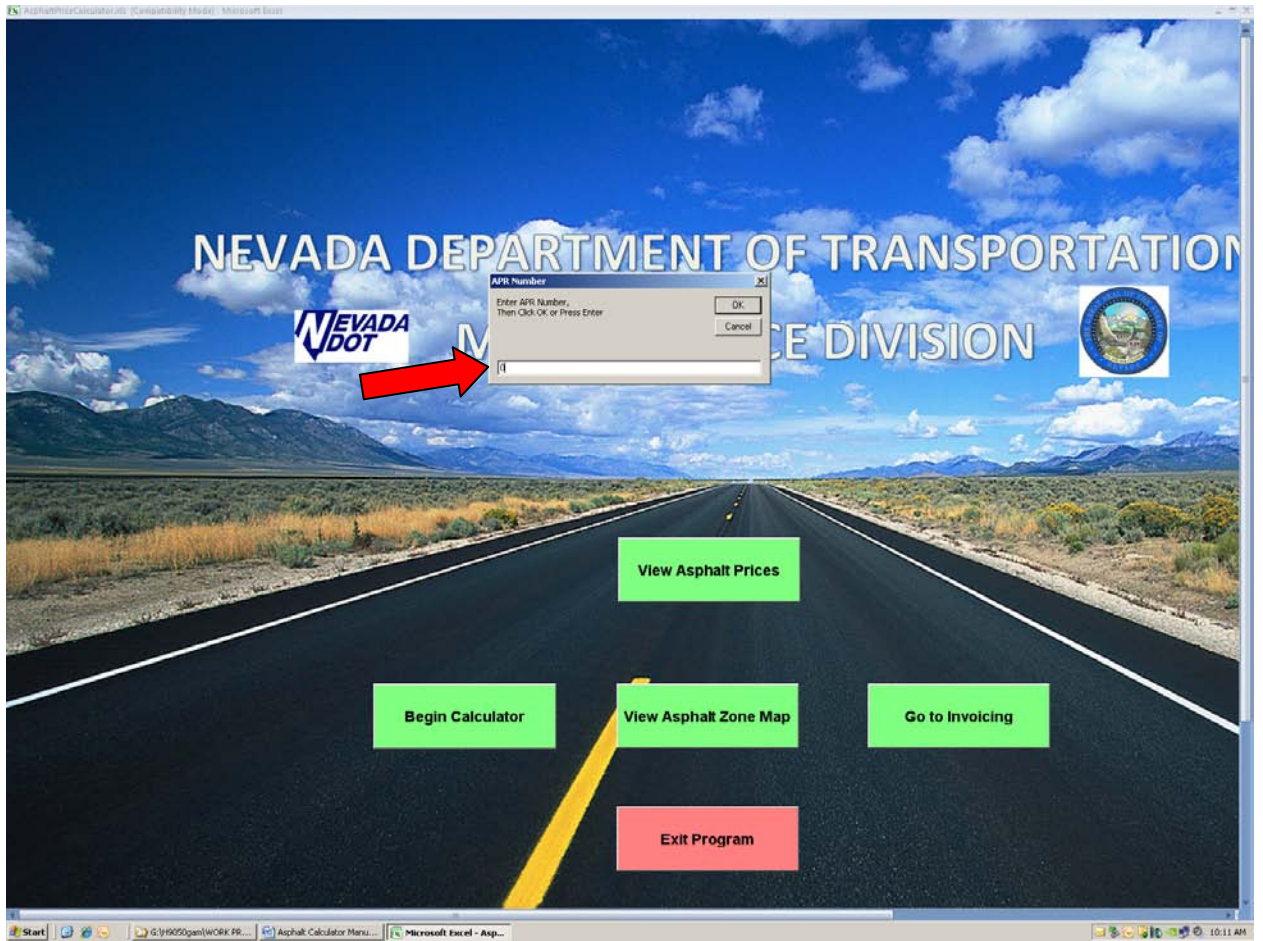

As shown, Zone 5 has been entered.

The next information is regarding an APR number. The default is "No", so if there is no APR yet just hit the enter key. If there is an APR, select the "Yes" button and a box will appear asking for the number to be entered, as shown below.

If you selected "Yes" and there is no number, that is okay. Just enter a zero (0) in the box and click "OK" or press enter, as shown below.

A zero (0) has been entered above.

This is the screen that shows up next. As can be seen, the APR number is zero (0), the Asphalt Zone is #5 and it knows that zone 5 is in District 1.

The Benchmark Price for asphalt is shown for the North and the South regions.

The Current Asphalt Prices are also shown for the North and the South.

If escalation is effect (after a 10% change), the percentage amount of escalation will be displayed under "Escalation %".
