

**FATAL FLAW SCREENING**

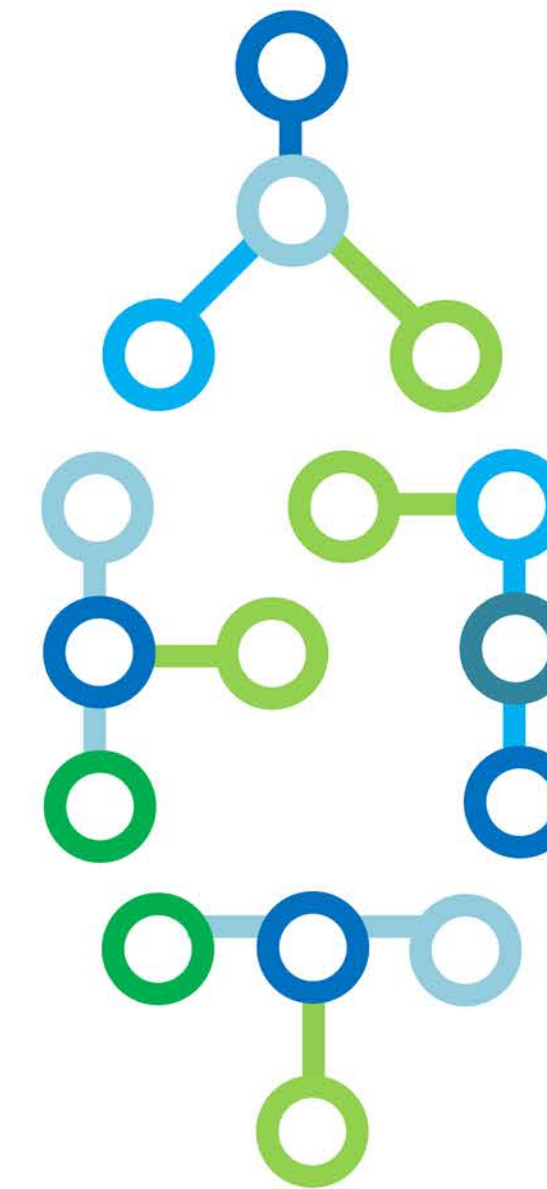

Improvements are evaluated against project goals and purpose and need. Those with “fatal flaws” drop out; the remainder continues to Level 1 Screening.

**LEVEL 1 SCREENING**

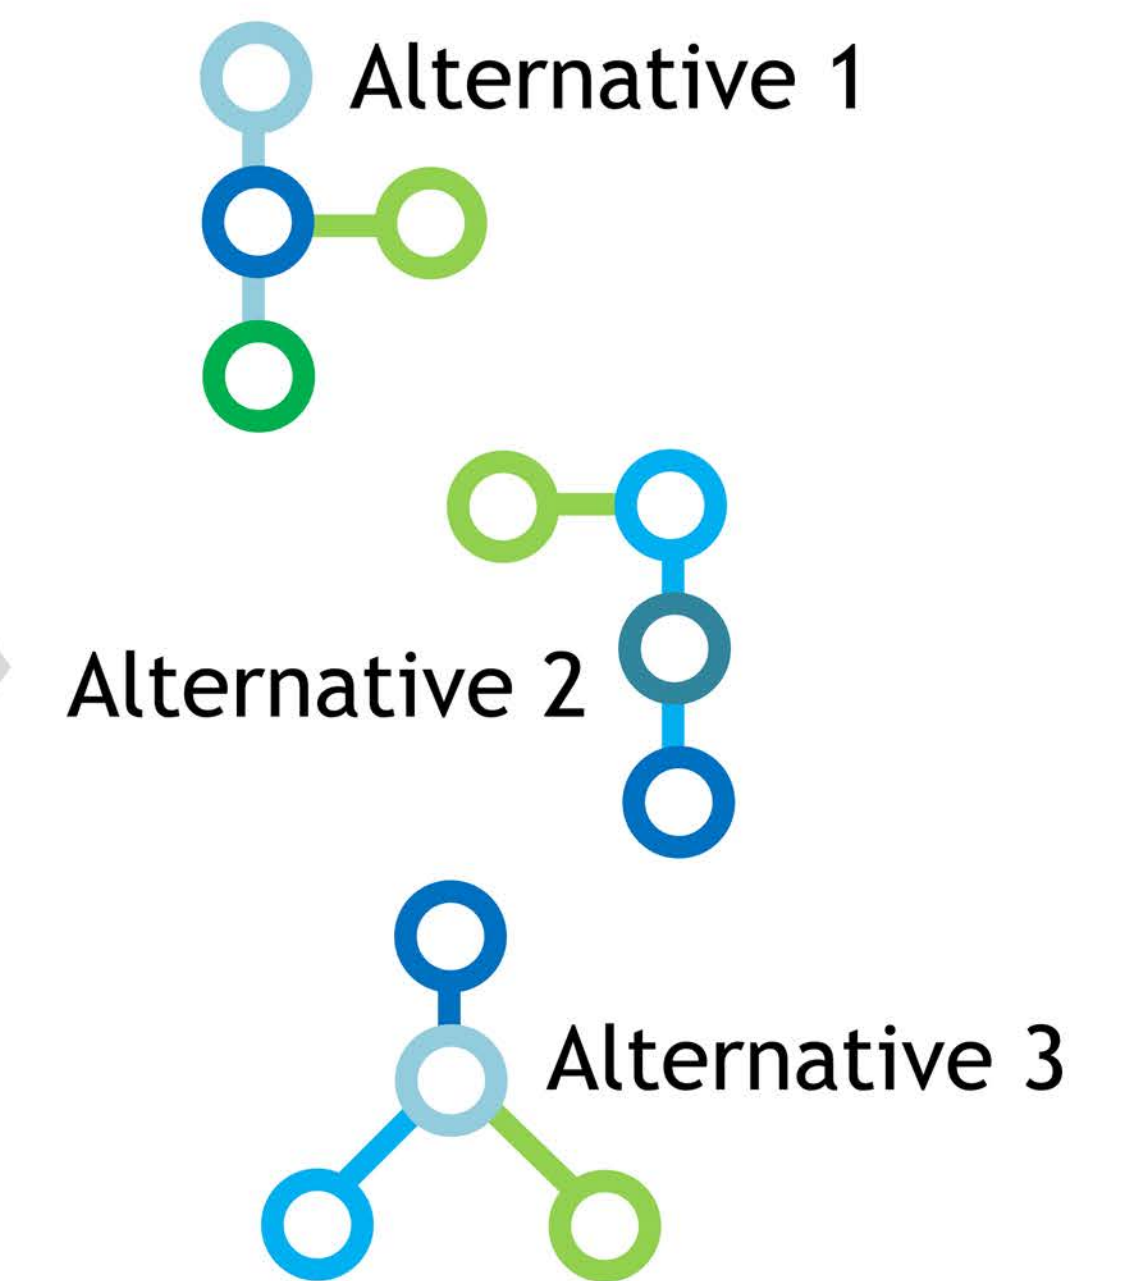

Improvements are evaluated against operational, design and environmental criteria and rated on a scale from “Poor” to “Best”.

**LEVEL 2 SCREENING**

Improvements are grouped based on geographic proximity and evaluated against more detailed criteria.

**LEVEL 3 SCREENING**

Alternatives are then prioritized and a Benefit Cost Analysis is conducted on the highest priority projects.
