

2023

Vehicle Classification Distribution Report

By Route

Compiled by
Nevada Department of Transportation
Traffic Information Division
1263 S. Stewart St.
Carson City, NV 89712

Printed June
2024

The data collection provided is in direct conjunction with the Nevada Department of Transportation, Traffic Information Division's Annual Traffic data collection plan.

Each Segment of roadway is identified by a "Begin and End" point in two different manners.

1. From and To Physical location (example: CA / NV Stateline)
2. County mile point (example : CL 0.00)

Data is collected using one of the following methods:

1. Permanent Continuous Weigh In Motion (WIM) – (up to 365 days per year 24 hours per day)
2. Permanent Continuous Automatic Vehicle Classification (AVC) – (up to 365 day per year 24 hours per day)
3. Short Term AVC – (up to 7 continuous days 24 hours per day)
4. Manual Classification – (24 to 48 continuous hours, [by manual observation])

Vehicle Classification distributions are based on number of axles as defined by the Federal Highway Administration (FHWA).

The “Year of Data” column indicates the last time data was collected in the segment. An “E” in the column indicates that data collection was last done prior to 2019. Therefore the data is estimated based primarily on the adjacent segments data.

Some segments in this report show no data at this time. This is due to adding locations which prior to 2023 were not being collected. This report is expected to be dynamic, it likely will expand in scope as we determine the need for vehicle classification data collection on routes which we have not collected data. We may also determine that consecutive segments of roadway are actually homogeneous, allowing for the elimination of data collection at some sites.

For more detailed information, or for vehicle classification data on routes not covered in this report please contact:

Nevada Department of Transportation,
Traffic Information Division
Vehicle Size and Weight Manager
(775) 888-7536.
