## EMPOWERING I-80 COMMUNITIES TODAY AND TOMORROW

### **I-80 CSMP I80vision.org – Introduction**

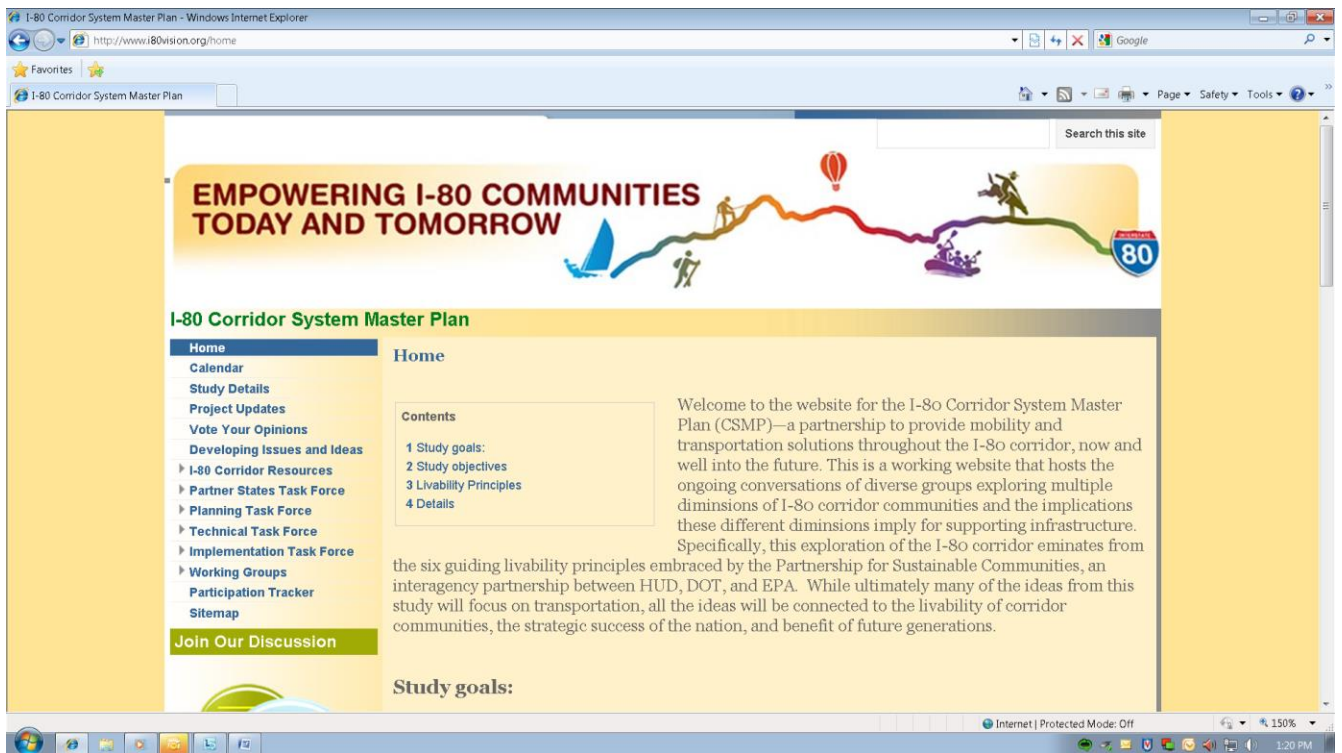

Organizing a study across four states and with more than 250 stakeholder representatives comes with a few coordination challenges. To overcome these challenges we established an online platform [www.i80vision.org](http://www.i80vision.org) to serve as a forum for stakeholder interaction and dialogue. Multiple types of virtual meetings were used to involve communities across four states, and social media engagement strategies - including weekly podcast updates, a Twitter feed, and Newsflash eblasts, were implemented to keep participants energized and engaged without face-to-face meetings. Additional branded collateral materials included business cards and magnets, study brochure, study timeline, Implementation Task Force approval process chart for Working Group work products, and PowerPoint presentations.

Those responsible for facilitating the development of the I-80 CSMP realized the geographic distance between the communities and stakeholders representing them would preclude traditional meeting strategies where everyone would be able to physically attend. The Leadership team recognized they would have to use every means of advanced technology to initiate and continue the dialogs necessary to identify topics, initiatives, and opportunities for mutual benefits.

Ultimately a GIS platform was developed and a link to a map gallery was placed on the project website. This map gallery hosts maps of the diverse working groups exploring multiple dimensions of the I-80 corridor communities and the implications these different dimensions imply for the supporting infrastructure. Tutorials were created and uploaded to u-tube with links to the website in order to instruct visitors on how to navigate the map gallery.

The following pages of this appendix chapter provide a moment-in-time snap shot of the I-80 Stakeholder Networks' web platform from May of 2014. Stakeholder engagement through this web site provides invaluable direction for the updated website configured for the ongoing work of the Stakeholder Network.

This I-80 Corridor System Master Plan (CSMP) stakeholder user guide for the web site aims to enhance the web site use for numerous collaborative dialogues. The web site functionality is organized to make this the commons for all the groups working on various topics and objectives for this study. Ultimately this web site will serve to support the implementation of strategies identified with this study as we move forward to achieve our vision for I-80 and our communities. When you navigate to [www.i80vision.org](http://www.i80vision.org) you will be on the home page (Figure 1). The Home Page introduces the Study for individuals who visit our web site including livability principles. The following discussion highlights the initial web site functionality that we will adapt as we progress through the study and our individual dialogues.

**Figure 1: Home Page.**

**Navigation Tree:** The left side bar provides navigation to the Members and Meetings pages for the various study groups. Click the triangle to expand the navigation tree and click on the page you want to access (Figure 2). Navigating to the Members and Meetings page for the Working Groups requires expanding the navigation tree for Working Groups and the specific Working Group you want to access (Figure 3).

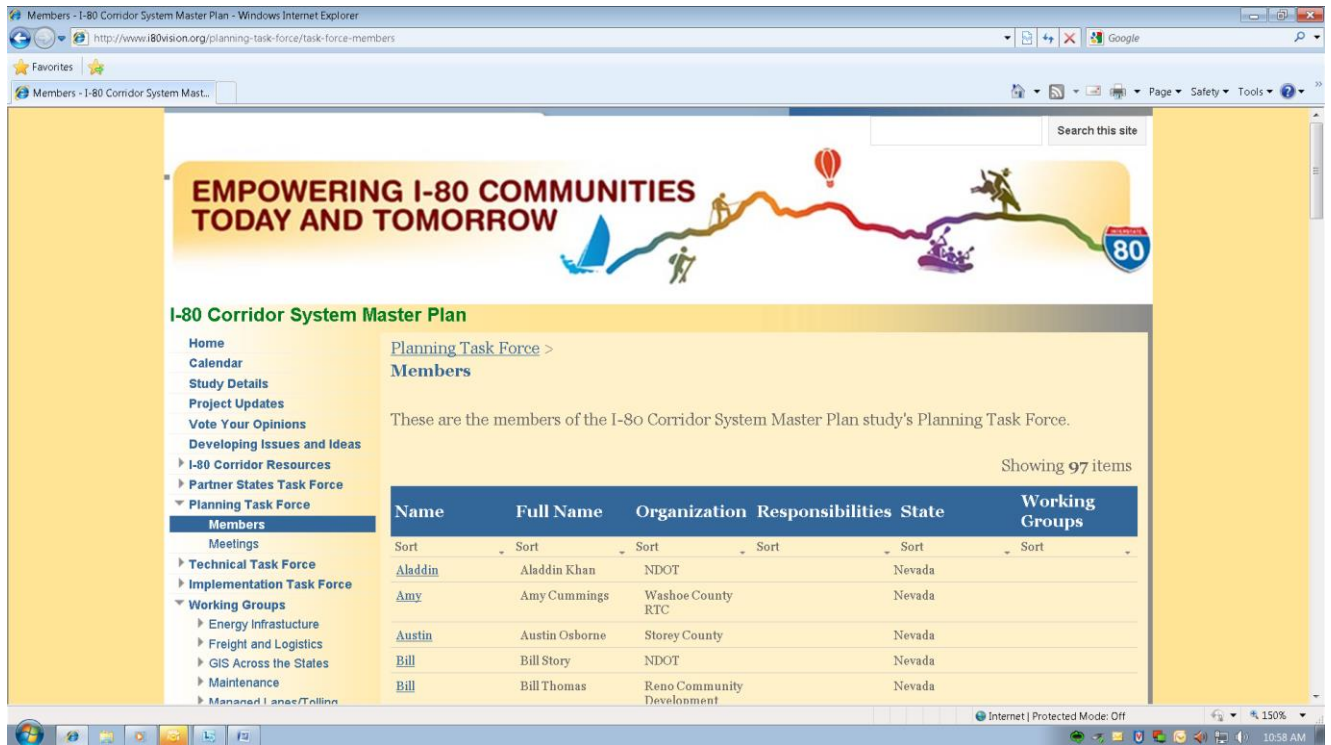

Figure 2: Navigation Tree second level.

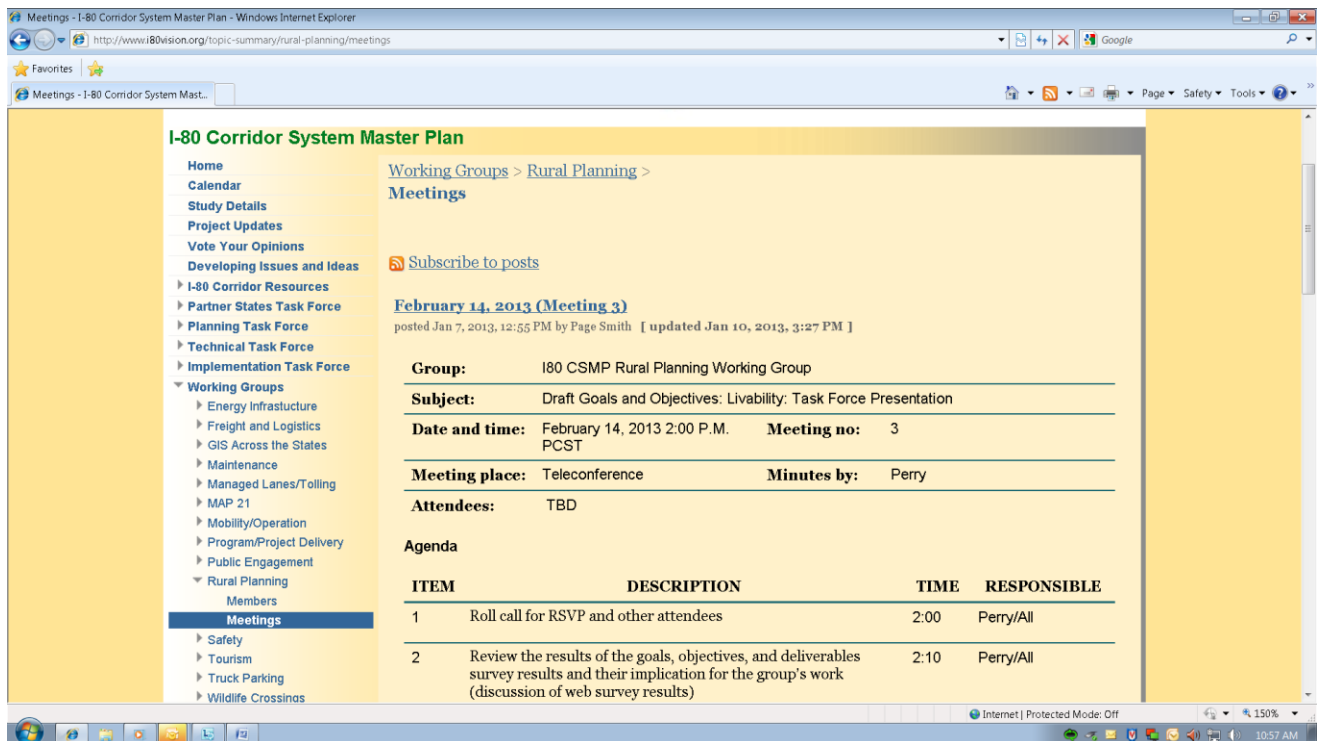

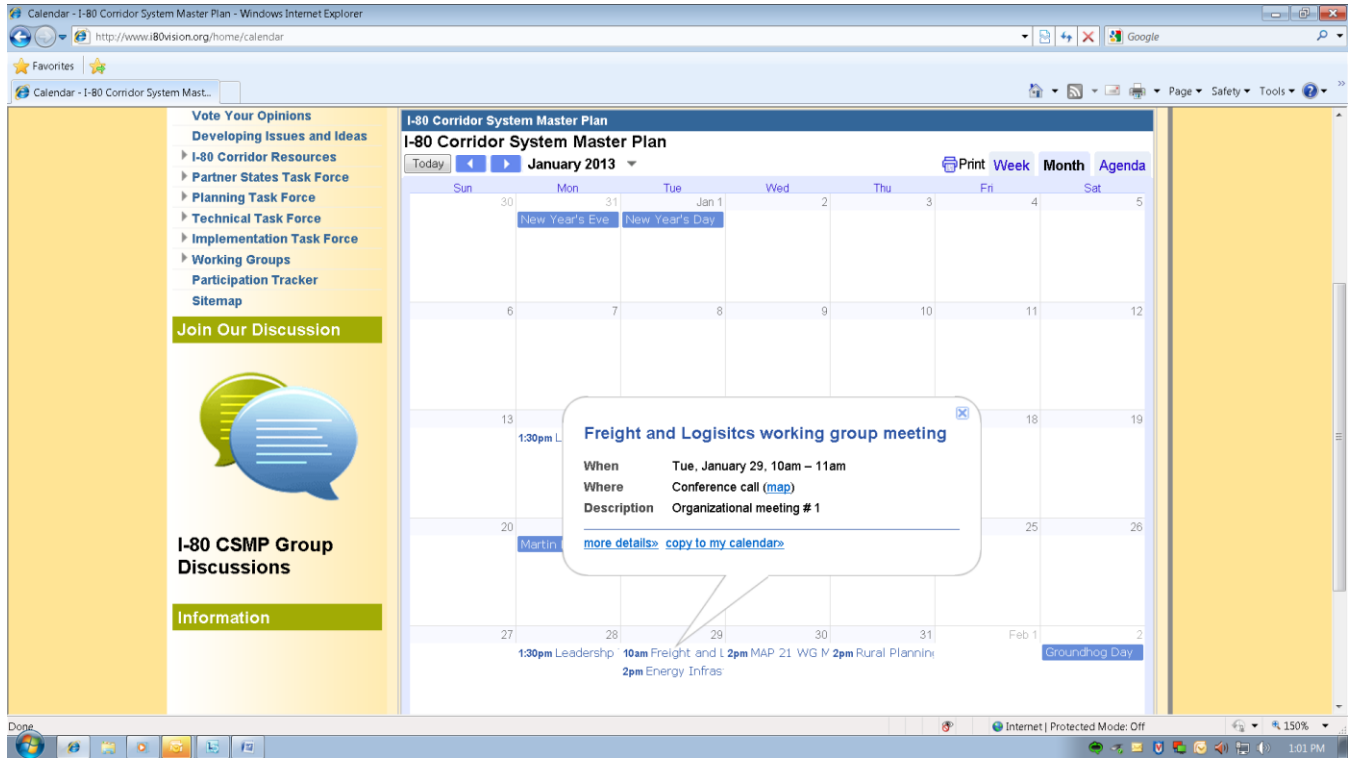

Figure 3: Navigation Tree third level.

**Study Level Pages:** There are nine Study Level Pages: Home (Figure 1); Calendar; Study Details; Project Updates; Vote Your Opinions; Developing Issues and Ideas; I-80 Corridor Resources including Plan Summaries and Links; and Participation Tracker.

**Calendar Page:** The Calendar Page (Figure 4) shows all the scheduled meetings among other Study significant events. Clicking on a calendar item provides a pop up box with details. This is the location for identifying the overall work undertaken with the Study.

**Figure 4: Calendar Page.**

**Study Details:** The Study Details (Figure 5) page provides an initial set of study details that describe the current proposed process and overall goals. This page will be modified as the study progresses to capture work accomplished.

**Project Updates:** The Project Updates (Figure 6) page provides a platform for all groups to provide highlights of their work for other study stakeholders, constituents, and other interested individuals. This and other pages have RSS feed capability to allow external monitoring of accouchements. Establishing RSS feeds will be covered later in the guide book.

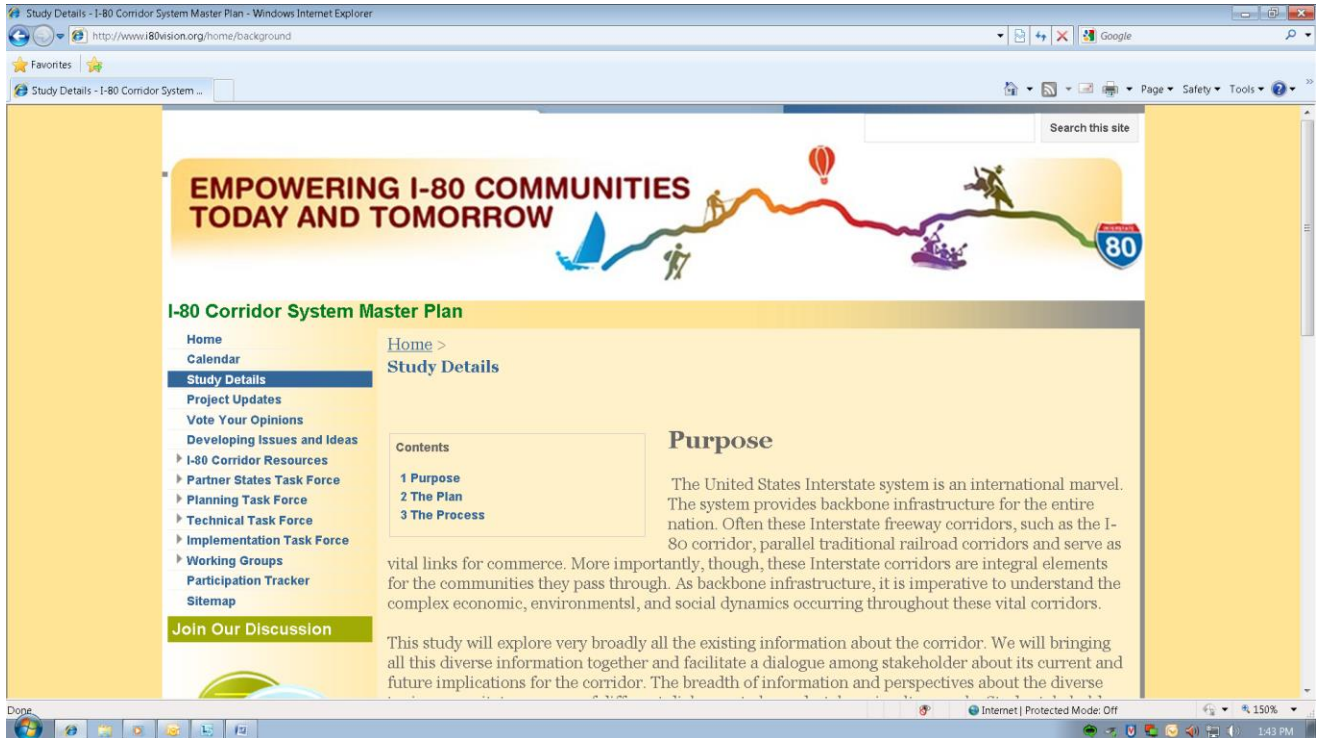

Figure 5: Study Details

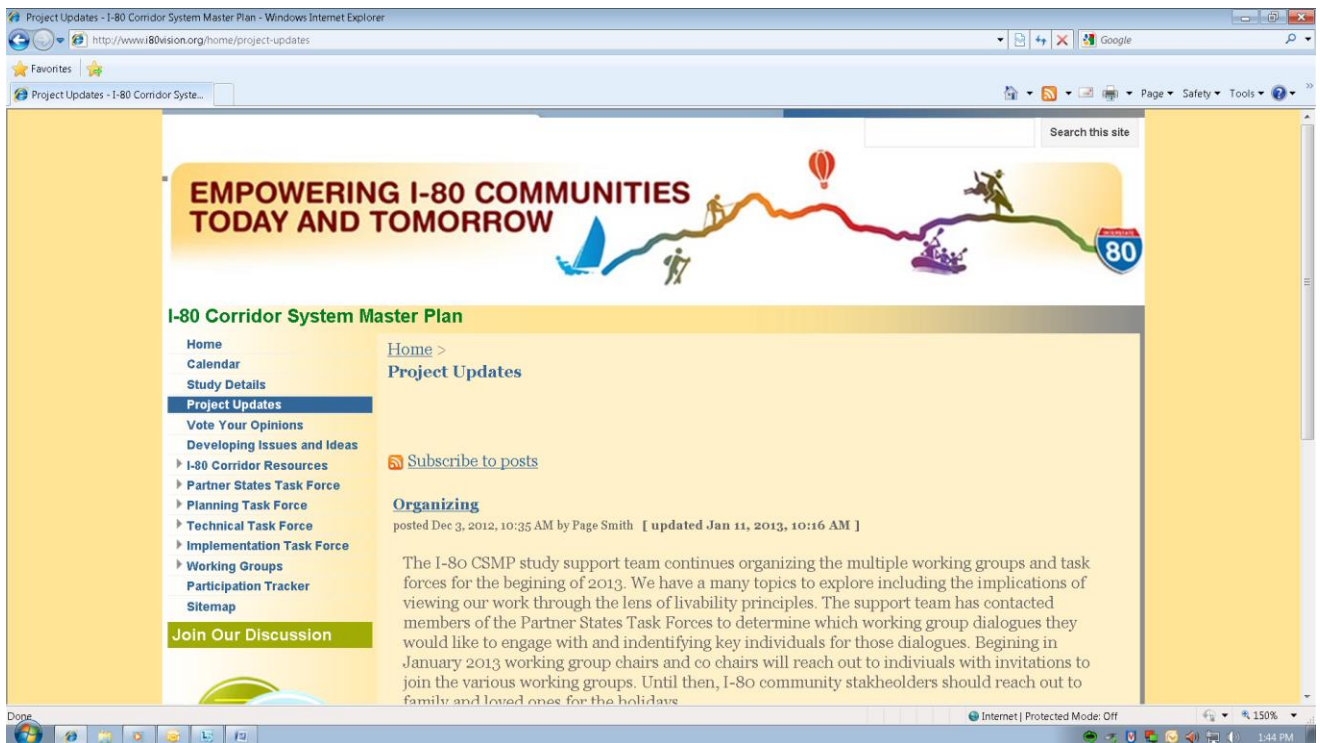

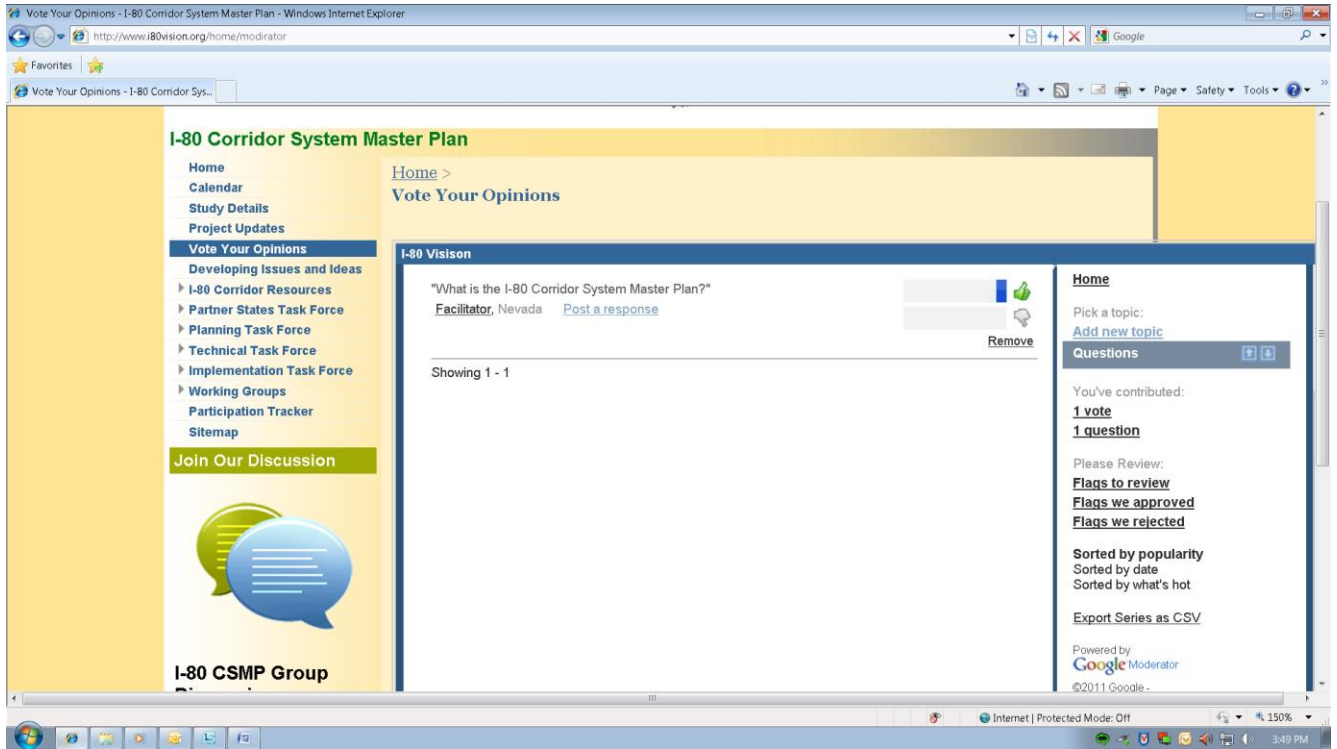

Figure 6: Project Updates.

**Vote Your Opinions:** The Vote Your Opinions (Figure 7) page uses Google Moderator as a platform for monitoring the level of interest for the many topics involved in the multiple dialogues.

**Figure 7: Vote Your Opinions**

**Developing Issues and Ideas:** The Developing Issues and Ideas provides a central location for all the inspired items from the various dialogues that do not have

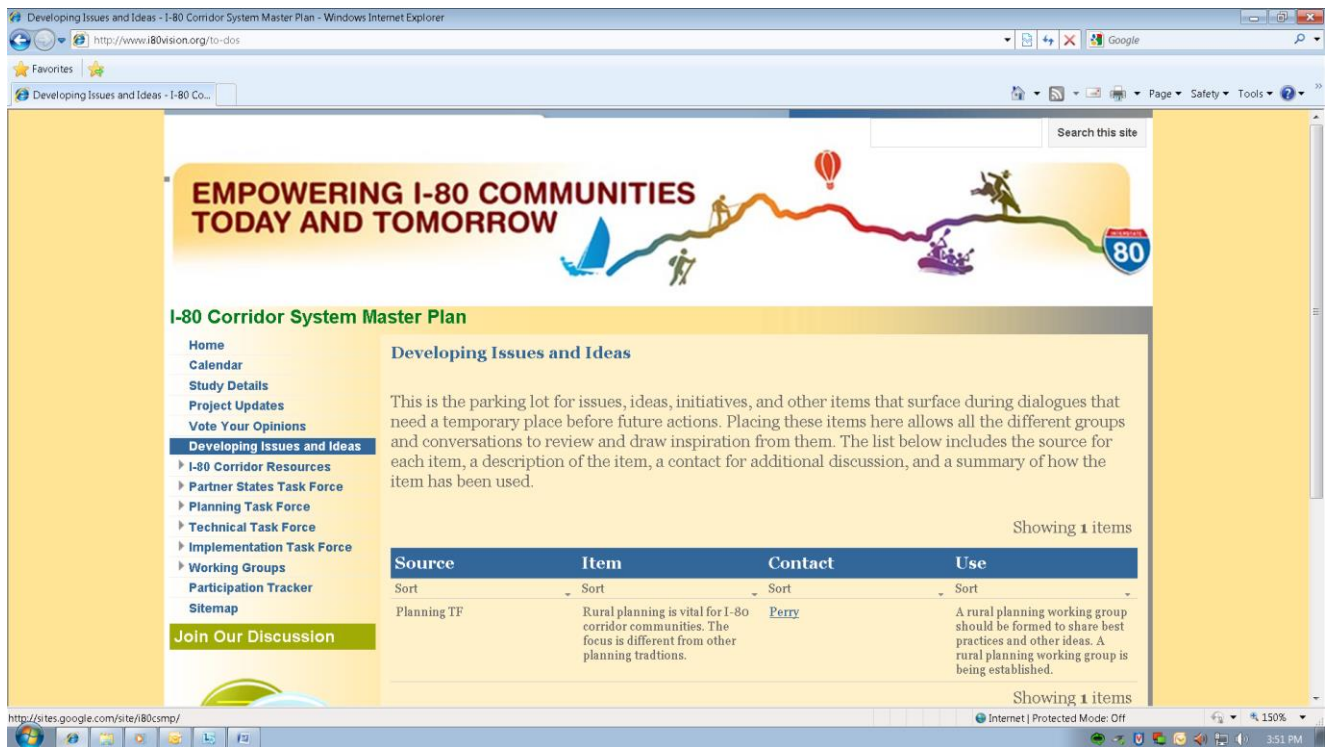

Figure 8: Developing Issues and Ideas

Group Level Pages: Each Task Force and Working Group has three initial pages: Group homepage, Members, and Meetings.

### I-80 CSMP Group Discussions

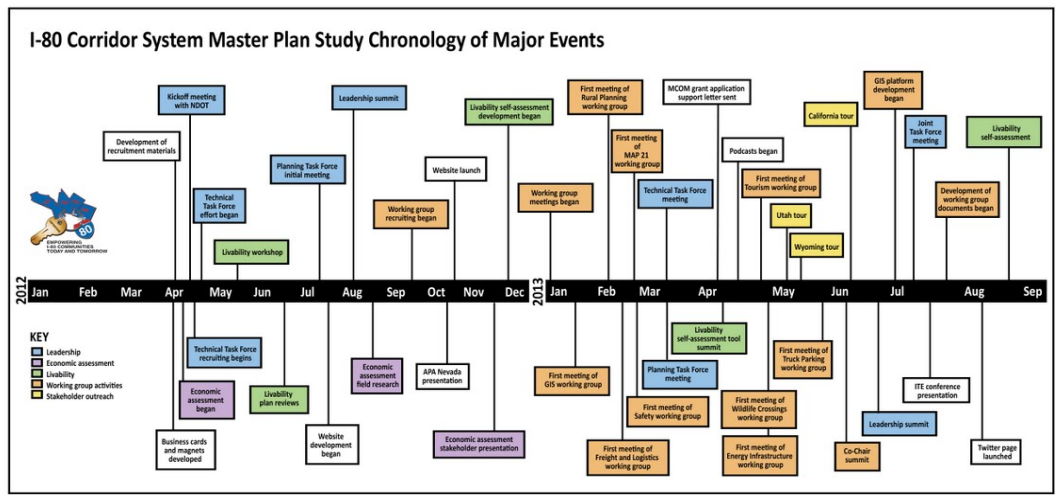

### Information

### Study overview:

Welcome to the website for the I-80 Corridor System Master Plan (CSMP)—a partnership to provide mobility and transportation solutions throughout the I-80 corridor, now and well into the future. This corridor includes partner states California, Nevada, Utah, and Wyoming, and extends from San Francisco, California to Cheyenne, Wyoming. This is a working website that hosts the ongoing conversations of diverse groups exploring multiple dimensions of I-80 corridor communities and the implications these different dimensions imply for supporting infrastructure. Specifically, this exploration of the I-80 corridor emanates from the six guiding livability principles embraced by the Partnership for Sustainable Communities, an interagency partnership between HUD, DOT, and EPA. While ultimately many of the ideas from this study will focus on transportation, all the ideas will be connected to the livability of corridor communities, the strategic success of the nation, and benefit of future generations.

### Study timeline:

To learn more about study activities undertaken to date, click the image below.

## Study goals:

- Information gathering
- Early-action items
- Long-term strategies
- Coalition building

[Home](#)

## Study objectives

- We will facilitate an open and transparent process.
- We will recruit stakeholders vigorously.
- We will organize invigorating conversations of exploration.
- We will ensure all voices are heard and understood.
- We will strive for consensus and acknowledge dissenting views.

[Home](#)

## Livability Principles

### Provide more transportation choices.

Develop safe, reliable, and economical transportation choices to decrease household transportation costs, reduce our nation's dependence on foreign oil, improve air quality, reduce greenhouse gas emissions, and promote public health.

### Promote equitable, affordable housing.

Expand location- and energy-efficient housing choices for people of all ages, incomes, races, and ethnicities to increase mobility and lower the combined cost of housing and transportation.

### Enhance economic competitiveness.

Improve economic competitiveness through reliable and timely access to employment centers, educational opportunities, services and other basic needs by workers, as well as expanded business access to markets.

### Support existing communities.

Target federal funding toward existing communities—through strategies like transit-oriented, mixed-use development and land recycling—to increase community revitalization and the efficiency of public works investments and safeguard rural landscapes.

### Coordinate policies and leverage investment.

Align federal policies and funding to remove barriers to collaboration, leverage funding, and increase the accountability and effectiveness of all levels of government to plan for future growth, including making smart energy choices such as locally generated renewable energy.

### Value communities and neighborhoods.

Enhance the unique characteristics of all communities by investing in healthy, safe, and walkable neighborhoods—rural, urban, or suburban communities and neighborhoods.

<http://www.sustainablecommunities.gov/aboutUs.html>

[Home](#)

## Details

### Information gathering

Consolidate existing and relevant planning information for the corridor into an electronic repository and develop livability/sustainability summaries for each.

### Early-action items

Develop and prioritize early action items.

### Long-term strategies

Define and prioritize long-term strategies.

### Coalition building

Create a project management process that generates a system of stakeholders capable of re-evaluating the corridor periodically and adjust priorities in light of changing conditions.

### Study Details

#### Contents

- 1 Purpose
- 2 The Plan
- 3 The Process

## Purpose

The United States Interstate system is an international marvel. The system provides backbone infrastructure for the entire nation. Often these Interstate freeway corridors, such as the I-80 corridor, parallel traditional railroad corridors and serve as vital links for commerce.

More importantly, though, these Interstate corridors are integral elements for the communities they pass through. As backbone infrastructure, it is imperative to understand the complex economic, environmental, and social dynamics occurring throughout these vital corridors.

This study will explore very broadly all the existing information about the corridor. We will bring all this diverse information together and facilitate a dialogue among stakeholders about its current and future implications for the corridor. The breadth of information and perspectives about the diverse topics necessitates a range of different dialogues to be undertaken simultaneously. Study stakeholders will likely be involved in multiple dialogues. Interested individuals following the progress of the study are invited to explore this study website. Further, you are encouraged to provide input and insights about the issues.

## The Plan

The I-80 Corridor System Master Plan (CSMP) will rely on existing information from corridor stakeholders, which will be collected and combined to develop a “big picture” understanding of the corridor. This big picture understanding will include an analysis of existing plans, based on how well they address livability principles as outlined by the US Department of Transportation (US DOT). Addressing livability can help individual stakeholders understand and apply for competitive grant funding for improvements throughout the corridor. For more information on US DOT livability principles, click here: [Livability 101](#). For short-range needs and actions, we will identify—through existing plans—strategically important, corridor-critical efforts, which will be prioritized with stakeholder consensus. The study will also include a vision for capturing long-range opportunities to benefit communities influenced by the I-80 corridor.

## The Process

To bring all this information together, organize it, and develop a CSMP that addresses community issues along the corridor, we have organized the effort into task forces. The task forces bring together professionals with similar interests across the states into groups:

- [Partner States/Primary Stakeholder Task Force](#)
- [Planning Task Force](#)
- [Technical Task Force](#)
- [Implementation Task Force](#)

The task forces will collaborate internally and with other task forces to accomplish five main tasks:

- Task 1: Fact Finding
- Task 2: Early Action Selection
- Task 3: Evaluation/Identification of Long-term Infrastructure and Multimodal Needs
- Task 4: Integrated Framework Plan
- Task 5: Implementation

### [I-80 Stakeholder Network GIS Platform Tool](#)

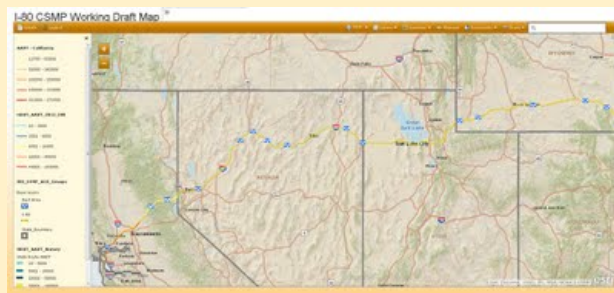

posted Oct 28, 2013, 5:45 PM by Page Smith [ updated Dec 9, 2013, 4:55 PM ]

Interstate 80 Corridor Community Stakeholder Network Community, welcome to your geographic information systems (GIS) web tool platform. Many Working Group members have been working hard for this launch. It is time for all of us to explore this tool and imagine how it can assist with our work and with future dialogues about corridor communities. We feel this platform will improve transportation decision-making and all decision-making overall.

**NOTE: this is a working map and things will change and may be broken at times** (new layers, revised layers, different groupings, different pop-up attributes).

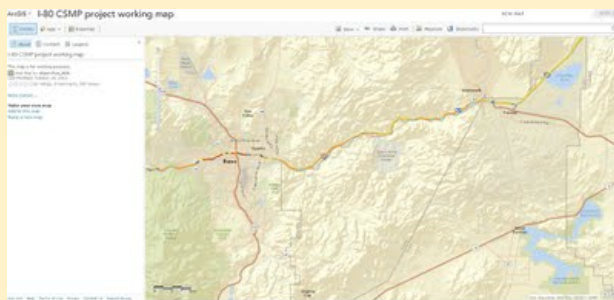

Shawn is working on setting up a web map application that has the best of both of the following formats, but would like to hear some feedback before he get too far. Follow the two links below and bear in mind some of the distinctions Shawn explains.

- Web Map Application - [click here for the Web Map Application](#)

This map is a cleaner looking format, but you lose some of the functionality with layers and adding layers. This version is in a little more controlled environment where the user doesn't have as many options to play with or manipulate the way the maps look.

- Web Map - [click here for the Web Map](#)

This map is more of a working area for the map that may be more intimidating for non-GIS users. It has slightly more functionality, but doesn't look as clean.

Click on the text that says "I80 CSMP AGS Groups". It will expand to show other layers under that main heading. That is where we were going with grouping things, and groups or items within groups can change at any time based on feedback.

### [Performance Measurement Training Offered](#)

posted Oct 22, 2013, 8:13 AM by Page Smith [ updated Oct 22, 2013, 8:24 AM ]

## EMPOWERING I-80 COMMUNITIES TODAY AND TOMORROW

Performance measurement defines public service work, and responding to this email will express your desire to learn more.

The I-80 CSMP Leadership Team is offering an **exclusive opportunity** to better understand the basics of performance measurement from **UNLV Professor Christopher Stream**.

Professor Stream is an authority on performance measurement for local and state governments. Using an **online platform**, he will lead us in a forum for considering the implications of measuring performance. You will benefit from this training if your agency or organization is interested in exploring the following questions:

- How can we develop indicators of performance that are meaningful?
- How do we effectively communicate these measure to the public?
- How can we develop participation techniques to foster and sustain citizen involvement?

We are offering this performance training for all of our stakeholders for integration into the future work of the ongoing **I-80 stakeholder network**. The federal performance measurement initiative is gaining momentum and this study presents a great opportunity to integrate performance measurement that works across transportation agencies and organizations.

We will organize the training **based on your responses** in anticipation of beginning later this year.

### [Sustainable Communities Twitter Town Hall Meeting](#)

### I-80 Corridor Resources

The I-80 Corridor System Master Plan uses the invaluable information previously identified in the documentation from study stakeholders. This information comes from local, regional, state, and federal agency sources such as Metropolitan Planning Organizations (MPOs), transportation elements in city and county general master plans, and state departments of transportation (DOTs). These organizations have a wide range of existing information and strategies. Since we aim to understand the complex dynamics within and among corridor communities, other information sources will be invaluable. For our broad purposes, we will integrate this information into our dialogues. Potential sources of this invaluable information might include economic development reports, academic studies, nonprofit reports, health districts statistics and reports, business plans, local special plans such as aging in place plans among other potential sources. Creativity and curiosity of the participants expands the dialogue necessary to explore existing information to achieve the study purpose.

### Implementation Task Force

The Implementation task force will help ensure that the vision truly enhances individuals, communities, and benefactors of the I-80 Corridor.

These task force personnel have experience and insight nurturing programs, initiatives, and projects into existence. It is likely that many of the members of this task force will also be members of other task forces. Implementation work begins when the other task forces start to identify and prioritize the programs, initiatives, and projects deemed important for the corridor.

Working with the other task forces, the implementation task force will shape action plans for near-, short-, and long-range undertakings. It is likely that this work will involve efforts to change existing dynamics, such as laws, regulations, and policies, to achieve the I-80 corridor vision. The group's experience will help shape this effort. An important part of the group's work will be to help organize stakeholders to execute action strategies and to routinely explore the changing dynamics throughout the corridor. This commitment will require a formal arrangement among stakeholders beyond the time of initial efforts to ensure that the vision truly enhances individuals, communities, and benefactors of the I-80 corridor.

Implementation task force roles:

- Ensure recommendations developed throughout the process are implementable.
- Identify obstacles to updating appropriate RTPs, STIPs, TIPs, etc., to advance the ranked list of preferred short-term initiatives.
- Identify obstacles to updating appropriate RTPs, STIPs, TIPs, etc., to advance the ranked list of preferred long-term initiatives.
- Help develop the framework for the ongoing stakeholder network.

This task force will focus on the viability and vibrancy of the I-80 Corridor vision to ensure the enhancement of individuals and communities within and beyond the corridor.

#### **May 24, 2012 Identifying Task Force Members**

posted May 23, 2012, 2:53 PM by Page Smith [ updated Jan 16, 2013, 2:49 PM ]

This meeting of the consultant team support staff brought together and organized the initial information provided by NDOT personnel.

#### **Meeting Strategy**

posted May 23, 2012, 2:47 PM by Page Smith [ updated Nov 20, 2012, 3:50 PM ]

Meetings are planned to take place on a regular schedule. Further, meetings are structured to be brief, typically no more than 1/2 hour.

### Planning Task Force

The planning task force is comprised of a diverse mix of individuals representing varied organizations and interests. The group will investigate the issues and initiatives being undertaken in communities throughout the corridor, many of which are experiencing change during challenging conditions. This group will explore many topics related to mobility, such as economic development, livability principles, financing, public policy, tourism, and healthy communities. These topics should influence decision-making about transportation infrastructure and programs. With this information, the group will work with other task forces to craft a vision for the I-80 CSMP that will enhance the lives of individuals and communities along the corridor, now and well into the future.

Planning task force roles:

- Identify all relevant planning documents for the corridor.
- Develop consensus for the evaluation criteria.
- Promote collaboration amongst the partners.
- Promote sustainability/livability in respective agencies.
- Promote support for the project with agency leadership.

### [Beginning 2013 Status and Working Group Recruitment](#)

posted Jan 23, 2013, 1:44 PM by Page Smith [ [updated Sep 30, 2013, 12:57 PM](#) ]

I just wanted to provide Task Force members with a brief status of ongoing actions. We have spent the last few months of 2012 getting ready for energetic and innovative dialogues about many topics identified by the different Task Forces beginning in the Summer of 2012. Please see the [Working Groups](#) tab for a brief summary of the current dialogue topics. Many Task Force members have been recruited to engage with the various Working Group topics. These Working Groups will maintain the number of members necessary for in-depth discussion of issues, ideas, and potential innovations. Please review the topics and determine if you or a fellow colleague wants to join one or more Working Groups. Please contact me, [Dr. Perry Gross](#) or [Mike Lawson](#) with your request to join. Thanks.

Dr. Perry Gross

### [July 12, 2012 \(Meeting 1\)](#)

### [Livability](#)

posted May 29, 2012, 4:05 PM by Page Smith [ [updated Sep 30, 2013, 12:58 PM](#) ]

While livability may appear to be a new concept, it may be more appropriately viewed as the umbrella for a lot of initiatives being undertaken across our communities.

## **Getting Started**

posted May 29, 2012, 11:09 AM by Page Smith [ **updated Sep 30, 2013, 12:58 PM** ]

The Planning Task Force will explore a wide range of topics while seeking innovations. This exploration will coordinate with other task forces and working groups to generate broad understanding among all stakeholders.

### Technical Task Force

The technical task force will help craft a vision for the future of the I-80 Corridor that will enhance the lives of individuals and communities along the Corridor and those that benefit from it.

This task force will investigate the technical approaches being applied across California, Nevada, Utah, and Wyoming to provide mobility. Topics such as GIS, freight and logistics, environmental best practices, program and project delivery, and operations will allow the group to collaborate on corridor dynamics. By enlisting specific working groups, the technical task force will develop a comprehensive set of ideas and tools that will improve decision-making at the local, regional, state, and corridor level.

Technical task force roles:

- Identify reports and studies (not related to planning) to be included in the data repository.
- Reconcile travel forecasts.
- Work with the planning task force to document cost-benefit assumptions/criteria where available.
- Provide input for the ranked list of preferred short-term improvement alternatives.
- Provide input for the ranked list of preferred long-term improvement alternatives.
- Prepare the draft CSMP (short- and long-range plans combined).
- Prepare the draft integrated framework plan, which will establish the future I-80 coalition.

### Working Groups

Working groups form within the I-80 Corridor System Master Plan to explore topics and issues of corridor-wide significance. Each group approaches the exploration in ways that make sense for the issues they are discussing. Many issues are, and will likely remain ongoing. These groups serve as learning communities that provide a forum for continuous improvement and feedback. Other groups are exploring issues that will likely result in an acceptable conclusion. These groups will resolve concerns and issues and move on to identify additional concerns throughout the corridor that require attention. Ultimately, working groups will explore their topics and issues and report their findings back to the Planning, Technical, Partner States, and Implementation Task Forces.

Each working group is facilitated by a chair and co-chair. These individuals are responsible for ensuring each member of the working group has voice and becomes an integral element in the overall dialogue. They will work with group member to shape meeting agendas that fully explore the breadth and depth of all issues. Further, they will track the dialogue and assist the group in formulating jointly understood data, draw preliminary conclusions about the data, generate ideas and action strategies, establish feedback metrics, and effectively document the process. Ultimately, the working group chair and co-chair are responsible for facilitating an open, balanced dialogue.

Working group members are responsible for the content of the group's dialogue. Each group will begin their dialogue with an initial sampling of information about their topic based on existing planning documentation compiled by corridor stakeholders. This information is meant to establish a corridor level understanding of the topic, additional data needs, and guide group members in identifying additional information sources for the group's consideration. The goal is to identify enough information that allows the group begins a consensus-based discussion about the implications of the information, potential action strategies, and preliminary conclusions. Further, as the group progresses through their dialogue, they will report their progress to all study stakeholders through the task forces. It is likely through this reporting out process that working groups will be able to find additional mutual gains action strategies with other working group strategies.

### Bicycle Master Plan

posted May 16, 2012, 1:33 PM by Page Smith [ updated May 16, 2012, 1:43 PM ]

The U.S. Department of Transportation's ITS Joint Program Office, Institute of Transportation Engineers and ITS America are requesting proposals from an individual to serve as the Technical Editor for the development of a new ITS ePrimer. The primary purpose of the ITS ePrimer will be to present a comprehensive source of fundamental concepts and practices related to ITS technologies, commensurate with the state of the art. The ITS ePrimer is intended to be a series of up-to-date, web-based modules that provide basic introduction to key ITS topics, with a multi-modal perspective.

Electronic proposals will be received **until May 29, 2012 at 2 PM EDT**. Proposals should be submitted to Ms. Natalia Vlasov at [nvlasov@ite.org](mailto:nvlasov@ite.org) in accordance with the instructions found on the detailed [request for proposal](#).

### Join Our Discussion

### I-80 CSMP Group Discussions

### Information

[Working Groups](#) >

#### Energy Infrastructure

#### Goal

**Our goal for the I-80 corridor is energy self sufficiency for mobility and transportation that honors the ingenuity and self sufficiency demonstrated by the Native Americans and pioneers who used this corridor in the past.**

#### Vision

**Our working group vision seeks to put in place ideas, strategies, and systems needed for reaching our goal energy self sufficiency for mobility and transportation along the I-80 Corridor.**

This working group will explore the potential for providing the full range of energy infrastructure along the corridor to support all existing and emerging vehicle types. We will be able to draw inspiration from I-5 experiences in California, Oregon, and Washington with the West Coast Green Highway initiative. Further, as the Alternative Fueling Station Locator indicates, we can improve the I-80 Corridor's alternative energy infrastructure future.

This working group will explore the implications and potentiality for enhancing the alternative energy infrastructure in communities along the I-80 corridor. Providing such infrastructure may produce strategic advantages for corridor mobility and ultimately economic vitality within corridor communities. The potential for achieving enhanced alternative energy infrastructure likely lies in this group's ability to identify, organize, and act upon the wide range of information concerning ongoing and emerging initiatives, and generate a consensus action plan. Achieving these goals will require a wide and diverse set of perspectives.

The energy infrastructure working groups will meet regularly via conference calls to discuss the many dimensions implied for the future of the I-80 corridor. Ultimately it is desirable for the group to begin formulation ideas and strategies that will propel I-80 corridor communities to the fore-front in implementing energy infrastructure innovations. Potential discussion topics include:

#### Practical

- Natural Gas Production
- Fleet Vehicle Utilization
- Home Depot Charging Stations

#### Policy

- Economic Incentive
- Technology Adaptation

#### Potential

- Natural Gas Corridor Distribution
- Induction charging
- EV lifestyle
- Emerging technology

#### Among Others

The potential for this dialogue lies in the ability to engage a diversity of perspectives as indicated with the range of likely topics. Individuals in this working group will be involved with regular half hour to one hour conference call discussions as well as other information exchange activities. Members of the working group will likely provide briefing updates to other I 80 corridor working groups and to the larger task forces engaged in the study. Further, they should communicate within their organizations about nature and results of the working group's dialogue.

### [Working Groups](#) > [Energy Infrastructure](#) > **Members**

This Working Group draws on creative, imaginative individuals striving for a better future.

#### Working Group Chair: **Dr. Perry D. Gross (Atkins)**

Dr. Gross is honored to serve as the initial chair for this working group. He believes that this group will serve as a catalyst for ideas invaluable within the group and among the other working groups working for the future of I-80 Corridor Communities. Dr. Gross holds a PhD in Public Policy and Administration. Beyond facilitating the dialogue of the group, he offers the group perspectives on the implications of public policy on alternative fuels infrastructure.

#### Working Group Co-Chair: **Manju Kumar (NDOT)**

Mr. Kumar offers this working group the cutting edge perspective of research and innovation diffusion.

Date and time:	October 1, 2013 2:00 P.M. PCST / 3:00 P.M. MST	Meeting no:	15
Meeting place:	Teleconference	Minutes by:	Perry
Attendees:	<i>Steve Merrill (NDOT)</i> <i>Mark Wingate (WyDOT)</i> <i>Mike Lawson (Atkins)</i>	<i>Manju Kumar (NDOT)</i> <i>Laycee Kolkman (HDR)</i> <i>Perry Gross (Atkins)</i>	

### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Chat or Mute while individuals get organized for the meeting	2:00	Perry/All
2	Roll call RSVPs and others <i>See the attendee list above</i>	2:05	Perry/All
3	Acquiring GIS data elements – <b>production</b> (geothermal power plants, natural gas power plants, solar farms, hydro power plants, natural gas production fields, wind farms, and coal power plants – <b>distribution</b> (electric transmission lines, electric distribution lines, natural gas lines, electric substations, and natural gas tank storage) – <b>consumption</b> (existing alternative energy stations by type, truck stops, and gas stations)  <i>Meeting attendees reviewed the survey results and concurred. Laycee reiterated that group members should identify existing data sources for inclusion. Steve reaffirmed the existence of geothermal development potential. This discussion revealed a need for our group to coordinate data needs with Alex Paz of UNLV who is conducting the “Land Ferry” study.</i>	2:10	Perry/Shawn/All
4	Review Perry’s draft scenario plot lines combined with situation framework elements  <i>Perry provided the group with background information about his proposed scenario development approach. This included the idea of telling the scenarios through individual family stories, one for each state. This approach draws on the story telling style of James Michener. Perry provided proposed scenarios and rationale for each state family which the group has initially agreed seemed reasonable to pursue. These have been mapped to the situational framework elements that provide the greatest interest. Steve, Manju, Mike, and Perry agreed to collaborate on an initial draft scenario for the Nevada family. This will provide group members with an example of what a scenario might look like for our questions.</i>	2:25	Perry/All
5	Next steps – review meeting calendar for the holiday season  <i>Members agreed to the meeting schedule that was developed for continued work through the holiday season.</i>	2:40	Perry/All
6	Adjourn  <i>The group adjourned about 45 minutes after the hour.</i>	2:45	Perry/All

[Working Groups](#) > [Energy Infrastructure](#) > [Scenario Planning](#)

The Energy Infrastructure Working Group realizes the complexity and uncertainty associated with the future of energy for transportation. As such, we are undertaking Peter Schwartz's **Art of the Long View Scenario Planning**. Schwartz and his colleagues practice a form of scenario planning first undertaken in the early 1970s. The following lays out the journey we are undertaking.

- Identify the *focal issue or decision*.
- Shape a question.
- Review all specific, local factors that affect issue.
- Identify and rank the **driving forces**. Which factors are most important; most certain, or will remain constant throughout any scenario.
- Analyze how driving forces relate to your situation. Look at how driving forces shape the environment including how that might change.
- Generate at least three distinct possible futures. Build each scenario around a specific unifying logic or *plot* (note the examples that follow). Use plots to organize scenario details, events and characters.
- Scenario building team members engage individual specific research about your situation. This ongoing research is discussed within the group in order to generate new possibilities during subsequent discussions.
- Group members must *suspend disbelief* to generate different futures. Devise plots that try out various choices.
- Brainstorm as a team to identify the plot *logics* that fit your focal issue and *flesh out* the story. Work through each scenario's driving forces, predetermined elements, and critical uncertainties.
- Focus on details such as exactly who is involved, how, why, the individual actors and their interactions? How do the plots shift and why.
- Remember that few historical trends continue without modification. Draw on history. Take a specific period of historical change and work back 10 years. What clues hinted that a given change was going to happen? What could you have done to prepare for this change?
- Consider each scenario's implications collectively. What have you learned through these scenarios? Which decision appears sound in which possible futures? Where are they flawed or dangerous? Beware of a decision that works in only one possible future, since you can't be certain that future will happen.
- Finally, complete your scenario building by identifying a few signs to watch for as signals that a given future is coming into being.

## Situational Framework

SCENARIOS	PREDETERMINED ELEMENTS
<b>Winners and losers</b> plot depicts a zero-sum future, where one group wins (survives, gets rich) and the other loses. This plot dominates economics and politics (only one candidate can win), creating a binary world with strategic, often <i>overt alliances</i> .	<b>Demographic Shifts:</b> The retiring Baby Boomers, or grey tsunami and the increasing minority population will change the composition of the work force and mobility preferences.
<b>Challenge and response</b> plot in which one side generates a challenge, the other side shifts or grows in reaction. This plot often begins as a zero-sum, winner-and-loser plot that ends as a mutual gains plot.	<b>Environmental Considerations:</b> Social acceptance of environmental concerns continues facing challenges of beliefs, resources, and entrenched interests.
<b>Evolution</b> plot follow a <i>biological</i> path where continual change occurs in a given direction, <i>either growth or decline</i> . Once you identify these slow-developing scenarios, planning for them is relatively easy. An example might be creating a new robotic machine. People must learn to use it and integrate it before it becomes useful.	<b>Vastness of the West:</b> There are long distances between communities in the west that challenge the provision of infrastructure for competing alternative energy sources.
<b>Revolution</b> plots changes everything in response to a specific event, such as the 1929 stock market crash. Such changes are rare, but important, because they shift how people see the world going forward.	<b>Thresholds and Cascades:</b> While government organizations, policies, preferences for oil, and human adaptation to technology change slowly, they have a relatively high probability of having a threshold past which change will occur quickly.
<b>Cycles</b> plots are common in economics. If you're in a cyclical field, learn to read cues that tell you when the elements in your cycle will change direction. For instance, when the money supply increases, interest rates drop, people borrow more, so they spend more and interest rates go back up.	<b>Views of Society:</b> Broadly, there are different views of society as the Great Society or the Capitalist Society.
<b>Infinite possibility</b> plots make events inevitable and seem as if anything could happen. Some demographic bulges have their own drive such as <i>My Generation</i> in the 1960s based on a sense of identity.	<b>Competing Interests:</b> Fixed resources present either/or decisions such as bio-fuels or food supply.
<b>Lone Ranger</b> plotlines pit a single heroic individual against a system.	
DRIVING FORCES	CRITICAL UNCERTAINTIES
<b>Generational Expectation:</b> Different generational expectation informed by pop culture for older and hyper interconnectedness for younger generations. These different expectations are changing future decision makers.	<b>All the Above:</b> The current broad acceptance that all alternative energy sources are needed for the future appears viable unless oil companies stop diversifying.
<b>Economic and Political Accountability:</b> Increasing attention is being paid to economic and political accountability while exploring new revenue	<b>Regime Change:</b> Elections that change political ideologies at all levels of government influence policy development and implementation.

### Information

sources such as fuel tax, vehicle miles traveled, cap and trade, among others.	
<b>Enabling and Scuttling Policies:</b> There are enabling and scuttling effects of different policies in terms of environmental implications and political influences. Many will want to correct past wrongs.	<b>The Great Recession:</b> The Great Recession likely change how some people act and behave and we are not sure how that will affect the now or when another recession occurs.
<b>Great Expectations:</b> There is wide variability in alternative fuel technologies including the range in expectations for new and innovative technologies (wow factor).	<b>Technological Leaps:</b> We are experiencing an escalation in technological leaps and acceleration in the time between these leaps.
<b>Showing Progress:</b> Human nature is impatient and influenced by T.V., movies, and the media suggesting the need to continually show progress.	<b>Beta verses VHS:</b> Businesses often seek a competitive advantage by introducing proprietary products for similar functionality.
<b>Mutually Beneficial:</b> Economic development pressures and homegrown renewable power generation can be mutually beneficial pursuits.

### Freight and Logistics

Freight and logistics rely on mobility. This group is exploring the complex interactions livability principles have with freight and logistics mobility.

#### Mission Statement:

*The mission of the I-80 CSMP Freight and Logistics working group is to thoroughly investigate all issues relevant, important, and actionable regarding the topic of freight mobility and the I-80 corridor from San Francisco to Cheyenne.*

#### Topics for further development:

The following topics are being explored by the working group:

- 1- Overdimensional permits – conformity amongst States and ease of credentialing
- 2- Freight Performance Measures
- 3- Tax equity and innovations – Impacts to industry of Distance based proposals
- 4- Freight data – types and relevancy
- 5- Truck Bypass/designated lanes for Urban areas
- 6- Truck Parking Working group
- 7- Intermodal freight connectivity
- 8- Industry issues (need input)
- 9- Commercial Vehicle enforcement issues (need input)
- 10- State Agency issues (need input)
- 11- MPO issues (need input)

#### Objectives, Goals, Deliverables:

**Objective:** Engage in a dialog that identifies relevant issues and best practices with regard to freight movement in the I-80 corridor

**Goal:** Determine the existing condition(s) of each topic, identify gaps and/or unmet needs, and develop actions to address deficiencies.

**Deliverables:** Technical memorandums for each topic that define the existing condition, best practices, unmet needs, and proposed actions to address deficiencies.

The following documents provide freight and logistics related information.

### Working Group Chair: Michael W. Lawson (Atkins)

Mike Lawson has 35 years of experience in traffic and safety planning. Prior to joining Atkins, he was division head of the Nevada Department of Transportation (NDOT) traffic information division. While with NDOT, Mr. Lawson was responsible for developing the annual State Vehicle Size and Weight Enforcement Plan in cooperation with the Nevada Highway Patrol, and for developing vehicle size and weight regulations and laws.

### [Meeting # 4](#)

<b>Group:</b>	I80 CSMP Freight and Logistics Working Group		
<b>Subject:</b>	Subtopics, NDOT Freight plan, GIS, Winter coalition freight report		
<b>Date and time:</b>	August 7, 2013 2:00 P.M. PDST	<b>Meeting no:</b>	4
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Lawson
<b>Attendees:</b>	TBD		

### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees	2:00	Lawson/All
2	Review the list of subtopics & report status of them since last meeting	2:05	Lawson/All
3	Report on status of NDOT freight plan creation	2:10	Bill Thompson
4	Discuss GIS data needs & availability	2:20	Lawson/All
5	Review and discuss relevancy of I80 Winter coalition Freight and Logistics report	2:30	Lawson/UDOT
6	Next steps & Adjourn	2:45	

### [Meeting # 3](#)

<b>Group:</b>	I80 CSMP Freight and Logistics Working Group		
<b>Subject:</b>	Identifying subtopics and deliverables		
<b>Date and time:</b>	May 29, 2013 10:00 A.M. PDST	<b>Meeting no:</b>	3
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Lawson
<b>Attendees:</b>	Coy Peacock Dale Lindsey	Mike Lawson Joseph Aguilar	Jeff Richter

### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees <i>Members were called on and asked to identify who was participating on the call</i>	2:00	Lawson/All
2	Review the list of subtopics identified in meeting 2 and establish leaders for each subtopic  <i>Jeff Richter volunteered to lead the overdimensional permit subtopic conversation and has already provided the leadership team with a draft white paper from the Nevada perspective. Joseph</i>	2:10	Lawson/All

## Join Our Discussion

## I-80 CSMP Group Discussions

## Information

*Aguilar volunteered to lead the discussion on the Truck parking subtopic. Dale Lindsey volunteered to lead the discussion on the performance measures subtopic.*

3	Identify and agree to subtopic recruitment protocols <i>Due to the limited participation this agenda item was tabled</i>	2:30	Lawson/All
4	schedule initial meetings of subtopic discussion groups <i>Due to the limited participation this agenda item was tabled</i>	2:45	Lawson/All
5	Next steps <i>Jeff Richter volunteered to prepare a draft white paper for the subtopic of overdimensional permits</i>	2:50	Lawson/All
6	Adjourn <i>Meeting was adjourned at 2:15 P.M. PST</i>	3:00	

## **Meeting # 2**

<b>Group:</b>	180 CSMP Freight and Logistics Working Group		
<b>Subject:</b>	Organizing the group		
<b>Date and time:</b>	February 21, 2013 1:15 P.M. PST	<b>Meeting no:</b>	2
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Lawson
<b>Attendees:</b>	<i>Mike Lawson (Atkins)            Bill Thompson (NDOT)            Coy Peacock (NDOT)            Brian Kramer (NDOT)            Mike Murphy (NDOT)            Val Halford (WFRC)            Jeff Mournon (Caltrans)            Bill Bainter (NHP)</i>	<i>Jeff Richter (NDOT)            Peter Bang (Washoe RTC)            Tony Riviera (NDOT)            Ben Craig (NDOT)            Bryan McCurdy (NDOT)            Brian Kramer (NDOT)            Mark Wingate (WyDOT)</i>	

## **Agenda**

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees <i>Members were called on and asked to identify who was participating on the call.</i>	1:15	Lawson/All
2	Review the purpose of Working Groups to better inform the larger Task Forces about their topic and subtopics <i>The following Mission statement was approved by consensus of the group at the second meeting of the 180 CSMP Freight and Logistics working group meeting:</i>  <b><i>“The mission of the I-80 CSMP Freight and Logistics working group is to thoroughly investigate all issues relevant, important, and actionable regarding the topic of freight mobility and the I-80 corridor from San Francisco to Cheyenne”.</i></b>	1:25	Lawson/All
3	Identify an initial list of subtopics for the Working Group to explore <i>The following topics were proposed for discussion at the second meeting of the 180 CSMP Freight and Logistics working group meeting and approved for further consideration:</i>  1- Overdimensional permits – conformity amongst States and ease of credentialing 2- Freight Performance Measures 3- Tax equity and innovations – Impacts to industry of Distance based proposals 4- Freight data – types and relevancy 5- Truck Bypass/designated lanes for Urban areas	1:35	Lawson/All

- 6- Truck Parking Working group
- 7- Intermodal freight connectivity
- 8- Industry issues
- 9- Commercial Vehicle enforcement issues
- 10- State Agency issues
- 11- MPO issues

**Process for developing Topics:**

*The following process for developing the topics was proposed at the second meeting of the I80 CSMP Freight and Logistics working group meeting and approved by consensus:*

- 1- Identify a "volunteer" to lead discussion for each topic
- 2- Identify working group members to assist in development of each topic
- 3- Identify a mechanism to facilitate development of each topic matter (teleconferences of topic groups?)
- 4- Establish how existing documents can be identified to inform each discussion and how they will be compiled.

*Establish time frames for "topics reporting" back to the working group*

4	<p>Begin establishing goals and objective for the Working Group including deliverable that makes sense to the group. Additional work on goals, objectives, and deliverables will be done through surveys and reported in meeting 3.</p> <p><i>The following Objectives, Goals, and Deliverables were proposed and approved by consensus at the second meeting of the I80 CSMP Freight and Logistics working group meeting:</i></p> <p><i>Objective: Engage in a dialog that identifies relevant issues and best practices with regard to freight movement in the I-80 corridor</i></p> <p><i>Goal: Determine the existing condition(s) of each topic, identify gaps and/or unmet needs, and develop actions to address deficiencies.</i></p> <p><i>Deliverables: Technical memorandums for each topic that define the existing condition, best practices, unmet needs, and proposed actions to address deficiencies.</i></p>	1:45	Lawson/All
5	<p>Next steps including identifying additional working group members</p> <p><i>Members were asked to send Mike the names of potential participants via email. The group agreed to have meetings begin at 1:15 on Thursday in two weeks.</i></p>	2:00	Lawson/All
6	<p>Adjourn</p> <p><i>Meeting was adjourned at 2:15P.M. PST</i></p>	2:15	

 [Subscribe to posts](#)

**Meeting # 1**

posted Jan 11, 2013, 3:33 PM by Page Smith [ updated Sep 30, 2013, 1:36 PM ]

<b>Group:</b>	I80 CSMP Freight and Logistics Working Group		
<b>Subject:</b>	Organizing the group		
<b>Date and time:</b>	February 14, 2013 1:00 P.M. PCST	<b>Meeting no:</b>	1
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Mike Lawson
<b>Attendees:</b>	Mike Lawson (Atkins), Bill Thompson (NDOT), Coy Peacock (NDOT), Bill Bainter (NHP), Brian Kramer (NDOT), Mike Murphy (NDOT), Steve		

**Agenda**

<b>ITEM</b>	<b>DESCRIPTION</b>	<b>TIME</b>	<b>RESPONSIBLE</b>
1	Roll call from RSVP and other attendees <i>Members were called on and asked to identify who was participating on the call.</i>	1:00	Mike/All
2	Presentation of I-80 CSMP study background <i>Mike provided a brief explanation of how the initial work among the study Task Forces initiated the Working Groups to explore in depth specific corridor significant topics. The organization of the working groups uses the study web site to facilitate the group's dialogue. Once the group has charted a course, we will inform the Task Forces and refine our work. Additionally, we will take on the work of exploring the implications of liveability principles for the corridor communities</i>	1:10	Perry/Mike
3	Establish ground rules for how to best engage in conference calls and other group activities <i>The group discussed an agreed: 1) that everyone would mute their phones during the call unless speaking; 2) the meetings would start promptly at 1:15; 3) members would announce who they are when they start speaking</i>	1:20	All
4	Review the stakeholder primer that establishes how to use the web site and RSS feeds <i>Attendees were directed to <a href="http://www.i80vision.org">www.i80vision.org</a> to review some of the Study web site functionality meant to facilitate group dialogue.</i>	1:30	Mike/Perry
5	Next steps including identification of additional working group members <i>Members were asked to send Mike the names of potential participants via email. The group agreed to have meetings begin at 1:15 on Thursday for the next two weeks.</i>	1:55	Mike/All
6	Adjourn <i>Meeting was adjourned at 1:30 P.M. PST</i>	2:00

### [Working Groups >](#) **GIS Across the States**

Modern planning and decision-making are enhanced by the visual nature of geographic information. Many jurisdictions, such as Utah's U-Plan, are finding great success working with all stakeholders to explore the implications various courses of action suggest. Below are some useful documents.

California Interregional Blueprint Draft Interim Report  
<http://www.dot.ca.gov/hq/tpp/californiainterregionalblueprint/>

UDOT LRP Projects GIS

### Maintenance

This working group will share best practices for maintaining the range of mobility infrastructure throughout the corridor including emerging innovations. This work is crucial for the competitiveness of the corridor with other corridors in western North America.

### Working Group Chair: Michael W. Lawson (Atkins)

Mike Lawson has 35 years of experience in traffic and safety planning. Prior to joining Atkins, he was division head of the Nevada Department of Transportation (NDOT) traffic information division. While with NDOT, Mr. Lawson was responsible for developing the annual State Vehicle Size and Weight Enforcement Plan in cooperation with the Nevada Highway Patrol, and for developing vehicle size and weight regulations and laws.

Maintenance Working Group members provide professional service in realizing the greatest benefits in corridor communities and organizations investments in infrastructure.

### Managed Lanes/Tolling

The managed lanes/tolling working group have been combined with the program/project delivery working group. Combining these two working groups ensures the dialogue each group would have likely generated now fully considers the implications for each line of inquiry. It is envisioned that these combined conversations will more fully explore public policy issues associated with managed lanes/tolling as well as alternative delivery techniques and methods.

### [Working Groups](#) > **MAP 21**

Federal transportation authorizations influence policy across all levels of government. This working group brings together stakeholders to engage in an open dialogue about how different organizations are working with Congress' MAP 21 legislation. Tentative topics for discussion include:

- Impacts to bicycle and pedestrian funding
- Scenic byway update
- Agency prioritization of types of projects
- Eligible transfer between funding categories
- Safety initiatives
- Freight initiatives
- Performance management - measurement requirements
- Expedited delivery
- Intelligent transportation system initiatives
- Livability initiatives
- Pavement preservation initiatives
- Creating jobs
- Supporting economic growth
- Innovative finance
- Structure replacement initiatives
- Implementation challenges
- Among other topics

A full description of the authorizing legislation can be found at [MAP 21](#)

<b>Date and time:</b>	May 23, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	6
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	<i>Rick Helman for Jeff Pulverman (Caltrans D3)</i> <i>Mark Wingate (WyDOT)</i> <i>Kent Cooper (C-A Group)</i>	<i>Jim Caviola (C-A Group)</i> <i>Coy Peacock (NDOT)</i> <i>Perry Gross (Atkins)</i>	

**Agenda**

ITEM	DESCRIPTION
1	Chat or Mute for individuals to organize for the meeting
2	Roll call for RSVP and other attendees. <i>See about for attendance.</i>
3	Brief presentation on creating jobs, supporting economic growth, and innovative finance. <i>Perry provided a presentation based on Federal Highway Administrations initial white paper just after passage of MAP 21. Freight movement and economic vitality coupled with reduced project delivery delays are performance management elements linked to jobs and economic growth. Projects of National and Regional Significance will provide competitive general fund resources for initiatives beyond traditional sources of resources. Transportation Infrastructure Finance and Innovation Act provides a lending source for transportation infrastructure. Ultimately, State DOTs and MPOs are being evaluated by US DOT with a report to congress due by October 2017.</i>
4	Group discussion on clarification, implications, and interpretations. <i>Things to consider: Audience(s) for jobs, economic, and innovation performance information; Level of analysis and reporting-project, program, initiative, other; Sources of data-new, existing, Department of Labor, state and local economic development; and Data relationships-inferential, causal, interpretive, other.</i>
5	Next steps <i>The group agreed to scheduling the next conference call meeting for June 6, 2013 at 2mp Pacific/3pm Mountain time. The conversation will focus on potentially participating in federal rule-making as a four-state I-80 Corridor group.</i>
6	Adjourn

**Meeting 5**

<b>Group:</b>	I80 CSMP MAP 21 Working Group		
<b>Subject:</b>	Goals, Objectives, and Deliverables; Information Needs; Task Force Presentation		
<b>Date and time:</b>	May 1, 2013 2:30 P.M. PCST	<b>Meeting no:</b>	5
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Mike
<b>Attendees:</b>	<i>Rick Helman for Jeff Pulverman (Caltrans D3)</i> <i>Tim Rose (UDOT)</i> <i>Mark Wingate (WyDOT)</i> <i>Debra Goodwin for Amy Cummings (Washoe Regional Transportation Commission)</i>	<i>Tom Mason (Cheyenne Metropolitan Planning Organization)</i> <i>Andrea Napoli (NDOT)</i> <i>Coy Peacock (NDOT)</i> <i>Mike Lawson (Atkins)</i>	

**Agenda**

ITEM	DESCRIPTION
1	Chat or Mute for individuals to organize for the meeting
2	Roll call for RSVP and other attendees <i>See above for attendees.</i>
3	Review and add to the preliminary list of MAP 21 topics for investigation <i>The group continues adding topics as well as organizing and combining topics as we begin our assessment of the implications of MAP 21.</i>
4	Choose topics for group members to report back to the group. <i>Three initial topic sets are slated for discussion. Perry will gather information on jobs, economic growth, and innovative finance. Tim will provide information on Utah's expedited delivery experiences. Kent will gather information from the stakeholders about their positions on performance management for the group to consider.</i>
5	Adjourn

#### Meeting 4

posted Apr 24, 2013, 11:02 AM by Page Smith [ updated Sep 30, 2013, 1:59 PM ]

<b>Group:</b>	I80 CSMP MAP 21 Working Group		
<b>Subject:</b>	Topics and Analysis Strategies		
<b>Date and time:</b>	April 24, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	4
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	<i>Rick Helman for Jeff Pulverman (Caltrans D3)</i>	<i>Kent Cooper (C-A Group)</i>	
	<i>Mark Wingate (WyDOT)</i>	<i>Jim Caviola (C-A Group)</i>	
	<i>Nancy Olson for Tom Mason (Cheyenne MPO)</i>	<i>Coy Peacock (NDOT)</i>	
		<i>Mike Lawson (Atkins)</i>	

ITEM	DESCRIPTION
1	Chat or Mute for individuals to organize for the meeting
2	Roll call for RSVP and other attendees <i>Note attendees above.</i>
3	Working Group goal and vision review <i>Attendees generally felt the goal and vision captured the sense of the group and what they want to accomplish.</i>
4	Topic identification and analysis strategies <i>Perry indicated that he would send a series of surveys to begin developing the list of topics and organizing them for exploration by individual group members. Kent suggested that we actively recruit federal representation for the group across all the states. Mike indicated he had a list of federal individuals to reach out to.</i>
5	Performance measurement discussion <i>Caltrans has an initial series of quantitative performance measures for corridor system master plans. Generally, the group want to advocate for performance measures that are meaningful to individual organization than relying on federally mandated performance measures. This is going to be an informative discussion.</i>
6	Adjourn

#### February 27, 2013 (Meeting 3)

posted Jan 7, 2013, 12:29 PM by Page Smith [ updated Sep 30, 2013, 2:00 PM ]

<b>Group:</b>	I80 CSMP MAP 21 Working Group		
<b>Subject:</b>	Goals, Objectives, and Deliverables; Information Needs; Task Force Presentation		
<b>Date and time:</b>	February 27, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	3
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	<i>Rick Helman for Jeff Pulverman (Caltrans D3)</i> <i>Mark Wingate (WyDOT)</i> <i>Debra Goodwin for Amy Cummings (Washoe Regional Transportation Commission)</i>		<i>Tom Mason (Cheyenne Metropolitan Planning Organization)</i> <i>Andrea Napoli (NDOT)</i> <i>Coy Peacock (NDOT)</i> <i>Mike Lawson (Atkins)</i>

ITEM	DESCRIPTION
1	Chat or Mute for individuals to organize for the meeting <i>The group took a few minutes to organize for the meeting.</i>
2	Roll call for RSVP and other attendees <i>Note the attendees above.</i>
3	Refine initial thoughts on goals, objectives, and deliverables and their implication for the group's work. <i>Andrea noted that she had provided Perry with some MAP 21 implementation material for him to organize for the group's consideration and that needed to be done. Coy indicated NDOT was producing MAP 21 required informational materials and would like group insights.</i>
4	Identify additional sources of information (list of initial information needs to be developed) <i>Tom indicated that his organization has relevant information for other working groups and that hyperlinks on the study web page would be helpful. Mike strongly encouraged the group members to provide those links and have them included in the web pages.</i>
5	Develop a brief presentation for the Task Forces to explain what the group plan to accomplish <i>Mike reviewed agenda items for the March 12, 2013 Joint Task "Force status meeting. Further, since Perry had not provided the draft presentation group members indicated they would wait to provide comment. Coy emphasized the group's potential for providing exemplary MAP 21 compliance by the end of the year thus demonstrating collaboration among corridor stakeholders.</i>
6	Adjourn <i>Adjourned at 2:28pm PST/3:28pm MST.</i>

### **February 13, 2013 (Meeting 2)**

posted Jan 7, 2013, 12:20 PM by Page Smith [ updated Mar 7, 2013, 3:52 PM ]

<b>Group:</b>	I80 CSMP MAP 21 Working Group		
<b>Subject:</b>	Status Reports; Rule Making Review; Goals, Objectives, and Deliverables		
<b>Date and time:</b>	February 13, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	2
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	<i>Mark Wingate (WyDOT)</i> <i>Rick Helman for Jeff Pulverman</i> <i>Ned Hacker for Doug Hattery (Wasatch Front Regional Council)</i> <i>Coy Peacock (NDOT)</i> <i>Tom Mason (Cheyenne Metropolitan Planning Organization)</i> <i>Carl Hasty (Tahoe Transportation District)</i>		<i>Shawn Seager (Mountainland Association of Governments)</i> <i>Andrea Napoli (NDOT)</i> <i>Kristine Absher (Atkins)</i> <i>Laycee Kolkman (HDR)</i> <i>Danja Petro (Atkins)</i> <i>Perry Gross (Atkins)</i>

ITEM	DESCRIPTION
------	-------------

- |   |  |
|---|--|
| 1 | Chat or Mute while individuals get organized for the meeting<br><i>Group members were given an explanation fo the chat or mute beginning of the conference call meeting.</i>   |
| 1 | Roll call for RSVP and other attendees<br><i>Roll call attendees are noted above. Tom and Shawn were new to the group and provided some background context for the I-80 Corridor System Master Plan study and this working group by Perry.</i>   |
| 2 | Brief summary of ongoing MAP 21 related activities among meeting attendees<br><i>Perry suggested to the group ideas about the benefits of this detailed discussion of the federal transportation authorization including how other working groups might draw on the work. Carl emphasized the relationship between transportation and economic development as a potential focus for the group.</i>   |
| 3 | Overview of federal rule making with discussion of experiences<br><i>This item was deferred to future discussions.</i>   |
| 4 | Brainstorm potential Working Group deliverables that makes sense to the group. Additional work on goals, objectives, and deliverables in meeting 3 to present to Task Forces<br><i>The group identified potential individual and professional organizational information useful for the group's discussion. It is noted that individual organizations were also coordinating their efforts with existing coalitions such as the "Five State Coalition". The defining of planning performance measures through the group's dialogue appears valuable. Coy advocated for this group to provide a forum for each of the member organizations to gather additional insights for enhancing the work they are undertaking. The group generally recognized that performance measures, the spectrum of advocacy documentation, and the group's collective integration for enhancing individual implementation of MAP 21 (and future) federal authorizations would be valuable.</i> |
| 5 | Next steps including identifying additional working group members<br><i>Perry indicated he needed to compile and organize for additional group consideration. Carl identified the distinction for rural and urban advocacy within the dialogue about the corridor. Perry described potential relationships between the different study working groups that could accommodate the needs of all jurisdictions within the study and beyond.</i>   |
| 6 | Adjourn<br><i>Adjourned at 2:40pm PST/2:40pm MST.</i>  |

### **February 6, 2013 (Meeting 1)**

posted Jan 7, 2013, 12:17 PM by Page Smith [ updated Mar 7, 2013, 9:55 AM ]

<b>Group:</b>	I80 CSMP MAP 21 Working Group		
<b>Subject:</b>	Organizing the Group		
<b>Date and time:</b>	February 6, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	1
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	<i>Ned Hacker for Doug Hattery (WFRC) Rob &amp; Al for Bruce De Terra (Caltrans HQ) Mark Wingate (WyDOT) Tim Rose (UDOT)</i>	<i>Nieves Castro for Jeff Pulverman (Caltrans D3) Coy Peacock (NDOT) Mike Lawson (Atkins) Perry Gross (Atkins)</i>	

### **Agenda**

<b>ITEM</b>	<b>DESCRIPTION</b>
1	Roll call for RSVP and other attendees <i>The meeting convened at 2:04.</i>
2	Presentation of I-80 CSMP study background <i>Perry provided a brief review for attendees that reviewed the formulation of the working groups based on the original work many of the attendees performed in 2012. The group was provided with an overview of how the working group would coordinate with broader corridor stakeholders</i>

through the study task forces including the implications of liveability.

---

3 **Brainstorm ground rules for how to best engage in conference calls**

*Perry reviewed the fundamental elements of dialogue that allow group members interact in way that foster creativity and innovation. Group members added that muting phones reduced background noise and announcing who is speaking were important. Further, it was noted that the sound of "crickets" was uncomfortable and we should strive to reduce as much as possible periods of silence.*

---

4 **Review the stakeholder primer that establishes how to use the web site and RSS feeds (presentation/discussion)**

*Most attendees were unfamiliar with RSS reader functionality and being able to "pull" information from their favourite internet sources. Perry provided a brief summary of the usefulness of RSS readers and said he would provide group members a overview document so they could establish their own RSS feeder accounts.*

---

5 **Next steps including identification of additional working group members**

*Attendees were queried about additional recruitment for the group's dialogue. Three additional members were identified with the understanding that other potential group members would be represented within the larger study task forces.*

---

6 **Adjourn**

*The meeting adjourned at 2: 53pm PCST/3::53pm MST.*

---

### Mobility/Operation

Realizing the full benefits of the public's investment in the Interstate system requires focus on the continuous operations of the system. This working group will provide a forum for operations professional across all corridor jurisdictions to engage in dialogue.

### Program/Project Delivery

Increasingly, organizations seek innovative techniques for performing traditional and emerging program and project delivery. This working group will exchange best practices and generate an environment for exploring the full potentiality of the delivery processes.

This working group will also explore managed lanes as a way to proactively address corridor congestion within the constraints of limited resources. Currently, local and state agencies are challenged with building enough capacity to keep up with the growing demand. Influencing factors include:

- Increased construction cost
- Right-of-way constraints
- Environmental concerns
- Social impacts
- Reduced revenue stream and transportation funding crises
- Operational challenges stemming from adding more lanes of traffic

The group will discuss these concerns and their relevancy along the corridor, identify the current status of managed lanes, share experiences among states, and explore strategies to better manage the flow of the existing facility. Additionally, the group will focus discussions on the gaps that exist in the legal framework supporting the implementation of some strategies. Managed lanes strategies that will be explored may include:

- Express lanes
- Reversible lanes
- High-occupancy vehicle (HOV) lanes
- Truck lane restrictions
- Exclusive truck facilities
- Exclusive bus lanes
- Use of HOV lanes by other vehicle groups
- Toll lanes
- Value-priced lanes
- High-occupancy toll (HOT) lanes

The intent of the work is to provide task forces and decision-makers a prioritized action plan for moving forward. It is also intended to provide participating agencies with a range of workable and cost-effective transportation alternatives that address current and future needs. These alternatives will be qualitatively assessed for their socioeconomic, community, environmental, and fiscal impacts.

### Collaborative Planning

The contemporary decision making environment is complex and often contentious. Effective public engagement provides invaluable local knowledge for enhancing decision making processes. Further, such engagement efforts are likely to be crucial for addressing many of the long range issues we face in perpetuating our world-class public infrastructure. We will engage and learn together how to fully engage all transportation stakeholders. Useful documents include:

posted Oct 2, 2012, 9:10 AM by Page Smith [ [updated Oct 2, 2012, 9:12 AM](#) ]

Please join us for a short conversation to discuss the formation of a public engagement working group as part of the I-80 Corridor System Master Plan study (CSMP). Agenda topics include:

1. Purpose of the CSMP study and overview of the public engagement working group
2. Recruiting others to the conversation
3. Project schedule and working group products

Please feel free to forward this invitation to others who might be interested in the working group. And if you have any questions, please let me know. Thanks, we look forward to talking with next week!

**Call-in information:**  
**1.866.214.0726**  
**974924**

\*\*Below is a draft description of the Public Engagement working group for more information:

This working group explores the experiences and strategies members have in engaging the different stakeholder groups involved with mobility. Mobility is a critical issue for the economic viability and vitality within and among communities. Effective decision-making requires an equally effective exploration of the different issues and perspectives among mobility stakeholders. By engaging a wide range of working group members, we will be able to identify engagement strategies to meet the needs of the many different contexts in which organizations engage mobility stakeholders.

The engagement working group will undertake biweekly discussions of working group member's experiences and successes with stakeholder engagement. The group will continuously compile this biweekly meeting information to generate comprehensive documentation. Drawing on the knowledge and experiences of this working group's members will generate the foundational information for linking planning with potential National Environmental Policy Act work in the future. Potential topics for this documentation include:

Best practices;  
Accomplishments;  
Types and examples of agreement mechanisms;  
Community and neighborhood engagement strategies;  
Governmental relations and engagement among federal, state, MPO, and local jurisdictional organizations;  
Environmental justice community engagement;  
Compilation of Missions, visions, and goals;  
Among other potential topics.

The working group will be comprised of individuals with continuous engagement experiences, punctuated experiences, and engagement advocacy experiences. For example, individuals who facilitated comprehensive studies, public information officers, nonprofit advocacy, and elected officials, among others, will benefit from and enrich these conversations. Ultimately, this working group will generate a comprehensive understand the processes strategies invaluable for consensus-based decision-making.

Individuals in this working group will be involved with half hour to one hour biweekly conference call discussions as well as other information exchange activities. Members of the working group will likely provide briefing updates to other I 80 corridor working groups and to the larger taskforces engaged in the study. Further, they should communicate within their organizations about nature and results of the working group's dialogue.

### [Working Groups](#) > **Rural Planning**

Welcome to the Rural Planning Working Group. Rural communities represent the historic, evolving, and potential for the bright and vibrant future we are all striving to achieve with our efforts in this I-80 Corridor System Master Plan Study. As members of rural communities, members of this working group are likely to engage in a diverse set of conversations about multiple topics. The list of documents below demonstrate the potential diversity of dialogue topics. Please contact [Perry Gross](#) to request to join this working group. Our meeting agendas are located under the Meetings tab for our Working Group.

Here are some dialogue resources:

### Rural Planning Working Group Chair: Dr. Perry D. Gross (Atkins)

Dr. Gross brings his distinct experiences of living in and around rural communities along the I-80 corridor to his facilitation of this working group's dialogue. Beyond facilitating the dialogue of the group, he offers the group perspectives of relationships between federal, state, regional, and local governments; trends in transportation policy; political theory; among others. Ultimately, Dr. Gross looks forward to drawing on the extensive knowledge and experience of this group's members to assist in meeting the many different challenges facing the future of rural communities along the I-80 corridor.

### Rural Planning Working Group Co-Chair: Tim Mueller (NDOT)

Mr. Mueller managed a long range, statewide planning study titled Connecting Nevada. These experiences as well as his other diverse planning experiences provide Tim with insights into the dynamics of rural communities. These insights will assist us in examining the entire breadth of issues influencing mobility, economic vitality, and our collective futures.

### [March 7, 2013 \(Meeting 3\)](#)

posted Jan 7, 2013, 12:55 PM by Page Smith [ updated Feb 19, 2013, 4:27 PM ]

<b>Group:</b>	I80 CSMP Rural Planning Working Group		
<b>Subject:</b>	Draft Goals and Objectives: Livability: Task Force Presentation		
<b>Date and time:</b>	March 7, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	3
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	TBD		

#### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees	2:00	Perry/All
2	Review the results of the goals, objectives, and deliverables survey results and their implication for the group's work (discussion of web survey results)	2:10	Perry/All
3	Identify additional sources of information (list of initial information needs to be developed) (brainstorming)	2:20	Perry/All
4	Introduce the livability self assessment concept and proposed process for connecting topics to livability principles	2:30	Perry/All
5	Develop a brief presentation for the Task Forces to explain what the group plan to accomplish (brainstorm)	2:50	Perry/All
6	Adjourn	3:00	

### [\(Postponed\) February 28, 2013 \(Meeting 2\)](#)

posted Jan 7, 2013, 12:46 PM by Page Smith [ updated Feb 28, 2013, 12:46 PM ]

<b>Group:</b>	I80 CSMP Rural Planning Working Group		
<b>Subject:</b>	Identifying Initial Goals and Objectives: Subtopics		
<b>Date and time:</b>	February 28, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	2
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	TBD		

#### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees	2:00	Perry/All
2	Review the organization of Working Groups to better inform the larger Task Forces about their topic and subtopics (presentation/discussion)	2:10	Perry/All

## I-80 CSMP Group Discussions

### Information

3	Identify an initial list of subtopics for the Working Group to explore (brainstorming)	2:20	Perry/All
4	Begin establishing goals and objective for the Working Group including deliverable that makes sense to the group. Additional work on goals, objectives, and deliverables will be done through surveys and reported in meeting 3 (brainstorming)	2:40	Perry/All
5	Next steps including identifying additional working group members (discussion)	2:55	Perry/All
6	Adjourn	3:00	

### February 7, 2013 (Meeting 1)

posted Jan 7, 2013, 12:41 PM by Page Smith [ updated Sep 30, 2013, 3:55 PM ]

<b>Group:</b>	I80 CSMP Rural Planning Working Group		
<b>Subject:</b>	Organizing the Group		
<b>Date and time:</b>	February 7, 2013 2:00 P.M. PCST	<b>Meeting no:</b>	1
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Perry
<b>Attendees:</b>	Chris Melville (City of West Wendover) Coy Peacock (NDOT) Andrea Napoli (NDOT)	Mike Lawson (Atkins) Perry Gross (Atkins)	

### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call for RSVP and other attendees  <i>Roll call was impeded by attendees being provided call in logistics that had transposed numbers. Perry apologizes profusely to all group members for the incorrect information.</i>	2:00	Perry/All
2	Presentation of I-80 CSMP study background  <i>Perry provided a description of the study background that emphasized the fundamental focus on corridor communities. This working group will provide study stakeholders with the information and issues germane to rural communities. Ultimately the ideas and strategies generated by this group will enhance transport decision making moving forward.</i>	2:10	Perry
3	Establish ground rules for how to best engage in conference calls and other group activities (discussion of types of ground rules)  <i>Coy has participated in many working group meetings as the NDOT study manager and provided a thoughtful suggestion. He suggested compiling a list of ground rules suggested by all working groups for consideration by all other working groups. Perry and other attendees agrees and the list is being compiled for future consideration by this and other groups.</i>	2:20	All
4	Review the stakeholder primer that establishes how to use the web site and RSS feeds (presentation/discussion)  <i>Instead of a presentation the group discussed familiarity with RSS technology and decided to send the brief reviews to all attendees.</i>	2:30	Perry
5	Next steps including identification of additional working group members  <i>Chris identified several other potential group members to be recruited. He also agreed to review the list of working groups to identify other groups for City of West Wendover participation.</i>	2:55	Perry/All
6	Adjourn	3:00	

*Meeting adjourned at 2:37pm PXT/3:37pm MST.*

### [Working Groups](#) > **Safety**

This group is exploring the interactions between livability principles and safety.

#### **Mission Statement:**

*The mission of the I-80 CSMP Safety working group is to thoroughly investigate all issues relevant, important, and actionable regarding the topic of safety on I-80 and affecting communities along the corridor from San Francisco CA to Cheyenne WY.*

#### **Topics for investigation:**

The following topics are being explored by the working group:

1. Engineering Safety Solutions
2. Speed Management
3. Map pertinent SHSP Goals to relevant Livability Principals
4. TIMs, Enforcement Coordination & EMS Coordination
5. ITS
6. Safety Education / Behavioral issues
7. Funding of Non-Infrastructure Measures
8. Vulnerable Road Users

#### **Objectives, Goals, Deliverables:**

*Objective:* Engage in a dialog that identifies relevant issues and best practices with regard to safety in and along the I-80 corridor

*Goals:* Determine the existing condition(s) of each topic, identify gaps and/or unmet needs, and develop actions to address deficiencies. Map the state's pertinent SHSP Goals to relevant livability principals.

*Deliverables:* Short technical memorandums for each topic that define the existing condition, best practices, unmet needs, and proposed actions to address deficiencies. Technical memorandum documenting the mapping of pertinent SHSP Goals to relevant livability principals.

### [Meeting #23, April 15, 2014, 10am PST](#)

posted Mar 18, 2014, 12:26 PM by Page Smith [ updated Mar 27, 2014, 7:06 PM ]

<b>Group:</b>	I-80 CSMP Safety Working Group		
<b>Subject:</b>	Review of Topic Papers		
<b>Date and time:</b>	April 15, 2014, <a href="#">10:30A.M. PST</a>	<b>Meeting no:</b>	23
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Andy Blanchard
<b>Attendees:</b>	TBD		

### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call	10:30	Andy/All
2	Update on the overall I-80 CSMP Project	10:33	Andy/Coy
3	Discussion on GIS layers for the Safety WG	10:35	All
4	Discussion on legacy structure of the Safety WG	10:50	All
5	Adjourn	11:15	

### [Meeting #22, March 18, 2014, 9am PST](#)

posted Feb 18, 2014, 11:58 AM by Page Smith [ updated Mar 18, 2014, 12:24 PM ]

<b>Group:</b>	I80 CSMP Safety Working Group (WG)		
<b>Subject:</b>	Sub-Topic Discussions		
<b>Date and time:</b>	March 18, 2014, 9:00 A.M. PST	<b>Meeting no:</b>	22
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Andy Blanchard (AGB)
<b>Attendees:</b>	<i>Craig Copelan (Caltrans)</i> <i>Coy Peacock (NDOT)</i> <i>Shawn Frye (HDR)</i>	<i>Patrice Echola (RTC Washoe)</i> <i>P.D. Kiser (NDOT)</i> <i>Andy Blanchard (Atkins) (Co-Chair)</i>	

ITEM	DESCRIPTION
1	Roll call
2	Update on the overall I-80 CSMP Project <ul style="list-style-type: none"> <li>The latest project "newsflash" was released last week – AGB to make sure everyone in the Safety WG is on the distribution list.</li> <li>The first I-80 Implementation Task Force meeting was held last Thursday. They will be meeting every week to review and approve the project deliverables, and establish the legacy structure after the consultant team has completed their tasks on the project. This Thursday the task force will be reviewing the first two topic papers from the Safety WG.</li> <li>A webinar tutorial on the GIS mapping tool was held last Monday. This tutorial will be</li> </ul>

## Join Our Discussion

## I-80 CSMP Group Discussions

## Information

available through the project website later this week. The GIS mapping is currently accessible through the home page of the project website. AGB to send out an email to WG members to request identification of any missing GIS safety data layers.

- 
- 3      Review and update of Topic Papers
- Attendees reviewed the draft Topic Papers distributed prior to the meeting:*
- *Intelligent Transportation Systems (v1.2) – changes recorded in v1.3*
  - *Vulnerable Road Users (v1.3) – changes recorded in v1.4*
- During the discussion, the dangers of speed differentials between trucks and other road users on grades was raised, particularly as it applies to new or expanded mining operations along I-80. The final version of the speed management topic paper will be revised to include specific reference to the mining trucks and potential methods to address this issue – flashing vehicle beacons, static and DMS warning signs, climbing lanes, revisions to environmental permitting process*
- 
- 4      Discussion on legacy structure of the Safety WG
- Tabled to next meeting*
- 
- 5      Adjourn - the meeting adjourned at 9:58 A.M. PST
- Next meeting    April 15 at 10am, PST – to agree GIS and legacy structure of Safety WG
- 

**Meeting #21, February 18, 2014, 9am PST**

posted Jan 28, 2014, 11:10 AM by Page Smith [ updated Feb 18, 2014, 11:53 AM ]

<b>Group:</b>	I80 CSMP Safety Working Group (WG)		
<b>Subject:</b>	Sub-Topic Discussions		
<b>Date and time:</b>	February 18, 2014, 9:00 A.M. PST	<b>Meeting no:</b>	21
<b>Meeting place:</b>	Teleconference	<b>Minutes by:</b>	Andy Blanchard
<b>Attendees:</b>	<i>Patrice Echola (RTC Washoe)</i> <i>Shawn Frye (HDR)</i>	<i>Jim Ceragioli (NDOT) (Co-Chair)</i> <i>Andy Blanchard (Atkins) (Co-Chair)</i>	

ITEM	DESCRIPTION
1	Roll call
2	<p>Update on the overall I-80 CSMP Project</p> <ul style="list-style-type: none"> <li>• <i>leadership meeting of the I-80 project was held 3 weeks ago - it included a report back on the GIS elements of the project and from all working groups – they are producing different deliverables (wildlife crossing mapbook; energy infrastructure scenarios and tourist map of local sites).</i></li> <li>• <i>GIS mapping – a draft general tutorial has been prepared covering GIS maps; a final version will be released shortly. It is intended that a Safety WG GIS map specific tutorial is also prepared.</i></li> <li>• <i>The implementation task force will be established shortly. They will include senior members of stakeholder organisations. Their role includes reviewing and approving WG deliverables, and deciding on the legacy structure of the I-80 CSMP project following the end of the consultant supported elements.</i></li> </ul>
3	<p>Review and update of Topic Papers</p> <p><i>Attendees reviewed the draft Topic Papers distributed prior to the meeting:</i></p> <ul style="list-style-type: none"> <li>• <i>Safety Education / Behavioral Issues (v1.4) – changes recorded in v1.5</i></li> <li>• <i>Funding of Non-Infrastructure Measures (v1.2) – changes recorded in v1.3</i></li> </ul>
4	<p>Adjourn - the meeting adjourned at 9:30 A.M. PST</p> <p style="text-align: right;">Next meeting    March 18 at 9am, PST – to review Topic Papers</p>

### I-80 CSMP Group Discussions

### Information

## [Working Groups](#) > **Tourism**

### Contents

- 1 Goals:
- 2 Deliverables:
- 3 Schedule:
- 4 Members:
- 5 Resources:

Tourism is a major social, cultural, and economic driver among and between communities along the I-80 Corridor. This working group will explore the challenges and needs encountered in achieving the mobility along the I-80 corridor that is necessary to support a healthy and sustainable tourism industry. Easy access is a critical issue for the economic viability and vitality of tourism sites, and communities that rely on tourists that visit these sites.

## Goals:

Drawing on the knowledge and experiences of this working group's members, this working group will aim to identify:

- the importance of the corridor to the tourism sector – identifying critical sections, key destinations
- where the corridor does not meet the needs of the tourism sector now
- where the corridor will likely not meet the needs of the tourism sector in the future
- where and how the corridor can be improved to meet the needs of the tourism sector
- underutilized tourism opportunities and recreation potential

The working group also feels it is imperative to develop a profile of the I-80 tourist to understand who is using I-80, what their expectations are, what are the reasons travelers exit the interstate, and what are they looking for when they do.

## Deliverables:

A technical memo, initially outlining the existing conditions relevant to the Tourism Sector. This is to be expanded to include short and long term goals, and a prioritized list of already identified projects in STIPs and TIPs, using evaluation criteria generated by the working group. A Technical Memo summarizing the following within the Tourism Sector:

- Best practices
- Accomplishments – success stories
- Potential Federal funding sources
- Other topics? Winter Olympics at Reno-Tahoe? Passenger Rail?

## Schedule:

Individuals in this working group will be involved in an hour-long conference call discussion every month as well as other information exchange activities (e.g. surveys). Members of the working group will likely provide briefing updates to the larger task forces engaged in the study. Additionally, members should communicate within their organizations about the nature and results of the working group's dialogue.

- Initial Technical Memo on existing conditions
- Prioritized list of already identified projects (STIP and TIP)
- Interim Technical Memo on short and long term goals

## Members:

The working group will be comprised of individuals either working within the tourism industry or familiar with the tourism needs of the communities they represent. Members will be drawn from:

- State Level departments responsible for tourism
- Regional or City tourist offices
- Elected representatives from smaller cities where the Chamber of Commerce is the principal body for coordinating and promoting tourism
- Representative from the Reno-Tahoe Winter Olympic bid team

# TRAVEL IS AN ECONOMIC ENGINE

## WHY TRAVEL MATTERS TO NEVADA

SPENDING  
\$29.6 BILLION

PAYROLL  
\$9.0 BILLION

JOBS  
304,800

TAX RECEIPTS  
\$4.2 BILLION

## TRAVEL AND TOURISM WORKS FOR NEVADA

- Domestic and international travelers to Nevada spent \$29.6 billion in 2011 and generated \$4.2 billion to federal, state and local governments, dollars that help fund jobs and public programs such as police, firefighters, teachers, road projects and convention centers.
- The 304,800 jobs created by travelers to Nevada in 2011 represent 31.4 percent of the state's total non-farm employment.
- Without these jobs generated by domestic and international travel, Nevada's 2010 unemployment rate of 13.2 percent would have been 35.1 percent of the labor force.
- For every \$1 million spent in Nevada by domestic and international travelers 10 jobs are created.

2011 data

## TRAVEL AND TOURISM IS CRITICAL TO THE U.S. ECONOMY

### TRAVEL AND TOURISM IS ONE OF AMERICA'S LARGEST INDUSTRIES

- Generated **\$2.0 trillion** in economic output, with \$855.4 billion spent directly by domestic and international travelers that spurred an additional \$1.1 trillion in other industries.
- Directly generated **\$129 billion** in tax revenue for local, state and federal governments.
- Each U.S. household would pay **\$1,060 more** in taxes without the tax revenue generated by the travel and tourism industry.
- Direct spending by resident and international travelers in the U.S. averaged **\$2.3 billion** a day, **\$97.7 million** an hour, **\$1.6 million** a minute and **\$27,125** a second.

### TRAVEL AND TOURISM IS AMERICA'S LARGEST SERVICES EXPORT INDUSTRY

- **\$128.6 billion** in travel exports (including traveler spending in the U.S. and international passenger fare payments to U.S. carriers) and the...
- **\$83.7 billion** in travel imports (including U.S. residents' spending abroad and international passenger fares paid to foreign carriers) creates...
- **\$45 billion** in balance of travel trade surplus for the U.S.

### TRAVEL AND TOURISM IS ONE OF AMERICA'S LARGEST EMPLOYERS

- Supported **14.6 million jobs**, including 7.7 million directly in the travel industry and 6.9 million in other industries.
- **\$200.9 billion** in travel-generated payroll for those employed directly in U.S. travel industry.
- 1 of every 8 U.S. non-farm jobs is created directly or indirectly or is induced by travel and tourism.
- Travel is among the **top 10 industries** in 48 states and D.C. in terms of employment.

2012 data

# TRAVEL IS AN ECONOMIC ENGINE

## WHY TRAVEL MATTERS TO UTAH

SPENDING  
\$7.0 BILLION

PAYROLL  
\$1.9 BILLION

JOBS  
71,400

TAX RECEIPTS  
\$1.1 BILLION

## TRAVEL AND TOURISM WORKS FOR UTAH

- Domestic and international travelers to Utah spent \$7.0 billion in 2011 and generated \$1.1 billion to federal, state and local governments, dollars that help fund jobs and public programs such as police, firefighters, teachers, road projects and convention centers.
- The 71,400 jobs created by travelers to Utah in 2011 represent 7.4 percent of the state's total non-farm employment.
- Without these jobs generated by domestic and international travel, Utah's 2011 unemployment rate of 6.9 percent would have been 12.2 percent of the labor force.
- For every \$1 million spent in Utah by domestic and international travelers 10 jobs are created.

2012 data

# U.S. TRAVEL ANSWER SHEET

FACTS ABOUT A LEADING AMERICAN INDUSTRY THAT'S MORE THAN JUST FUN

## LEISURE TRAVEL

- Direct spending on leisure travel by domestic and international travelers totaled **\$597 billion** in 2012.
- Spending on leisure travel generated **\$89 billion** in tax revenue.
- 3 out of 4** domestic trips taken are for leisure purposes (77%).
- U.S. residents logged **1.6 billion** person-trips\* for leisure purposes in 2012.
- Top leisure travel activities for U.S. domestic travelers: (1) visiting relatives; (2) shopping; (3) visiting friends; (4) fine dining; and (5) beaches.

## BUSINESS TRAVEL

(Including Meetings, Events and Incentive)

- Direct spending on business travel by domestic and international travelers, including expenditures on meetings, events and incentive programs (ME&I), totaled **\$259 billion** in 2012.
- ME&I travel accounted for **\$103 billion** of all business travel spending.
- U.S. residents logged **460 million** person-trips\* for business purposes in 2012, with 21% for meetings and events.
- For every dollar invested in business travel, businesses benefit from an average of **\$12.50** in increased revenue and **\$3.80** in new profits (Oxford Economics).

\* Person-trip defined as one person on a trip away from home overnight in paid accommodations or on a day or overnight trip to places 50 miles or more [one-way] away from home.

## INTERNATIONAL TRAVEL

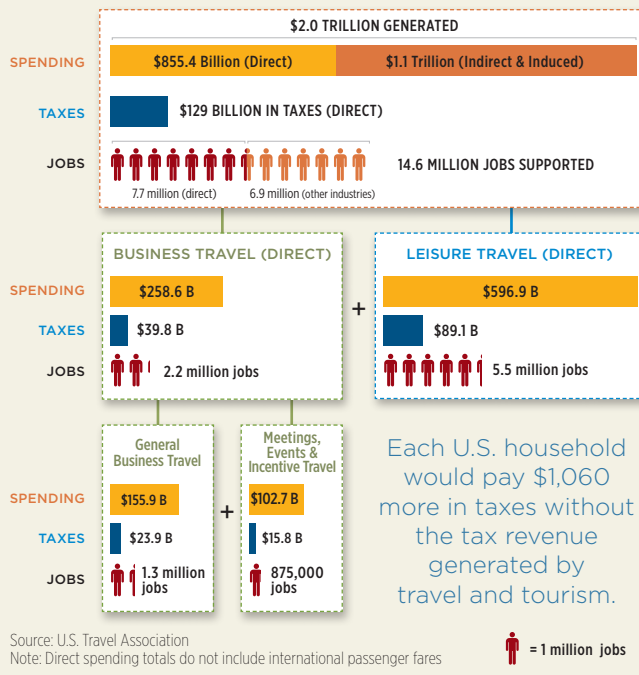

- In 2012, international traveler spending (export receipts) totaled **\$128.6 billion** and travel spending abroad by Americans totaled **\$83.7 billion** (travel import payments), creating a trade surplus of **\$45 billion** in favor of the U.S.
- The U.S. received **66.6 million** international arrivals in 2012. Of those, approximately **29.6 million** were from overseas markets and **37 million** were from Canada and Mexico.
- The United States' share of total international arrivals is **6.4%** (down from **7.5%** in 2000).
- International travel spending directly supported about **1.1 million** U.S. jobs and wages of **\$27.7 billion**.

- Each overseas traveler spends approximately **\$4,455** when they visit the U.S. and stay on average more than **18 nights**.
- Overseas arrivals represent **44%** of all international arrivals, yet account for **78%** of total international travel receipts.
- Greatest challenges facing international visitors: burdensome visa process; unwelcoming entry experience.
- Top leisure travel activities for overseas visitors: (1) shopping; (2) dining; (3) city sightseeing; (4) visiting historical places; and (5) amusement/theme parks.

Direct spending by resident and international travelers in the U.S. averaged **\$2.3 billion** a day, **\$97.7 million** an hour, **\$1.6 million** a minute and **\$27,125** a second.

## U.S. Travel Industry Impact

### SOURCES OF TRAVEL SPENDING

**TOTAL: \$855.4 billion**

Source: U.S. Travel Association

### BY THE NUMBERS

(all data 2012)

**\$2.0 trillion:** Economic output generated by domestic and international visitors (includes \$855.4 billion in direct travel expenditures that spurred an additional \$1.1 trillion in other industries)

**14.6 million:** Jobs supported by travel expenditures (includes 7.7 million directly in the travel industry and 6.9 million in other industries)

**\$200.9 billion:** Wages shared by American workers directly employed by travel

**\$128.8 billion:** Tax revenue generated by travel spending for federal, state and local governments

**2.8%:** Percentage of nation's gross domestic product (GDP) attributed to travel and tourism

**No. 1:** Where travel ranks among all U.S. industry exports

**1 out of 8:** U.S. jobs that depend on travel and tourism

**No. 7:** Where travel ranks in terms of employment compared to other major private industry sectors

**84%:** Percentage of travel companies that are considered small businesses

**2 billion:** Number of person-trips\* that Americans took for business and leisure purposes

**66.6 million:** Number of international arrivals in the U.S. in 2012, including 29.6 million from overseas markets

Travel is among the **top 10 industries** in 48 states and D.C. in terms of employment

### TOP 5 INTERNATIONAL MARKETS TO USA (ARRIVALS)

ORIGIN OF VISITOR	2012
Canada	22.5 million
Mexico	14.5 million
United Kingdom	3.8 million
Japan	3.7 million
Germany	1.9 million

### TOP 5 HIGH-GROWTH MARKETS THRU 2017 (forecasted)

ORIGIN OF VISITOR	ARRIVALS % CHANGE '17/'12
China	154.7%
Saudi Arabia	87.4%
Brazil	55.1%
Argentina	42.9%
Taiwan	36.4%

## I-80 CSMP Group Discussions

### Information

[Working Groups](#) > [Tourism](#) >  
[Meetings](#)

Announcing the next Tourism Working Group meeting:

Below is information you will need to access the web conference for our meeting Thursday, August 29 at 10AM. **If this is the first time you are using go-to-meeting, you will need to download the software on your computer. Allow about 3 to 5 minutes before the meeting begins to download the software.**

During the meeting, the chair for the GIS working group will demonstrate the GIS map. Seeing it demonstrated live will assist us in our discussions about what tourism-related information we want to plan for the GIS map.

### 1. Please join my meeting.

<https://www1.gotomeeting.com/join/199972969>

### 2. Join the conference call:

**Call-information:**

**1-866-642-1665**

**Participant code:**

**843266**

**Meeting ID: 199-972-969**

Meeting 6 will be held on Thursday, August 8 at 10AM

Agenda highlights:

- Discussion and brainstorming with GIS working group members.

Meeting 5 - July 11, 2013 at 10AM

Agenda and minute highlights:

Study update:

- Coy Peacock, study manager, and Perry Gross provided an overview of the Joint Task force conference call held yesterday. Chris Young, Stan Hanel, and Gael Hill were able to listen in on the working group updates.

Recap of the last meeting:

- The tourism group has been having some great discussions over the last several months about the importance of tourism for the communities along the I-80 corridor.
- Through the course of our discussions, we have brainstormed topic areas we want to explore further. These were the topics sent out in the survey. For more information on the topics, please visit the [Discussion Topics and Initiatives](#) page.
- Two areas of focus surfaced in the survey results that the group plans to explore further: development of a tourist profile of the I-80 tourist, and mapping the tourism opportunities along the corridor.

Tourist profile:

- To understand who is using I-80 and what their expectations are.
- To understand what are the reasons travelers exit the interstate.
- To understand what travelers are looking for when they do.

The group agrees the tourist profile will inform the information important for the mapping.

Mapping the tourism opportunities along the corridor will illuminate:

- The importance of the corridor to the tourism sector - identifying critical sections and key destinations.
- Where the corridor does not meet the needs of the tourism sector now.
- Where the corridor will likely not meet the needs of the tourism sector in the future.
- Where and how the corridor can be improved to meet the needs of the tourism sector.
- Underutilized tourism opportunities and recreation potential.

Gael Hill indicated there are many corridor plans for scenic byways that will have this type of destination inventory information.

Action items:

- Invite GIS working group to next Tourism meeting.
- Tourism group members will familiarize themselves with GIS mapping systems for the discussion with the GIS group at the next meeting.

---

Meeting 4 - June 27, 2013 at 10AM

Agenda and minute highlights:

Study update:

- Coy Peacock, study manager, provided a review of the California stakeholder meeting held in Sacramento. Approximately 15 people attended the meeting and voiced support for the study structure and diversity of the working groups.
- Perry Gross announced the upcoming joint task force meeting for July 10 that will be used to recruit others to the working groups.

Announcements:

- Check out the latest podcast posted this week featuring study manager Coy Peacock!
- Thank you to those working group members who took the tourism topics survey!

Review of topic priority survey results:

- Prior to the meeting, working group members took an online survey to prioritize the topics we have been brainstorming and discussing over the past few months. A list of all the topics were provided and participants were asked to select their top three. The results are below:
  - Native American tourism - 20%
  - Adventure tourism - 60%
  - Tourist profile - 40%
  - Historical significance - 40%
  - Current corridor designations - 40%
  - Migrant tourism - 40%
  - Millennial/younger generation tourism - 0%
  - Identify critical sections of the corridor - 40%
  - Rural tourism - 20%
- The group discussed the results and decided to pursue two areas of focus:
  - Development of a tourist profile of the I-80 tourist to understand who is using I-80, what their expectations are, what their reasons for exiting the interstate are, and what they are looking for when they do.
  - Mapping the tourism opportunities along the corridor which we believe will illuminate:
    - The importance of the corridor to the tourism sector by identifying critical sections, and key destinations.
    - Where the corridor does not meet the needs of the tourism sector now.
    - Where the corridor will likely not meet the needs of the tourism sector in the future.
    - Where and how the corridor can be improved to meet the needs of the tourism sector.
    - Underutilized tourism opportunities and recreation potential.

---

Meeting 3 - May 21, 2013 - 1:00 PM

Agenda and minute highlights:

Study update:

- Coy Peacock, study manager, provided a review of the Utah and Wyoming stakeholder meetings. Issues discussed at the meetings included: snow fencing, collaboration, and continuation of the I-80 coalition into the future.
- Perry Gross, consultant team, provided information on the upcoming California and Nevada stakeholder meetings.

Announcements and updates:

- Congratulations to Janet Phillips and the Tahoe-Pyramid Bikeway on receiving the FHWA's 2013 Environmental Excellence Award!
- A reminder to check out the weekly podcast updates was given.

- Coy Peacock and Perry Gross discussed the GIS tool being developed for the study and how the tool will be beneficial for the working groups. An example of the impact construction has on tourism was discussed. The GIS platform will also identify regional issues that need attention from corridor partner states.

#### Review of current topics list:

- The group continued to discuss relevant topics, adding rural tourism to the ongoing list.
- The group also discussed the need to focus our efforts, or "dive-in" to a topic or two.
- An online survey will be sent to the group for prioritization of the topics.

#### Review of other working groups:

- The group reviewed the other working groups and discussed ways the tourism working group can coordinate with the other groups:
  - Create multi-state linkages.
  - Determine if future travel along the corridor will be tourism related or will it be freight traffic. Or will it be both?
  - Share our discussions, information, and products with the other, more technical groups, as a way to elevate the corridor as a tourism destination in and of itself.

#### Brainstorming:

- The group began brainstorming on what potential outcomes will be from our collaboration and exploration of tourism topics important to the I-80 corridor.
- The group discussed mapping out tourism locations, reoccurring events, regional events, college sporting events, festivals, etc.
- Coy Peacock added that the I-80 CSMP logo is a visual for collaborative tourism opportunities.

#### Next steps:

- An online survey to prioritize topics for further exploration will be sent out.
- The group was reminded to continue recruiting for members.
- An email will be sent out to determine the best day/time for the next meeting.
- Perry Gross will provide an I-80 CSMP letter of support for a grant application Janet Phillips is preparing.
- The group chair and co-chair will meet to discuss how to collect the data for the map.

#### Meeting 2 - May 2, 2013 - 10:00 AM

##### Agenda and minute highlights:

##### Introduction of new members:

- Welcome Kent Singleton and Susan Clark!

##### Review the purpose of the working groups:

- A quick review of the study and purpose of the working groups was provided.
- A recap of the first meeting was discussed.

##### Working group goals:

- The group reviewed the proposed goals and made the following comments:
  - Add sustainability emphasis.
  - Highlight family-friendly and eco-friendly.
  - Include information to explore a tourist profile and shift in tourist expectations.
  - Orient goals more to people - who is using I-80? why? what gets them off I-80?

##### Identify initial list of topics for exploration:

- The group continued discussing and adding topics to the list for further exploration.
- University sporting events.
- RSCVA has data for Reno-Sparks events.
- Need to identify underutilized opportunities and where there is recreation potential.

##### I-80 initiatives:

- The group discussed an interest in gathering information about initiatives in each state.
- What is special and unique about each state?
- Make connections across state lines.

Next steps:

- The group discussed meeting every other week going forward.

---

Meeting 1 - April 23, 2013 - 9:30 AM  
Agenda and minute highlights

Presentation of I-80 CSMP study background:

- Perry Gross provided an overview of the study, purpose of the working groups, and how the study will explore sustainable livability principles at a community level.
- The group discussed the economic report and how it magnifies the importance of tourism for rural areas along the corridor.

Introduction to [www.i80vision.org](http://www.i80vision.org) and RSS feed:

- The website was introduced and the group was asked to sign up for the RSS feed in order to be updated as information is added to the group's meetings page.

Recruitment for additional tourism group members:

- The group was asked for recommendations for new group members.

Initial topics list:

The group began discussions on a list of topics to prioritize for further exploration.

- Native American tourism
- Adventure tourism
- Tourist profile - potential tourists, demographics of tourists
- Importance of history along I-80 (100th anniversary of the Lincoln Hwy.)
- What are current I-80 designations?

Next steps:

Next meeting May 2, 2013 at 10:00 AM

#### Working Group Chair: Michael W. Lawson (Atkins)

Mike Lawson has 35 years of experience in traffic and safety planning. Prior to joining Atkins, he was division head of the Nevada Department of Transportation (NDOT) traffic information division. While with NDOT, Mr. Lawson was responsible for developing the annual State Vehicle Size and Weight Enforcement Plan in cooperation with the Nevada Highway Patrol, and for developing vehicle size and weight regulations and laws.

#### [Meeting # 2](#)

**Group:** I80 CSMP Truck parking Working Group

---

**Subject:** NDOT Truck Parking plan, GIS, Winter coalition freight report

---

**Date and time:** August 7, 2013 10:00 A.M. PDST      **Meeting no:** 2

---

**Meeting place:** Teleconference      **Minutes by:** Lawson

---

**Attendees:** TBD

#### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call from RSVP	10:00	Lawson/All
2	Report on status of NDOT Truck parking status	10:05	Bill Thompson
3	Discuss GIS data needs & availability	10:10	Lawson/All
4	Review and discuss relevancy of I80 Winter coalition Freight and Logistics report	10:20	Lawson/UDOT
5	Next Steps	10:30	Lawson/All
6	Adjourn	10:35	

#### [Meeting # 1](#)

**Group:** I80 CSMP Truck Parking Working Group

---

**Subject:** Organizing the group

---

**Date and time:** May 30, 2013 2:00 P.M. PDST      **Meeting no:** 1

---

**Meeting place:** Teleconference      **Minutes by:** Mike Lawson

---

**Attendees:** Mike Lawson (Atkins),

#### Agenda

ITEM	DESCRIPTION	TIME	RESPONSIBLE
1	Roll call from RSVP	2:00	Mike/All
2	Establish ground rules for how to best engage in conference calls and other group activities	2:10	Mike/All
3	Discuss mission statement, goals, objectives, and deliverable	2:20	Mike/All
4	Next steps including identification of additional working group members	2:30	Mike/All
5	Adjourn	2:45	Mike/All

---

### [Working Groups](#) > **Wildlife Crossings**

The mission of the Wildlife Crossing Working Group is to better understand the functional relationship between transportation and wildlife ecology along I-80. Through conversations focused around areas that intersect with I-80, the working group will explore the various dynamics of road ecology and consider enhanced infrastructure that can improve the safety of motorists and wildlife by reducing wildlife-vehicle collisions, decreasing habitat fragmentation, and increasing landscape connectivity.

The wildlife in Nevada are enjoying their crossing.
